Statement of
Daniel E. Orodener
Executive Officer
State Land Use Commission

Before the
House Committee on
Water and Land

Tuesday February 14, 2023
8:30 AM
State Capitol, Room 430

In consideration of
HB 670 HD1
RELATING TO THE LAND USE COMMISSION

Chair Ichiyama; Vice Chair Poepoe; and members of the House Committee on Water and Land:

The LUC is not opposed to HD1 of this measure which reduces the number of required votes to approve a petition from 6 to 5.

We also join in the comments from the Attorney General's office.

Thank you for the opportunity to testify on this matter.

HB670 HD1
RELATING TO THE LAND USE COMMISSION
House Committee on Water & Land

February 14, 2023

8:30 AM

Room 430

The Office of Hawaiian Affairs (OHA) **STRONGLY OPPOSES HB 670 HD1**, which would reduce the number of Land Use Commission (LUC) votes needed to approve a district boundary amendment (DBA) from a super majority of the LUC to a simple majority. **OHA’s opposition to this measure stems, primarily, from the fact that the LUC was created as a necessary ‘check-and-balance’ to ensuring that Hawai‘i’s lands were preserved and protected, while encouraging best uses.¹ Removing these requirements erode this system of protection.**

Article XI, Section 3 of the Hawaii State Constitution states that “[l]ands identified by the State as **important agricultural lands... shall not be reclassified by the State or rezoned by its political subdivisions without... [being] approved by a two-thirds vote of the body responsible for the reclassification or rezoning action.**”² The proposed measure, as written, amends Hawaii Revised Statutes §205-1 to authorize the LUC to approve any DBA by a simple majority, including DBAs for important agricultural lands, rather than requiring a two-thirds vote of the body as required. This would not only threaten IAL, but also negatively affect food sustainability in Hawaii.

Currently, “more than 80% of Hawai‘i’s food is imported”³. The Hawai‘i 2050 Sustainability Plan – Ten Year Measurement Update noted that “[t]he 2008 Hawaii 2050 Sustainability Plan measured that about 15% of the food consumed in Hawaii was grown locally, and 35% of the fruits and vegetables consumed were locally grown.”⁴ The Office of Planning has previously stated that food production in Hawaii is hampered in part by “pressure on the use of important agricultural land for higher value purposes.”⁵

HB670 HD1
RELATING TO THE LAND USE COMMISSION
House Committee on Water & Land

While housing is a critical need in the State of Hawaii, so too is reliable access to food. Nearly every DBA reviewed by the LUC in recent history has been to convert Agricultural or Conservation District lands to Urban or Rural District lands. A total of 24 DBAs have been filed with the LUC from 2010 as of the beginning of February 2023. A review of each DBA application filed with the LUC from 2010 to present indicates that, of the 24 DBAs filed with the LUC in this 13-year period, a total of 17 DBAs have been granted with one DBA being denied on initial submission but granted upon reconsideration; 3 DBAs have been withdrawn by the petitioner, 1 other was terminated by the petitioner, and 3 DBAs appear to be currently in progress.⁶ Of these 24 DBA applications, the vast majority have been to redistrict Agricultural or Conservation lands to Urban, with several applications including a request for amendment to Rural, while only one request was to reclassify lands to Agricultural from Conservation.

As of September 4, 2020, a total of 136,489 acres of land has been designated by the LUC as IAL, with approximately 37,410 acres of IAL on Kauai, 15,205 acres of IAL on Oahu, 27,102 acres of IAL on Maui, and 56,772 acres of IAL on the island of Hawaii.⁷ In designating IAL, the LUC has played a protective role in protecting IAL from “higher value” uses, which in turn has helped support Hawaii’s food sustainability goals.

By simplifying the DBA process for the LUC, this measure would permanently remove more Agricultural lands from use for food production and directly impact food sustainability in Hawaii. Removing Agricultural lands from agricultural uses is only a “higher value” for developers making money, it would not be a higher value for all of the residents in Hawaii that depend on imported food that can be disrupted by supply chain issues, such as what the State just experienced during the pandemic.

By weakening the 2/3 majority requirement of the LUC for all DBAs, including DBAs involving IAL, this measure would violate the Hawaii State Constitution.

OHA appreciates the opportunity to express our concerns with the implications of this measure and urges the Legislature to **DEFER HB 670 HD1**. Mahalo nui loa.

The Honorable Linda Ichiyama, Chair

House Committee on Water & Land

State Capitol, Conference Room 430 & Videoconference

RE: House Bill 670, HD1, Relating to the Land Use commission

HEARING: Tuesday, February 14, 2023, at 8:30 a.m.

Aloha Chair Ichiyama, Vice Chair Poepoe, and Members of the Committee:

My name is Lyndsey Garcia, Director of Advocacy, testifying on behalf of the Hawai'i Association of REALTORS® ("HAR"), the voice of real estate in Hawai'i and its over 11,000 members. HAR **supports** House Bill 670, HD1, which specifies that a simple majority of affirmative votes by members of the land use commission is required for any boundary amendment. Effective 7/1/3000.

According to the Department of Business Economic Development and Tourism's 2019 report on Housing Demand in Hawai'i, the state needs up to 45,497, housing units to meet demand in Hawai'i by 2030.¹ As the Land Use Commission is an integral part of the district boundary amendment process, this measure may help streamline the land use process and help our State address our housing challenges.

For the foregoing reasons, Hawai'i Association of REALTORS® supports this measure. Mahalo for the opportunity to testify.

Ted Kefalas, Director of Strategic Campaigns

RE: HB670 HD1— RELATING TO THE LAND USE COMMISSION

Comments Only

Dear Chair and Committee Members:

The Grassroot Institute of Hawaii would like to offer its comments on [HB670 HD1](#), which would streamline the process by which the state Land Use Commission acts on boundary amendments.

Under this bill, the number of affirmative votes required for a boundary amendment would be reduced from six to a simple majority.

This bill correctly identifies and addresses one of the major causes for the slow growth of housing in this state: the delays caused by multiple layers of bureaucratic approvals.

Delays in county and state approvals — whether caused by permitting backlogs or the difficulties of navigating Hawaii’s multitiered approval process — are one of the reasons Hawaii’s average approval delay is three times the national mean.¹

We commend this committee for considering a bill that would reduce such delays at LUC.

¹ Rachel Inafuku, Justin Tyndall and Carl Bonham, “[Measuring the Burden of Housing Regulation in Hawaii](#),” Economic Research Organization at the University of Hawai’i, April 14, 2022, p.7.

Over time, the LUC has evolved into a kind of state-level zoning and approval agency, which has added to the delay and bureaucracy faced by those looking to develop more housing. A Grassroot Institute of Hawaii report, "[Reform the Hawaii LUC to encourage more housing](#)," discussed how state policymakers could encourage the growth of housing by reexamining the role and purpose of the LUC.

The Grassroot report focused heavily on ways to reduce the scope of the LUC, leaving it free to focus on statewide environmental issues and district boundary amendments of conservation lands. But it also promoted the idea of making the LUC more efficient in general.

We do have one concern about the amendment to this bill. The removal of the bill's original time limits on LUC actions might be responsive to the objections of the LUC, but it frustrates the intent of this bill to streamline LUC decision-making.

The Grassroot Institute of Hawaii suggests the inclusion of a compromise time limit, such as 150 days for a hearing and 250 days for a decision. This is still a reduction of the current limits, but would give the LUC more time to make its determinations. Given the LUC's previous testament that most projects were heard within the required 180 days and that the LUC is able to issue extensions as needed for larger projects, this should be a reasonable middle ground.

Further reform should look at ways to continue refocusing the LUC to better achieve its original purpose. But in the short term, this bill would help reduce the wait for housing developments that require LUC approval.

For anyone who wants to see more homes built, enactment of this bill would be an important and very welcome step forward. We urge the committee to pass this bill.

Thank you for the opportunity to submit our comments.

Sincerely,

Ted Kefalas
Director of Strategic Campaigns
Grassroot Institute of Hawaii

Representative Linda Ichiyama, Chair
Representative Mahina Poepoe, Vice Chair
House Committee on Water & Land

Testimony in Support of HB 670, Relating to the Land Use Commission (LUC) (Specifies that a simple majority of affirmative votes by members of the LUC is required for any boundary amendment. Effective 7/1/3000. [HD1])

**Tuesday, February 14, 2023, at 8:30 a.m.
State Capitol, Conference Room 430; Via Videoconference**

The Land Use Research Foundation of Hawaii (LURF) is a private, non-profit research and trade association whose members include major Hawaii landowners, developers, and utility companies. One of LURF's missions is to advocate for reasonable, rational, and equitable land use planning, legislation and regulations that encourage well-planned economic growth and development, while safeguarding Hawaii's significant natural and cultural resources and public health and safety.

LURF appreciates the opportunity to provide its **support of HB 670, HD1**.

HB 670, HD1. The purpose of this bill is to reform the decision-making process of the LUC, by specifying that a simple majority of affirmative votes by members of the LUC is required for any boundary amendment.

LURF's Position. Hawaii is suffering from a critical shortage of housing units, which is further exacerbated due to delays in permitting and approvals substantially increasing the time and cost required to build new housing. In addition to the LUC process, each of the counties have multiple layers of land use entitlement processes, including the county General Plan, development plan, zoning, subdivision, and building permit processes which adequately protect the State's interests in providing housing for all, well-planned economic growth and development, while safeguarding Hawaii's significant natural and cultural resources and public health and safety. These multiple, and often duplicative layers of entitlement processes can result in delays of up to 10 years for homes to be built for local residents.

Thank you for the opportunity to present testimony in support of this measure.
