RE: HI SR93/SCR106

Dear Chairman Gabbard and Members of the Senate Committee on Agriculture and Environment,

On behalf of the U.S. Green Building Council (USGBC) more than 1,000 LEED credentialed professionals in Hawai'i, we are pleased to **provide our full support for SR 93/SCR106.**

USGBC is a nonprofit organization working to build healthy, resilient, and equitable green buildings and communities to improve the quality of life for all. Best known for the successful Leadership in Energy & Environmental Design (LEED) green building certification system, we leverage our education, credentials, events, communications, and policy advocacy activities to support the public and private sectors in advancing high-performance, buildings that support health and the environment. There are 235 LEED-certified buildings in Hawai'i alone, spanning over 25 million square feet of real estate.

The Infrastructure Investment and Jobs Act (IIJA) invests historic amounts of money into repairing and modernizing our nation's infrastructure. The sheer magnitude of the package means that this is important opportunity to lay the groundwork for a future that is cleaner, more resilient and more equitable. Critically, by requiring the Governor to convene an infrastructure task force that coordinates efforts to ensure that federal funding is used to advance climate, resilience and equity goals, SR 93 provides accountability to ensure that Hawai'i infrastructure projects are tied to these desired outcomes.

We look forward to working with the Committee on Agriculture and Environment and the rest of Hawaii's legislature to pass SR 93/SCR106. Please do not hesitate to contact us if you have any questions.

Sincerely,

Jennifer Gunby
