## Talk Story with McKinley High School Students

I had the awesome experience of speaking with the Senior students in McKinley High School's "American Problems" class. We discussed tax reform, a living minimum wage, housing, healthcare, youth homelessness, marijuana legalization, crime, and student debt - amongst other topics. These young people were so thoughtful and insightful, and asked really pointed questions about the issues. I was truly blown away by how mindful and engaged they were, and how invested in their society and community they already are.
