### Legislative Testimony

#### Hō'ike Mana'o I Mua O Ka 'Aha'ōlelo

Testimony Presented Before the  
House Committee on Finance  
Wednesday, February 28, 2024 at 10:00 a.m.

By  
Naoto Ueno  
Director, UH Cancer Center  
And  
Michael Bruno  
Provost  
University of Hawai'i at Manoa

#### HB 2504 HD1 – RELATING TO CIGARETTE TAXES

Chair Yamashita, Vice Chair Kitagawa, and Members of the Committee:

Thank you for the opportunity to present our testimony today. The UH Cancer Center is in **strong support** of HB 2504 HD1, which increases the cigarette tax from \$0.16 to \$0.18 per cigarette. Currently, the cigarette tax revenues are allocated where \$0.02 supports Hawai'i's Cancer Center. The bill would provide for an additional \$.02 in the cigarette tax amount allocated to the Hawai'i cancer research special fund (for a total of \$0.04 per cigarette).

This funding has been instrumental since its inception in 2006, enabling the construction of the UH Cancer Center building and launching strategic initiatives to combat cancer. However, due to the success of smoking cessation efforts, this revenue has declined, indicating both progress in public health and a concerning decrease in resources for the initiatives that have fueled this advancement. Now providing less than half the funding compared to that of 2009, this source of revenue is no longer able to support its original intent to provide a top-notch facility and to invest in the most promising research impacting the burden of cancer in Hawai'i and the Pacific.

The implications of the proposed increase are profound, empowering UH Cancer Center to attract and retain top-tier scientists and clinicians, thus expanding our capacity to conduct groundbreaking research and deliver cutting-edge patient care.

The return on this investment is multifold:

#### **Investment in Tobacco Research is an Investment in the Health and Wellbeing of Our Community.**

This funding has supported and provided the infrastructure for developing evidence-based programs to understand the health behaviors underlying tobacco use, including:

- developing and testing culturally-tailored interventions to promote smoking cessation among Native Hawaiians, Pacific Islanders, Asian Americans, and low-income populations;

- conducting longitudinal studies on the patterns, predictors, and consequences of e-cigarette use among adolescents and young adults in Hawai'i;
- evaluating the impact of tobacco control policies, such as smoke-free laws, tobacco taxes, and minimum legal age of sale, on tobacco use behaviors and health outcomes;
- providing evidence-based knowledge to inform public health officials and regulatory authorities on how to regulate tobacco products effectively and in a way that best serves individuals and public health;
- conducting tobacco-related research to advance health equity and prevent the initiation of tobacco use among youth and young adults.

### **Investment in the UH Cancer Center is an Investment in Economic Growth.**

The UH Cancer Center attracts federal grants and collaboration that contribute to our local economy. It positions Hawai'i as a leader in cutting-edge cancer research and clinical care that serves our community and generates revenues from patients seeking treatment and care customized to the needs of our diverse Pacific Asian populations.

Funding the UH Cancer Center enables it to provide for:

- attracting committed and world-class researchers and clinical investigators with start-up packages for new faculty recruits who will bring federal grants and propel groundbreaking discoveries in cancer prevention, treatment, and care ;
- addressing the shortage of specialized oncology practices in Hawai'i;
- Attracting pharmaceutical companies partnering with UH Cancer Center and hospitals to fund clinical trials for patients in Hawaii, Asia, and the Pacific regions.

### **Investment in the UH Cancer Center Paves A New Way Forward in Research and Cancer Care.**

We firmly believe that now is the time to prioritize cancer research and demonstrate our commitment to improving the health and well-being of our communities and providing the best treatment for our patients. It impacts the community by providing better quality cancer treatment and prevention by recruiting disease expert cancer doctors rather than general oncologists. By directing additional funds towards cancer research and clinical trials, we can harness the full potential of UH Cancer Center and foster an environment where innovative cancer treatments and prevention are developed, benefiting cancer patients statewide and the community we serve.

Based on the above, we believe that an increased allocation of 2 cents per cigarette tax is well spent to keep Hawai'i at the forefront of cancer research and ensure that our communities receive the care and resources they deserve. Prioritizing UH Cancer Center through this tax reallocation is not merely a fiscal decision but a statement of our collective commitment to the health and prosperity of Hawai'i's people. The benefits of this investment will resonate far beyond the immediate fiscal year, marking a steadfast path toward a future where cancer can be effectively combatted.

Thank you for this opportunity to testify.

**TESTIMONY ON THE FOLLOWING MEASURE:**

H.B. No. 2504, H.D. 1, Relating to Cigarette Taxes.

**BEFORE THE:**

House Committee on Finance

**DATE:** Wednesday, February 28, 2024

**TIME:** 10:00 a.m.

**LOCATION:** State Capitol, Room 308

Chair Yamashita, Vice-Chair Kitagawa, and Members of the Committee:

The Department of Taxation ("Department") offers the following comments regarding H.B. 2504, H.D. 1, for your consideration.

H.B. 2504, H.D. 1, makes two amendments to chapter 245, Hawaii Revised Statutes (HRS), which governs the State's cigarette tax and tobacco tax. Section 1 of the measure amends section 245-3, HRS, to increase the tax rate on each cigarette and little cigar sold, used, or possessed by a wholesaler or dealer from 16.00 cents per unit sold on or after July 1, 2011, to 18.00 cents per unit sold on or after July 1, 2024. Section 2 of the measure amends section 245-15, HRS, so that revenues from the new rate of tax are deposited after June 30, 2024 as follows:

- (A) 4.00 cents per cigarette to the Hawaii Cancer Research Special Fund pursuant to section 304A-2168, HRS;
- (B) 1.125 cents per cigarette, but not more than \$7,400,00 in a fiscal year, to the Trauma System Special Fund pursuant to section 321-22.5, HRS;
- (C) 1.25 cents per cigarette, but not more than \$8,800,00 in a fiscal year, to the Community Health Centers Special Fund pursuant to section 321-1.65, HRS; and
- (D) 1.25 cents per cigarette, but not more than \$8,800,000 in a fiscal year, to the Emergency Medical Services Special Fund pursuant to section 321-234, HRS.

H.B. 2504, H.D.1, has a placeholder effective date of July 1, 3000.

The Department is able to administer this bill with an effective date of July 1, 2024. Thank you for the opportunity to provide comments on this measure.

STATE OF HAWAII  
DEPARTMENT OF HEALTH  
KA 'OIHANA OLAKINO  
P.O. Box 3378  
Honolulu, HI 96801-3378  
doh.testimony@doh.hawaii.gov

**Testimony in SUPPORT of H.B. 2504, H.D. 1  
RELATING TO CIGARETTE TAXES**

REPRESENTATIVE KYLE T. YAMASHITA, CHAIR  
HOUSE COMMITTEE ON FINANCE

Hearing Date: February 28, 2024

Room Number: Conference Room 308  
and via Videoconference

1 **Fiscal Implications:** The fiscal impact of an increase in excise tax on cigarettes in Hawaii would  
2 result in increases in state tax revenues while at the same time leading to reductions in  
3 cigarette consumption and chronic disease and health care spending, including Medicaid  
4 spending in the state.

5 **Department Position:** The Department of Health (DOH) supports this measure requested by  
6 the Governor as both a health equity and social justice issue to address the burden of tobacco  
7 use in Hawaii.

8 **Department Testimony:** The DOH supports House Bill 2504, House Draft 1 (H.B. 2504, H.D. 1)  
9 which would impose an excise tax equal to 18.00 cents for each cigarette or little cigar sold,  
10 used, or possessed by a wholesaler or dealer on and after July 1, 2024, whether or not sold at  
11 wholesale, or if not sold then at the same rate upon the use by the wholesaler or dealer.

1 According to the U.S. Surgeon General, increasing the price of tobacco products is the  
2 single most effective way to reduce consumption.<sup>1</sup> A ten percent increase in price has been  
3 estimated to reduce overall cigarette consumption by 3-5%.<sup>2</sup> Research also suggests that both  
4 youth and young adults are two to three times more likely to respond to increases in price than  
5 adults.<sup>3</sup>

6 The burden of tobacco use is inequitably felt by Hawaii's communities and population  
7 groups. Due to the intentional marketing practices of the tobacco industry, Native Hawaiian  
8 (16.5%), individuals who identify as LGBT (12.3%), those who are of low socioeconomic status  
9 (20.3%), and those with behavioral health conditions (19.7%) or substance use disorders  
10 (17.5%) have higher smoking prevalence than the state average (10.1%).<sup>4</sup>

11 Cigarette smoking persists as the leading cause of preventable death nationally<sup>5</sup> and is  
12 linked to heart disease, cancer, and stroke which were also the leading causes of death in  
13 Hawaii in 2021.<sup>6</sup> Each year an estimated 1,400 Hawaii adults die from smoking.<sup>7</sup> The Centers  
14 for Disease Control and Prevention estimates that smoking causes approximately 90% of all  
15 lung cancer deaths and 80% of all deaths from chronic obstructive pulmonary disease  
16 (COPD).<sup>8,9</sup>

<sup>9</sup> U.S. Department of Health and Human Services. [How Tobacco Smoke Causes Disease: What It Means to You](#). Atlanta: U.S. Department of Health and Human Services, Centers for Disease Control and Prevention, National Center for Chronic Disease Prevention and Health Promotion, Office on Smoking and Health, 2010 [accessed 2017 Apr 20].

1 Cigarette smoking also takes a financial toll on the state. The annual estimated health  
2 care costs directly caused by smoking in Hawaii is \$611 million.<sup>10</sup> Smoking-caused government  
3 expenditures result in a tax burden of \$983.00 per household and \$1.1 billion in lost  
4 productivity in Hawaii.<sup>11</sup>

5 The World Health Organization (WHO) recommends that tobacco taxes should be raised  
6 significantly and at regular intervals to ensure that tobacco products do not become more  
7 affordable.<sup>12</sup> The last cigarette tax increase in Hawaii was 13 years ago in 2011<sup>13</sup> and there was  
8 an observed decrease in high school cigarette use from years prior and continued steadily  
9 thereafter.<sup>14</sup> The DOH supports H.B. 2504, H.D. 1 to increase the excise tax on cigarettes and  
10 little cigars and defers to the request from the Governor and University of Hawaii System  
11 regarding allocation of revenues.

12 **Offered Amendments:** None

Wednesday, February 28, 2024; 10:00 a.m.  
State Capitol, Conference Room 308  
Via Videoconference**

**RE: HOUSE BILL NO. 2504, HOUSE DRAFT 1, RELATING TO CIGARETTE TAXES.**

Chair Yamashita, Vice Chair Kitagawa, and Members of the Committee:

The Hawaii Primary Care Association (HPCA) is a 501(c)(3) organization established to advocate for, expand access to, and sustain high quality care through the statewide network of Community Health Centers throughout the State of Hawaii. The HPCA **SUPPORTS** House Bill No. 2504, House Draft 1, RELATING TO CIGARETTE TAXES.

By way of background, the HPCA represents Hawaii's Federally Qualified Health Centers (FQHCs). FQHCs provide desperately needed medical services at the frontlines to over 150,000 patients each year who live in rural and underserved communities. Long considered champions for creating a more sustainable, integrated, and wellness-oriented system of health, FQHCs provide a more efficient, more effective and more comprehensive system of healthcare.

This bill, as received by your Committee, would raise the Cigarette and Tobacco Tax by 2.0 cents per cigarette sold, used or possessed by a wholesaler or dealer on or after July 1, 2024, and increase the deposit of cigarette and tobacco tax revenues to the Hawaii Cancer Research Special Funds from 2.0 cents per cigarette to 4.0 cents.

This measure would take effect on July 1, 3000.

During the Regular Session of 2023, the HPCA testified in support of House Bill No. 1301, a measure that would have appropriated an unspecified amount of general funds for fiscal years 2023-2024, and 2024-2025, for a multi-ethnic cohort study focusing on the social determinants of health, lifestyles, environmental exposures, and resilience factors of Native Hawaiians, Pacific Islanders, and Filipinos. The funds would have been expended by the University of Hawaii, and require the University to seek additional funds to complete the multi-cohort study. This study would have been performed by the Cancer Research Center.

**Testimony on House Bill No. 2504, House Draft 1**  
**Wednesday, February 28, 2024; 10:00 a.m.**  
**Page 2**

Despite strong support by health care providers and the community at large, House Bill No. 1301, unfortunately, failed to be approved last year.

During the interim following the 2023 Regular Session, various stakeholders and community organizations met to discuss ways of providing the Cancer Research Center with sufficient resources to conduct the multi-cohort study. At that time, it was disclosed that the Cancer Research Center had a dedicated funding source – the Cigarette and Tobacco Tax – that could be used to fund research projects.

At that time, the stakeholders considered requesting the Governor to use his powers to shift funds to immediately fund the cohort study. However, after careful consideration, the stakeholders decided not to proceed in that manner.

We note that the bill before you was submitted as part of the Administration’s legislative package. It would provide for a slight increase in the Cigarette and Tobacco Tax with the proceeds directed to the Cancer Research Center. With the additional resources provided by this tax increase, the Cancer Research Center would be able to devote these funds for research projects, such as the cohort study.

**For the foregoing reasons, the HPCA supports this measure and urges your favorable consideration.**

Thank you for the opportunity to testify. Should you have any questions, please do not hesitate to contact Public Affairs and Policy Director Erik K. Abe at 536-8442, or eabe@hawaiiipca.net.

Honorable Chair Representative Kyle Yamashita  
Honorable Vice-Chair Representatives Lisa Kitagawa  
Members of the House Committees on Finance

RE: **Strong Support for HB25404, Relating to Cigarette Taxes**

Dear Chair Yamashita, Vice Chair Kitagawa and members of the House Finance Committee,

This measure is extremely critical to the health of the children of our state and our entire state as well. **Please pass HB2504**, which would **raise the cigarette tax**. This will help discourage youth use and will use the money collected from the increase for the Cancer Research Fund.

I am Executive Director of the Hawaii COPD Coalition and serve over 45,000 Hawaii adults diagnosed with COPD in Hawaii (with an estimated equal number still undiagnosed). Chronic Obstructive Pulmonary Disease or COPD is an umbrella of diseases which include emphysema, chronic bronchitis and chronic asthma. Since 2007, I have worked in Hawaii, nationally and internationally with countless people who have had their lungs and lives horribly affected by tobacco and nicotine. Many of these people have become disabled and unable to perform jobs and hobbies they enjoyed, spending a lot more time and resources with healthcare providers and requiring support from society than they or any of us would like.

Research shows conclusively that significant price increases reduce tobacco use among youth. Please help protect the lungs and lives of our children from cigarettes. We urge you to please **vote in favor of HB2504 pass it out of committee so our keiki and community will be protected via higher tobacco taxes**. The Hawaii COPD Coalition thanks you very much for your careful consideration of this most important and timely bill.

Very truly yours,

*Valerie Chang*

Valerie Chang

Executive Director

## **HB2504 HD1 Cigarette Taxes**

COMMITTEE ON FINANCE

Rep. Kyle T. Yamashita, Chair

Rep. Lisa Kitagawa, Vice Chair

Wednesday, Feb 28, 2024: 10:00: Room 308 Videoconference

### **Hawaii Substance Abuse Coalition Supports HB2504 HD1:**

*ALOHA CHAIR, VICE CHAIR, AND DISTINGUISHED COMMITTEE MEMBERS. My name is Alan Johnson. I am the current chair of the Hawaii Substance Abuse Coalition (HSAC), a statewide organization for substance use disorder and co-occurring mental health disorder treatment and prevention agencies and recovery-oriented services.*

HSAC supports the increase in cigarette taxes, which helps to discourage youth use.

HSAC supports that tax funds to the Hawaii Cancer research special fund, up to \$7.4M for the trauma system special fund, up to \$8.8M to the Community Health Centers and up to \$8.8M to the emergency medical services special fund.

**HSAC advocates that some of the tax be allocated to the Tobacco Cessation programs to support their work.**

We appreciate the opportunity to provide testimony and are available for questions.

**TESTIMONY OF TINA YAMAKI  
PRESIDENT  
RETAIL MERCHANTS OF HAWAII  
February 28, 2024**

**Re: HB 2504 HD1 Relating to Cigarette Tax**

Good morning, Chair Yamashita and members of the House Committee Finance. I am Tina Yamaki, President of the Retail Merchants of Hawaii.

The Retail Merchants of Hawaii was founded in 1901, RMH is a statewide, not for profit trade organization committed to the growth and development of the retail industry in Hawaii. Our membership includes small mom & pop stores, large box stores, resellers, luxury retail, department stores, shopping malls, local, national, and international retailers, chains, and everyone in between.

We OPPOSE HB 2504 HD1 Relating to Cigarette Taxes. This measure increases the cigarette tax and amends the cigarette tax disposition of revenues by allocating the increase in the cigarette tax amount to the Hawai'i cancer research special fund; and is effective 7/1/3000.

We want to point out that [Hawaii's tobacco sales bring in over \\$83 million in tax revenue to the state in 2023 alone](#). We are also seeing a slight decline in the tobacco tax revenue indicating that people are not smoking as much and or as often.

**Last year the legislature passed a tax on vape products that is anticipated to also bring to the state millions of dollars. We anticipate the state to gain over \$100 million in tobacco & vape taxes in 2024. This number does not include the revenue to the State brought on by the General Excise Tax that is on top of the Tobacco / Vape Tax.**

Many retailers statewide are already operating on a thin margin and face stiff competition. Raising the tobacco tax will profoundly affect our locally owned businesses, especially the small locally owned businesses like the corner store and may potentially force some of them to close.

The higher price of these types of goods would only make it more attractive to shoplift. We have seen a significant spike in theft and tobacco and vape products are a favorite product to be stolen. We would also see more people purchasing them on the illegal black market, on the dark web or on military bases or try to make it themselves and essentially force many small local businesses who sells these items to shut down, thus leaving many of our family, friends, and neighbors out of work.

We urge you to hold this measure. Mahalo again for this opportunity to testify.

Re: Support HB2504 HD1, Relating to Tobacco Products

Hrg: Wednesday, February 28, 2024 at 10:00 AM

---

The Coalition for a Tobacco-Free Hawai'i, a program of the Hawai'i Public Health Institute,<sup>i</sup> is in **Strong Support of HB2504 HD1**, which would raise the cigarette tax and deposit that extra revenue into the Cancer Research Special Fund.

### Protects youth.

Increasing tobacco taxes are a proven way to help reduce youth use. When the price of goods increases, price-sensitive youth buy them less. Nationally, every 10% increase in cigarette prices reduces youth smoking by about 7%.<sup>ii</sup> Hawai'i raised the cigarette tax over 12 years ago in 2011, a decline in youth use followed. In 2011, 10% of youth reporting currently using cigarettes. In 2019, 5% of youth reported currently using cigarettes.<sup>iii</sup>

### A comprehensive approach is necessary.

A variety of proven policies must be enacted to address tobacco use, raising the tobacco tax is one of them. Every year, tobacco-related diseases cost Hawai'i \$611M in healthcare costs, and 1,400 adults die from smoking.<sup>iv</sup> It is only through a comprehensive approach that we can address the harms of tobacco use in our communities.

### It is time.

The cigarette tax was last raised in July 2011. Although great strides have been made in tobacco prevention and control over the past twelve years, there is still more to do. 73% of registered Hawai'i support a \$1.00 tax increase for a pack of cigarettes.<sup>v</sup> Therefore, we support a tax increase of five cents a cigarette. Increasing cigarette taxes regularly will correct for inflation and consumer purchasing power. Raising taxes is a proven strategy to reduce consumption on tobacco products. This increase helps to stop youth from using cigarettes, encourage adults to quit, and provide crucial funding for the Hawai'i Cancer Research Fund.

We applaud the Legislature for helping to strengthen the health of our state by considering this measure, and thank these committees for hearing HB2504.

We respectfully ask you to pass this measure.

Mahalo,

Peggy Mierzwa  
Director of Policy & Advocacy  
Hawai'i Public Health Institute

---

<sup>i</sup> The Coalition for a Tobacco-Free Hawai'i (Coalition) is a program of the Hawai'i Public Health Institute (HIPHI) that is dedicated to reducing tobacco use through education, policy, and advocacy. With more than two decades of history in Hawai'i, the Coalition has led several campaigns on enacting smoke-free environments, including being the first state in the nation to prohibit the sale of tobacco and electronic smoking devices to purchasers under 21 years of age.

**ACS CAN SUPPORTS HB 2504 HD1 – RELATING TO CIGARETTE TAXES.**

Cynthia Au, Government Relations Director – Hawai‘i Guam  
American Cancer Society Cancer Action Network

Thank you for the opportunity to **SUPPORT** HB 2504 HD1: Relating to Cigarette Taxes.

The American Cancer Society Cancer Action Network (ACS CAN), the nonprofit, non-partisan advocacy affiliate of the American Cancer Society advocates for public policies that reduce death and suffering from cancer. ACS CAN works with federal, state, and local government bodies to support evidence-based policy and legislative solutions designed to eliminate cancer as a major health problem.

ACS CAN supports increased funding for the University of Hawai‘i Cancer Center. This year, 8,670 people from Hawai‘i will be diagnosed with cancer. The UH Cancer Center provides important cancer research, access to life-saving treatment including clinical trials which play a critical role in reducing the cancer burden for multi-ethnic residents. Sustainability of the National Cancer Institute (NCI) designated UH Cancer Center is vital for cancer screening, prevention, treatment, and education, significantly reducing the cancer burden in Hawai‘i and the Pacific.

Should you have any questions, please do not hesitate to contact Government Relations Director Cynthia Au at [Cynthia.Au@Cancer.org](mailto:Cynthia.Au@Cancer.org) or 808.460.6109.

BILL NUMBER: HB 2504 HD 1

INTRODUCED BY: House Committees on Higher Education & Technology and Health & Homelessness

EXECUTIVE SUMMARY: Increases the cigarette tax and amends the cigarette tax disposition of revenues by allocating the increase in the cigarette tax amount to the Hawai'i cancer research special fund.

SYNOPSIS: Amends section 245-3, HRS, to raise the tobacco tax on cigarettes from 16 cents to 18 cents per cigarette on and after July 1, 2024.

Amends section 245-15, HRS, to raise the earmark on the tobacco tax per cigarette to the Hawaii cancer research special fund by 2 cents after June 30, 2024.

EFFECTIVE DATE: July 1, 3000.

STAFF COMMENTS: This is an Administration bill sponsored by the University of Hawaii and designated UOH-09 (24).

STAFF COMMENTS: The question that should be asked is what is the purpose of the tobacco tax. If the goal is to make people stop smoking by making it cost-prohibitive to smoke, then (a) it's working, as hikes in the cigarette tax have begun to exert downward pressure on collections not only locally but also nationally, but (b) it shouldn't be expected to raise revenue, because of (a). If the goal is really to stop the behavior, why are we not banning it?

As the Foundation's previous President, Lowell Kalapa, wrote in the Tax Foundation of Hawaii's weekly commentary on October 28, 2012:

Lawmakers seem to have a simplistic reaction to solving problems the solution to which plagues their constituents – tax it.

Probably the best example is what people like to call sin taxes, those excise taxes that are levied on tobacco and alcohol products. After all, smoking causes cancer and alcohol causes all sorts of problems including driving under the influence. Lawmakers and community advocates shake their heads and push for higher tax rates, arguing that making these products more expensive will deter folks from using these products.

The problem is that lawmakers also like the revenues that are generated from the sales of these products, and, in some cases, they have tried to link the use and sale of these products with noble causes such as the funding of the Cancer Research Center that is

currently being built. Again, the argument is that smokers should pay for programs and projects which seek to cure the related ill which in this case is cancer caused by smoking.

The irony is that arguments to increase the tax on tobacco and, more specifically, cigarettes, is a goal of getting smokers to quit while depending on the revenues from tobacco and cigarette taxes to fund an ongoing program, in this case the Cancer Research Center. So, which is it folks, stop smokers from smoking and if successful, there won't be any revenues to fund the Cancer Research Center?

The fact of the matter is that it appears that both locally and nationally, higher taxes on cigarettes are influencing smokers as tax collections on the sale of cigarettes have fallen. Certainly some of the decline is due to smokers actually quitting, but to some degree one has to suspect that some purchases were made via mail order from exempt Indian reservation outlets while others may be what is called gray market purchases, that is from sources outside the country.

What should come as a surprise is that most of the folks who have quit are of some means as they are more likely to recognize the health hazard caused by use of this product. That means most of those who are still smoking are among the lower-income members of our community. Thus, the tax is regressive, generating less and less collections from middle and higher-income individuals.

Kalapa, "Finding the Blame for What Ails You," at <https://www.tfhawaii.org/wordpress/-blog/2012/10/finding-the-blame-for-what-ails-you/> (Oct, 28, 2012).

As predicted, programs that have been fed by earmarks from the tobacco tax, like the Cancer Research Center, have become a victim of the success of tobacco cessation programs and publicity. Revenues produced by the tobacco tax have been in steady decline over the past few years despite tax rate increases, and hoisting the smoking age to 21 in the 2015 session certainly didn't reverse the trend.

Source: Department of Taxation Annual Report (2022-2023), page 24.

Fiscal reliance on funds from a sin tax is inadvisable, perhaps outright dangerous. If the goal is to affect social behavior, use of the tax law is not the most effective way to do so.

### **RE: HB 2504 HD1, RELATING TO CIGARETTE TAXES** **Position: Support**

Tobacco use has a profound effect on the health of everyday Americans. The life expectancy of a smoker is on average 10 years less than a non-smoker. Tobacco-related illness is responsible for nearly half a million deaths annually in the United States. One of the most effective means to reduce tobacco use is prevention. Approximately 9 out of 10 smokers begin smoking before the age of 18. In the past 10 years, the overall use of tobacco products significantly declined in the pediatric (ages 1-17) population. Unfortunately, this positive progress has been mitigated by a recent increase in use of e-cigarettes, which have become increasingly popular in middle and high school-aged children. Per the CDC, "If cigarette smoking continues at the current rate among youth in this country, 5.6 million of today's Americans younger than 18 will die early from a smoking-related illness"

Increasing taxes on cigarettes is an effective public health measure to reduce tobacco use. For every 10% increase in the price of cigarettes, there is a 7% decrease in use in people less than 18 years of age. Furthermore, studies performed on the specific impact of increased taxes on e-cigarettes have demonstrated similar results, with increasing costs of e-cigarettes being associated with reduction in use in youths. As advocates for our patients and their health and safety, the HMA stands in strong support of this evidence-based measure to reduce tobacco use.

Thank you for allowing the HMA to testify in support of this measure.

**House Committee on Finance**

To: Representative Kyle Yamashita, Chair  
Representative Lisa Kitagawa, Vice Chair

From: Ray Vara  
President & CEO

**Re: Testimony in Support of HB 2504, HD1  
Relating To Cigarette Taxes**

---

My name is Ray Vara and I am the President and CEO of Hawai'i Pacific Health. Hawai'i Pacific Health is a not-for-profit health care system comprised of its four medical centers – Kapi'olani, Pali Momi, Straub and Wilcox and over 70 locations statewide with a mission of creating a healthier Hawai'i.

**I write in support of HB 2504, HD1** which increases the cigarette tax by 2 cents and allocates the increase in the cigarette tax amount to the Hawai'i Cancer Research special fund.

The University of Hawai'i Cancer Research Center (Cancer Center) is the only institution in the Pacific that holds the prestigious National Cancer Institute (NCI) designation. The Cancer Center is one of only 72 NCI designated institutions in the US. The NCI designation gives the people of Hawai'i and the Pacific region access to innovative and potentially life-saving clinical trials without the necessity of traveling to the mainland. The Cancer Center is in a unique position to study and address the multi-ethnic causes of cancer and implement culturally tailored interventions and studies aimed at understanding and combating cancer in Hawai'i's diverse population.

The decline in cigarette tax revenue has been due to successful cessation programs in which the Cancer Center has been a collaborative partner. This underscores the need for sustained state support to continue these vital efforts. The declining revenue from the cigarette tax which has resulted from declining cigarette sales has had a negative impact on the Cancer Center's ability to maintain the cutting-edge research it is engaged in. Unless the Cancer Center can compensate for the loss of revenue and obtain the additional funds it will not be in a position to grow its research capacity, attract world-class researchers and clinical investigators, address specialized oncology practice shortages, attract partnerships for clinical trials, and support its ongoing early phase clinical trials.

The incidence of cancer is increasing significantly and could double during the next twenty years. The additional revenue generated by the modest increase in the cigarette tax will allow the Cancer Center to continue to provide innovative clinical trials to Hawai'i residents to prevent and treat cancer and to ensure the Cancer Center's long-term success in addressing cancer-related challenges for patients in Hawai'i and the Pacific region.

Thank you for the opportunity to testify.

Hearing on 2-28-24

**Testimony in Strong Opposition to House Bill 2504**

Dear House Finance Committee,

The Hawaii Smokers Alliance STRONGLY OPPOSES HB 2504 relating to extorting constituents with even higher taxes because the Cancer Research Center doesn't want to find a permanent revenue source.

Bashing us taxpayers for the deliberately unsound funding arrangement concerning the "Cancer Research Center" will show contempt to those taxpayers the legislature claims to represent.

How about instead the center gets off its' butt and seeks private contributions or gets an actual financial return from paying customers or investors on the "research" services provided? Like it or not, the Center needs to start getting new funding sources soon since it is clear that the current funding stream is not sustainable.

Respectfully request that this bill which is doomed to fail not leave the finance committee. Thank you for your time.

Sincerely,

Michael Zehner, Co-chair of the Hawaii Smokers Alliance.

**Re: HB2504 HD1 Relating to Cigarette Taxes**

**Date: February 28, 2024**

**Time: 10:00 a.m.**

**Place: Conference Room 308**

**Position: Oppose**

Good afternoon, Chairperson Kyle T. Yamashita, Vice Chair Lisa Kitagawa and members of the Committee on Finance. I am Curtis Higashiyama Employee Relations and Government Affairs Manager and I appreciate this opportunity to testify.

ABC Stores **Opposes** HB2504 HD1. Increases the cigarette tax and amends the cigarette tax disposition of revenues by allocating the increase in the cigarette tax amount to the Hawaii cancer research special fund. Effective 7/1/3000 (HD1)

Any increase in taxes on products increases cost pressures on consumers who are age eligible to make the purchase. Of concern is as this upward pressure increases so does the potential for opportunistic theft which will affect retailers and small businesses causing losses not only in product but also operational viability. Unintended consequences will also occur with the illicit trade becoming a more viable option to procuring a product that becomes cost prohibitive, thus negating the potential for increased revenues to be directed to Hawaii's cancer research.

We urge you to hold this measure. Thank you for the opportunity to testify.

Mahalo,  
Curtis Higashiyama

Comments:

I am in Strong support of HB2504, related to cigarette taxes.

Taxation is a proven strategy to help discourage youth, especially, from using tobacco products.

The additional funds collected from increasing the tax on cigarettes would then help with cancer research.

So, it's a double win!

Please support HB2504.

Mahalo,

Kristin Mills

Maui resident, parent, epidemiologist, and health educator

Aloha Rep. Yamashita Chair and Rep Kitagawa Vice Chair ,

I strongly support this bill. As a tobacco treatment specialist for the last 20 years I have seen how significant a tax increase on tobacco products can have on motivating individuals to consider making a quit attempt. The extra money out of their individual or families budget will help them to make this decision. The extra monies collected can also be used towards what is needed for the Cancer Research Fund.

Mahalo for your consideration in hearing this bill,

Valerie Smalley

Chair Rep. Yamashita and Vice Chair Kitagawa,

Thank you for your time and consideration in support of HB2504.

HB2504, raising the cigarette tax, simply put will help to discourage youth use making a positive impact on the future of our Hawai'ian Youth as well as the future of all Hawai'i.

A small measure that can have a ripple outcome for the better of all those currently at risk, as well as the known impact on those that have already seen impact and can be supported through any extra money collected supporting the Cancer Research Fund.

Thank you again for your time and support with HB2504 and the continued improvements for our Youth of Hawai'i.

Respectfully.

Re: **Support for HB 2504 HD1**, Relating to Cigarette Taxes

Hrg: Wednesday February 28, 2024 at 10:00 am via Videoconference Conference Room 308

Aloha House Committee on Finance,

As a parent, community member and healthcare professional I am writing in **strong support of HB 2504 HD1**, which increases the cigarette tax and amends the cigarette tax disposition of revenues by allocating the increase in the cigarette tax amount to the Hawaii cancer research special fund.

Raising the tobacco tax is a well-proven way to reduce both youth initiation and adult smoking, both of which have long-term health impacts in and on our community.

Allocating the increase for the Cancer Research Fund will allow much-needed cancer research in Hawai'i to continue uninterrupted.

I **strongly support HB 2504 HD1**, respectfully ask you to pass it out of committee.

Many thanks for your consideration,

Forrest Batz, PharmD  
Keaau, HI

## **HB 2504**

I am writing as a long-time pediatrician to strongly support HB 2504, which raises tobacco taxes, and directs the extra moneys collected to the Hawaii Cancer Research Special Fund. It is well researched and documented that increasing the cost of tobacco products serves a deterrent, especially for youth. Given that we have an epidemic of electronic cigarette use among Hawaii youth, this bill would discourage young people from purchasing even more expensive tobacco products. In addition, directing tobacco income to cancer research in Hawaii is a huge boon toward studies targeting tobacco-related cancers in our state. This is an excellent bill which serves two very vital functions. I strongly urge its passage.

Sincerely,  
Linda Weiner, MD  
Kauai

Comments:

Aloha I support Bill HB2504, We need to increase the Cigarette tax to discourage youth use, As well as adult use. Our economy is already struggling. We need the community members to be spending their finances on necessary needs. Increasing the tax on cigarettes will also be a great way to add extra money into the Cancer Research Fund which will help our future of our keiki that have been wrongfully targeted by Big Tobacco and their marketing scheme. Those kids who have been struggling to quit the nicotine addiction will need all the help they can get from the Cancer Research team when we find out what the long term affects really are from Electronic Cigarettes.

Bryan Mih	Individual	Support	Written Testimony Only

Comments:

Aloha,

My name is Bryan Mih and I am a parent, pediatrician, and the medical director of the Kapi'olani Smokefree Families Program. For the health of our keiki and their families, it is vitally important to support this measure, which increases the tax on cigarettes.

The American Academy of Pediatrics strongly supports regulation and taxation of tobacco and nicotine to prevent initiation of use, especially by young people. Nicotine is a highly addictive drug that impacts the adolescent brain, reducing impulse control and affecting mood. Once young people are addicted to nicotine, it is extremely difficult to quit.

Tobacco use is still the leading cause of preventable death in the United States and in Hawai`i. It costs our state over \$526 million in healthcare expenditures every year. Tobacco impacts both smokers and those exposed to secondhand smoke. Smokers can suffer from cancer, cardiovascular disease, and lung disease. Every year in Hawai`I, tobacco kills more than 1,400 adults and contributes to 21,000 premature deaths in children and youth. Many more of our keiki suffer from respiratory illnesses, asthma, and additional hospitalizations due to secondhand tobacco smoke.

Raising cigarette taxes helps discourage price-sensitive youth from starting smoking.

Please support this important measure. Mahalo for your consideration.

Sincerely,

Bryan Mih, MD MPH FAAP

Pediatrician

Medical Director, Kapi'olani Smokefree Families

HB 2504, HD 1 Relating to Cigarette Taxes  
February 28, 2024

Committee on Finance  
Chair: Rep. Yamashita  
Vice Chair: Rep. Kitagawa

**TESTIMONY IN STRONG SUPPORT OF HB 2504, HD 1  
RELATING TO CIGARETTE TAXES**

I am Julian Lipsher, testifying as a private citizen in strong support of this measure. I currently serve as chair of the Coalition For A Tobacco Free Hawaii's Policy Committee which is a part of the Hawaii Public Health Institute and formerly was with the Hawaii State Department of Health focusing on tobacco prevention and control and chronic disease prevention.

Smoking and tobacco use remains the single greatest cause of morbidity and mortality in Hawaii and in the nation.

Increasing cigarette taxes is a win-win proposition: significantly increasing cigarette taxes results in fewer kids starting to smoke, and in more adults quitting while at the same time providing substantial revenue to fund important health programs.

Increasing cigarette taxes is politically popular with both state and national polls consistently supportive of tobacco tax increases.

Taxes decrease tobacco use by raising the cost of smoking, which encourages people to quit, deters new users, and prevents relapse. In 2020 the US Surgeon General concluded that "increasing the price of cigarettes, such as through taxation, is one of the most effective strategies for reducing cigarette consumption". Further evidence suggests that younger and lower-income people are especially responsive to price increases and would see the largest potential health benefits from higher cigarette taxes.

Increasing cigarette taxes, which have not seen an increase since the early 2000's is long overdue and would be a positive step in reducing the burden of tobacco in Hawaii.

I encourage the Committee to pass this measure.

Thank you for the opportunity to testify

Comments:

Aloha,

As a pediatrician, I strongly support any measure that would reduce youth vaping. Raising taxes on tobacco products will reduce youth access to tobacco products, as they are highly price sensitive. Given the long-term harms associated with smoking, any measure to reduce youth exposure to tobacco has my strong and enthusiastic support.

Mahalo,

Maya Maxym, MD
