Comments:

The discussion about AI is and has been happening for the past ten years. Congress is behind on the risks and dangers. Whether it how the ai process its information, how it's being used, from deep fakes to chatboxes, and most of all, privacy concerns and where that information comes from. If we do not act fast, AI will become another tool built on the exploitation of us citizens, that we would be powerless to confront or navigate because of the tech giants that control them,
