

GRAFFITI BUSTERS

What can you do to get rid of unsightly graffiti on a Hawaiian Electric Company padmount transformer in your neighborhood?

- Please call our Hot Line 543-7370.
- Provide the location by closest address or cross street. If available, provide the transformer number stenciled on the front of the transformer.
- Or, fax a list to us at 543-7347.

Once the equipment has been verified as belonging to HECO, the crew makes every effort to paint over the graffiti in 5 working days from the date that they receive the report.

As our “eyes” in the community, you are helping us maintain the many transformer equipment located around the island. And working together, we can help keep our neighborhoods looking good.
