1 WHEREAS, on August 8, 2023, catastrophic wildfires swept
2 through various communities on Maui; and

3
4 WHEREAS, the wildfires impacted human life and the
5 community, housing, education, economy, and health of Maui
6 residents; and

7
8 WHEREAS, the presence of grasses, trees, and other
9 vegetation adjacent to or under electric utility lines poses a
10 significant risk to fire safety; and

11
12 WHEREAS, the House of Representatives, in response to the
13 August 2023 Maui wildfires, established six interim working

17
18 WHEREAS, the Wildfire Prevention Working Group, one of the

21 of wildfires are caused by human ignitions; and

22
23 WHEREAS, the Wildfire Prevention Working Group also found
24 that guinea grass, fountain grass, molasses grass, and
25 buffelgrass can form continuous fuel beds, ignite easily, attain
26 extremely high fine fuel loads, and are capable of growing back
27 more vigorously in the post-fire environment than the majority
28 of native vegetation; and
29

1 WHEREAS, utility companies in the State have miles of
2 utility lines installed throughout the State on government and
3 private land including within the public rights of way and
4 mountainous areas of the State; and
5

6 WHEREAS, a significant portion of the aforementioned public
