In consideration of
SENATE BILL 3338
RELATING TO WATER

Senate Bill 3338 proposes to establish a Water Alliance Initiative (WAI) policy coordinator and other positions within the Department of Land and Natural Resources (Department) for implementation of the Red Hill WAI Working Group's Report of November 2023, and creates the Red Hill Remediation Special Fund. **The Department of Land and Natural Resources (Department) strongly supports this measure.**

As stewards of Honolulu's sole source groundwater aquifer and Hawai'i's ecosystems, the Department recognizes the WAI's important role in ensuring that post-defueling remediation efforts restore the mauka to makai health of the aquifer. Our precious aquifer not only provides drinking water to hundreds of thousands of Honolulu residents but is also critical for the environment under the stewardship of the Department.

While the Department appreciates the intent of this bill to create the Red Hill Remediation Special Fund, the Department recommends an amendment to this bill clarifying that the cost of the actual remediation of the aquifer (i.e. pumping and treating water) should be borne by the U.S. Navy. The Department supports the use of the fund for monitoring, applied research, public outreach and education, and evaluation.

The Department further supports the creation of the three full-time positions within the Office of the Chairperson for the WAI policy coordination.

Thank you for the opportunity to testify in strong support of this measure.

RELATING TO WATER**

SENATOR LORRAINE R. INOUE, CHAIR
SENATE COMMITTEE ON WATER AND LAND

SENATOR MIKE GABBARD, CHAIR
SENATE COMMITTEE ON AGRICULTURE AND ENVIRONMENT

Hearing Date: February 5, 2024

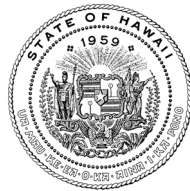

Room Number: 229

1 **Fiscal Implications:** N/A.

2 **Department Testimony:** The Department of Health (Department) supports SB3338. This bill
3 establishes a policy lead and coordinator for Red Hill Water Alliance Initiative (WAI) initiatives
4 and additional support positions in the Department of Land and Natural Resources, establishes
5 the Red Hill remediation special fund, and appropriates monies for the new positions and to the
6 special fund. The Department requests that language from the bill preamble be repeated as
7 statutory language to clarify the role of the WAI policy coordinator.

8 **Offered Amendments:** On page 6, line 2, “the State’s policy lead” should be replaced with “the
9 State’s policy lead on Red Hill WAI initiatives”.

10 Thank you for the opportunity to testify.

1:15 p.m.
Room 229 and Videoconference

RELATING TO WATER

The Department of Budget and Finance (B&F) offers comments on this bill.

Senate Bill (S.B.) No. 3338: 1) establishes the Red Hill Water Alliance Initiative (WAI) policy coordinator and two other exempt positions within the Department of Land and Natural Resources to coordinate Red Hill WAI initiatives; 2) creates the Red Hill Remediation Special Fund (RHRSF) that would generate revenues through legislative appropriations, gifts, donations, grants, and interest for remediation efforts; and 3) appropriates an unspecified sum of general funds for FY 25 for the positions and monitoring of the Red Hill Bulk Storage Facility area. No special funds are appropriated in the bill.

As a matter of general policy, B&F does not support the creation of any special fund which does not meet the requirements of Section 37-52.3, HRS. Special funds should:

1) serve a need as demonstrated by the purpose, scope of work and an explanation why the program cannot be implemented successfully under the general fund appropriation process; 2) reflect a clear nexus between the benefits sought and charges made upon the

users or beneficiaries or a clear link between the program and the sources of revenue;

3) provide an appropriate means of financing for the program or activity; and

4) demonstrate the capacity to be financially self-sustaining. Regarding S.B. No. 3338, it is difficult to determine whether the proposed RHRSF would be self-sustaining.

Thank you for your consideration of our comments.

Senate Committee on Agriculture and Environment
Monday, February 5, 2024 at 1:15 p.m.

By

Vassilis L. Syrmos, Vice President for Research and Innovation
University of Hawai'i System

SB 3338 – RELATING TO WATER

Chairs Inouye and Gabbard, Vice Chairs Elefante and Richards, and Members of the Committees:

The University of Hawai'i (UH) supports SB 3338, which seeks to establish a Red Hill Water Alliance Initiative (Red Hill WAI) policy coordinator in the Department of Land and Natural Resources (DLNR) and creates a Red Hill remediation special fund.

While the imminent threat of future leaks has been minimized through the defueling of the Red Hill Bulk Fuel Storage Facility, years of clean up, monitoring, research and policy making will be needed for remediation of the aquifer and the surrounding ecosystem. This will require proper coordination between DLNR, the Department of Health, Honolulu Board of Water Supply, U.S. Navy, Environmental Protection Agency, UH, community organizations, and other state, federal and county agencies.

The Red Hill WAI coordinator and related positions are critical to this effort and the remediation special fund will enable this group to fund necessary efforts in monitoring, research, remediation, public outreach and education, and evaluation.

Thank you for the opportunity to testify in support of this measure.

Honolulu, Hawaii 96813

The Honorable Mike Gabbard, Chair
and Members
Senate Committee on Agriculture and Environmental Protection
Hawaii State Capitol, Room 229
Honolulu, Hawaii 96813

Dear Chair Inouye, Chair Gabbard and Members:

Subject: Senate Bill 3338: Relating to Water

The Honolulu Board of Water Supply (BWS) is in strong support of Senate Bill (SB) 3338. The purpose of the bill is to create a new chapter in Hawaii Revised Statutes (HRS) to establish within the Department of Land and Natural Resources (DLNR) to serve as the State's policy lead through the position of the Red Hill Water Alliance Initiative (WAI) policy coordinator and to place the coordinator in the office of the DLNR chairperson. The WAI coordinator shall facilitate implementation, monitoring and interface with federal entities on WAI initiatives outlined in the WAI's November 2023 report among other responsibilities.

It is important that we look at establishing government structures that can help to oversee remediation in the long term as this effort can extend well into the future. This bill also establishes a special fund to be administered by the WAI coordinator and be able to receive federal funds.

The Honorable Lorraine R. Inouye, Chair
The Honorable Mike Gabbard, Chair
and Members
February 5, 2024
Page 2

Concurrently, another bill proposes to establish a Red Hill Remediation Authority board of directors that appoints the DLNR chairperson, or the chairperson's designee, and others, as a member of the board.

The proposed Red Hill Remediation Authority board of directors establishes an executive director to administer and implement, under the direction of the board of directors, all rules and directives adopted by the board to facilitate and oversee the remediation of contamination resulting from the Red Hill Bulk Fuel Storage Facility.

The WAI policy coordinator proposed in SB 3338 is required to facilitate implementation and monitoring and interface with federal entities on WAI initiatives outlined in the WAI's November 2023 report, which includes remediation of the contamination resulting from the Red Hill Fuel Facility. Here the duties of the coordinator will serve to provide a framework that gives the Red Hill Remediation Authority board of directors a clear understanding of the WAI Initiatives, its mission, expectations, objectives, and reporting requirements. We recommend the Red Hill remediation authority as the corporate body and public instrumentality of the State, once established, be the policy lead, for addressing the contamination resulting from the Red Hill Bulk Fuel Storage Facility.

Thank you for the opportunity to testify in strong support SB 3338.

Very truly yours,

A handwritten signature in blue ink, appearing to read 'Ernest Y. W. Lau', is written over a light blue horizontal line.

SIERRA CLUB OF HAWAI'I

SENATE COMMITTEE ON WATER AND LAND SENATE COMMITTEE ON AGRICULTURE AND ENVIRONMENT

February 5, 2024

1:15 PM

Conference Room 229

In SUPPORT WITH AMENDMENTS of:
SB3338: RELATING TO WATER
SB3339: RELATING TO THE RED HILL REMEDIATION AUTHORITY

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, Vice Chair Richards, and Members of the Committees,

On behalf of our 20,000 members and supporters, the Sierra Club of Hawai'i **SUPPORTS WITH AMENDMENTS** SB3338 and SB3339. The Sierra Club appreciates and supports the intent to institutionalize the Red Hill Water Alliance Initiative's (WAI's) commitment to fully remediate our 'āina and wai; however, **the lessons of the last decade demand much greater safeguards against political interference by the U.S. military and its benefactors that will otherwise frustrate these measures' goals.**

The Sierra Club commends the Red Hill WAI for its members' explicit commitment to ensuring the full remediation of our 'āina and wai from the release of up to 2 million gallons of fuel and other toxic substances from the Navy's Red Hill Bulk Fuel Underground Storage Facility. The Sierra Club also appreciates that the establishment of a governmental entity or entities, as proposed by these measures, may be necessary to track and hold the Navy accountable for cleaning up its contamination of our island, particularly in light of the reality that it will take decades for full remediation to be achieved.

However, because of this lengthy remediation timeline – which will extend well beyond the tenure and even potential lifetimes of the Red Hill WAI's members – substantial amendments to these measures will be necessary to avoid the same political pitfalls that have led to the contamination of our aquifer and the poisoning of thousands of O'ahu residents. **The Sierra Club urges the members of the Committees to reflect upon the multiple missed opportunities that arose over the last ten years, that could have prevented our current water crisis – and to recognize that the U.S. military's political influence and willingness to deceive local and national elected officials as well as the general public contributed to our government's failure to protect our island and our people, until this crisis began.**¹ Unless precautions are taken to ensure

¹ For example, the responses of multiple administrations illustrate the unwillingness or inability of local political leaders to hold the Navy accountable, almost certainly due to the military's influence. After the reported release of 27,000 gallons of fuel from the Red Hill facility in 2014, Governor Abercrombie's administration negotiated a largely toothless "Administrative Order on

SIERRA CLUB OF HAWAI'I

the political insulation of any government entity tasked with implementing the Red Hill WAI's goals over the ensuing decades, such an entity will be unable to achieve these objectives, and will fail to hold the U.S. Navy accountable to its responsibility to fully clean up its mess.

Accordingly, the Sierra Club of Hawai'i strongly urges the Committees to include the following amendments to these measures:

First, the WAI Policy Coordinator and their staff, as proposed under SB3338, should be placed under the Remediation Authority, described in SB3339. Placing the WAI Policy Coordinator under the Chair of the Department of Land and Natural Resources, as proposed under SB3338, will only subject them to the influence of the Office of the Governor, which the last decade has demonstrated is highly vulnerable to the U.S. military's political influence. **It is absolutely critical to have the Policy Coordinator and staff answer to a multi-member board, rather than a political appointee of the Governor.** Combining these two entities will also better ensure consistency and coordination in their work.

Second, the Remediation Authority should not be dominated by appointees of the Governor. As currently proposed, 5 out of 9 voting members of the Authority will be selected by the Governor, who again is highly vulnerable to the military's political influence. **A majority of voting Remediation Authority members should be selected by independent organizations that represent the Hawai'i community, which was and will continue to be a driving force for true accountability to our island, our people, and our future.** Such organizations could include organizations such as: the Honolulu Board of Water Supply, the Office of Hawaiian Affairs, the Association of Hawaiian Civic Clubs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i.

Third, the Remediation Authority should be staffed by those with skills and expertise relevant to achieving the Red Hill WAI's goals, to enable it to objectively analyze and

Consent" (AOC) that surrendered ultimate decisionmaking authority over the Navy's response to the federal government in Washington D.C. Over the next six years, Governor Ige's administration did little to hold the Navy accountable to the AOC, which still remains largely unfulfilled – frustrating our current efforts to track and contain the contamination plume in our aquifer. Governor Ige's administration further failed to uphold state law and require the U.S. Navy to apply for an underground storage tank permit, until the Sierra Club of Hawai'i sued the Department of Health twice, in 2017 and 2019. Governor Ige also failed to call for the shutdown of the Red Hill Facility even after the catastrophic 2021 release, citing his belief that the military "is a vibrant part in our economy." Current Governor Green has also repeatedly made false claims regarding the status of the Facility's defueling, praising the efforts of the U.S. Navy even as O'ahu continues to struggle with the loss of our major drinking water shaft and while hundreds of individuals, including children, continue to report ongoing medical issues and financial instability.

SIERRA CLUB OF HAWAI'I

respond to politically-driven and potentially biased actions and responses by the U.S. Navy. This could include experts in environmental remediation, public relations, federal funding pathways, and community organizing.

Finally, the Remediation Authority special fund should include provisions to support non-governmental education and organizing efforts as an essential ingredient in achieving true accountability.

Accordingly, the Sierra Club of Hawai'i respectfully but strongly urges the Committees to **PASS WITH AMENDMENTS** SB3338 and/or SB3339. Mahalo nui for the opportunity to testify.

Mahalo for your time.

TESTIMONY FROM THE DEMOCRATIC PARTY OF HAWAII

SENATE COMMITTEES ON WATER AND LAND and AGRICULTURE AND ENVIRONMENT

FEBRUARY 5, 2024

SB 3338, RELATING TO WATER

POSITION: SUPPORT

The Democratic Party of Hawaii **supports** SB 3338, relating to water. In 2022, delegates to the Democratic Party of Hawaii's State Convention adopted resolution 2022-11, demanding that the Red Hill fuel tanks and piping infrastructure be expeditiously decommissioned and that new monitoring and exploratory wells be immediately developed.

Ola i ka wai. Water is life.

The United States Navy's Red Hill Bulk Fuel Storage Facility consists of 20 steel-lined underground storage tanks that were built from 1940 to 1943, each of which can store 12.5 million gallons of fuel. In total, the Red Hill Bulk Fuel Storage Facility can store up to 250 million gallons of fuel. The tanks are located only about 100 feet above the United States Environmental Protection Agency's designated sole-source groundwater aquifer that provides drinking water to approximately 4,000 residents of the island of O'ahu.

Over the past eighty years, numerous spills have occurred at Red Hill. Most dramatically, on November 20, 2021, about 93,000 individuals served by the Navy's potable water system for Joint Base Pearl Harbor-Hickam were directly affected when the Navy's Red Hill shaft was contaminated by the release of up to

19,000 gallons of fuel, including JP-5 jet fuel, older fuels stored at the Red Hill Bulk Fuel Storage Facility, and any additives used. Over 6,000 individuals sought medical attention, and 1,000 were forced to leave their homes due to the contamination. Much of the fuel released from the Red Hill Bulk Fuel Storage Facility remains in the environment, trapped within the complex geological formations that surround the tanks. Notably, this leak also caused the restriction and diversion of Honolulu's water sources to cover losses from contaminated fuel, temporarily endangering the ability of the state and the county to perform vital public services, such as increasing the supply of affordable housing.

Subsequently, On May 9, 2023, officials from the state and City and County of Honolulu signed a unified statement on Red Hill, recognizing the stewardship responsibility to ensure that there is clean water on Oahu for future generations. The Red Hill Water Alliance Initiative (WAI), a working group, met regularly in 2023 after the signing of the unified statement, posing questions, conducting research, listening to subject-matter experts, and formulating policy recommendations to address the Red Hill contamination and prevent future leaks. The working group strived to preserve and protect public trust resources, including water resources that are essential for life to flourish in our island home.

Members of the Red Hill WAI working group focused on the remediation needs after the defueling of the tanks and removal of residual fuel and contaminants from the Red Hill Bulk Fuel Storage Facility. The working group expressed ongoing concerns about fuel contaminants already in the ground, as well as the residual supply of fuel plume in local aquifers because of the spill that occurred on November 20, 2021. The group found that there may be as many as 1,940,000 gallons of fuel constituents in the ground that have leaked or spilled over eight decades. Accordingly, the group believes that remediation is necessary for the future well-being of the aquifer to contain the risk to current and future water sources, including the Halawa Shaft, Halawa wells, and Aiea wells; the water distribution system; and local ecosystems. For the sake of the public trust and future generations of Hawai'i's people, we must adopt the recommendations of the Red Hill WAI working group and empower their important work to continue.

SB 3338 – RELATING TO WATER

SB 3339 – RELATING TO THE RED HILL REMEDIATION AUTHORITY

SUPPORT WITH AMENDMENTS

Aloha,

We, Kūpuna for the Mo'opuna, a hui of Hawaiian Homes Commission Act beneficiary kūpuna farmers from Pana'ewa, Hawai'i, **submit the following testimony in support with amendments SB 3338 and SB 3339.**

We appreciate that these measures reflect a continued commitment to pursue the full remediation of our lands and waters contaminated by the Navy's Red Hill Bulk Fuel Storage Facility. **However, it is critical that these measures be amended by:**

1) Creating a single entity to work on the implementation of the Red Hill WAI Report's goals, including through continuous public education and engagement. Creating two separate entities

with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;

2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report's vision; and

3) Ensuring that this entity is adequately insulated from the military's political influence over Hawai'i's executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our 'āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek.** Accordingly, any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our 'āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Please **PASS** these measures with critical **AMENDMENTS** listed above. Mahalo nui!

Environmental Caucus of The Democratic Party of Hawai'i

To: Senate Committee on Water and Land
Hon. Lorraine R. Inouye, Chair
Hon. Brandon J.C. Elefante, Vice Chair

Senate Committee on Agriculture and Environment
Hon. Mike Gabbard, Chair
Hon. Herbert M. "Tim" Richards, III, Vice Chair

LATE

Re: SB 3338 RELATING TO WATER
SB 3339 RELATING TO THE RED HILL REMEDIATION AUTHORITY

Hearing: Monday, February 5, 2024, 1:15 p.m., Room 229 & videoconference

Position: Supports with amendments

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards, and Members of the Committees:

The Environmental Caucus of the Democratic Party of Hawai'i (DPH) supports SB 3338 and SB 3339 with amendments. SB 3338 establishes a WAI policy coordinator and other positions within the Department of Land and Natural Resources for coordination of Red Hill WAI initiatives. It creates the Red Hill remediation special fund and appropriates funds. SB 3339 establishes the Red Hill remediation authority. It creates the Red Hill remediation special fund.

The PLATFORM OF THE DEMOCRATIC PARTY OF HAWAI'I as adopted at the 2022 State Convention on May 28, 2022, states as follows:

ENVIRONMENT AND ENERGY

Protect and preserve Hawai'i's environment and achieve energy sustainability. Advance measures to re-establish a healthy climate and environment for humans and fellow species, including actions to urgently address climate change. Work towards 100% renewable clean energy goals.

We believe that all people have the right to live in a clean, healthy and safe environment. We believe that the preservation of our natural environment and its ecological well-being is essential to ensuring a safe, healthy, bountiful life for future generations in Hawai'i. We support policies that create a more sustainable society. We support the restoration, preservation, and protection of native ecosystems. [Emphasis added.]

We believe in the resource management principles outlined in the Public Trust doctrine of the Hawai‘i State Constitution. We support policy that incorporates indigenous resource-management practices and technologies such as the Ahupua‘a System in modern urban planning and development to create an ecologically sustainable balance between the needs of the people and the rights of nature. [Emphasis added.]

We believe that a key part of a sustainable and self-sufficient future for Hawai‘i lies in achieving energy independence through a transition to clean renewable energy sources. We support policies that eliminate our dependence on fossil fuels and other dirty energy sources. We support policies that expand access to public transportation and encourage transit-oriented development and walkable communities.

Based on the DPH Platform, the Environmental Caucus appreciates that these measures reflect a continued commitment to pursue the full remediation of our lands and waters contaminated by the Navy’s Red Hill Bulk Fuel Storage Facility. However, we strongly urge you to amend these measures by:

1) Creating a single entity to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and engagement. The proposed creation of two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances throughout the Red Hill crisis;

2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision; and

3) Ensuring that this entity is adequately insulated from the military’s political influence over Hawai‘i’s executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our ‘āina and wai in the first place. It will take decades to fully remediate the contamination from the Red Hill facility, thus failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability that these measures seek.

Any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our ‘āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai‘i Water Resources Research Center, the Sierra Club of Hawai‘i, and the Environmental Caucus of the Democratic Party, and/or other appropriate entities, should be allowed to designate members of this board.

Accordingly, we urge you to **PASS** these measures with the **AMENDMENTS** listed above.

Thank you for the opportunity to testify.

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,
Please amend this bill so our land, water, and people can be healed in the present time, and protected in future times.

1-Create one single entity to implement the goals of the Red Hill WAI Report, so everyone knows the buck stops here.

2-Staff the entity with people who know about public relations, grant writing, remediation technology, and community organizing, so they can hold the Navy's feet to the fire.

3-Have a board supervising the entity, with members chosen by the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i, and other appropriate entities.

Mahalo,

Cory Harden

Comments:

Aloha e Giovanni,

Last year, Honolulu and state officials established the Red Hill Water Alliance Initiative (WAI) and released a report promising a long-term commitment to O‘ahu’s water security for generations to come.

While the report held some promise, its recipe for remediation [missed some key ingredients](#).

Now, the legislature is proposing bills that would enact parts of the WAI report. While we support efforts for long-term monitoring and environmental remediation, there are critical amendments that must be made to the WAI report bills to ensure that they truly heal our contaminated ‘āina and wai.

Four (!) WAI report bills are being heard next [Monday, February 5](#) and [Tuesday, February 6](#) in the Senate Committees on Water and Land and Agriculture and Environment and the House Committees on Water and Land and Energy and Environmental Protection. Please take a moment to submit written testimony for the bills and attend the hearing in-person or virtually to provide verbal testimony. Details and sample testimony below.

What the bills do

[HB2960/SB3338](#) establishes a WAI policy coordinator and other positions within the Department of Land and Natural Resources and appropriates money for a Red Hill remediation special fund.

[HB2961/SB3339](#) establishes a Red Hill Remediation Authority and creates the Red Hill Remediation Special Fund.

What needs improving

Overall, there is no clear affiliation between the WAI policy coordinator, responsible for policy, health studies, and public information about the WAI initiatives, and the Red Hill Remediation Authority, responsible for the implementation of the WAI report initiatives. It is also unclear why these roles are separated, which experience has shown may only lead to jurisdictional confusion and finger-pointing rather than problem-solving. There should be a single entity tasked with implementing the WAI report's goals for remediation.

Moreover, both bills ignore the political realities that gave rise to the current crisis, allowing the current and future governors to largely control whether and how the Navy will be held accountable to cleaning up its mess. As many are acutely aware, the political influence of the Navy and their contractors resulted in multiple administrations ignoring the clear and present threat the Red Hill facility posed to our island and people:

Governor Neil Abercrombie's administration negotiated a toothless "Administrative Order on Consent" with the EPA and Navy after the major 2014 spill, which remains largely unfulfilled to this day.

The Sierra Club of Hawai'i had to sue Governor David Ige's Department of Health not once, but twice, simply to have it uphold the law and require the Navy to apply for an underground storage tank permit for its Red Hill facility. Even after thousands of people were poisoned in November 2021, Governor Ige also [refused to call for the Red Hill facility to be shut down](#), stating that the military is "a vibrant part in our economy" as his only excuse.

And Governor Josh Green has not hesitated to sing the Joint Task Force's praises, announcing that they had "safely removed all the fuel" from the facility's underground storage tanks, when that was [far from the truth](#) - and when we are years away from replacing the Hālawā shaft and decades away from healing our lands, water, and poisoned residents.

Both approaches effectively give a politically beholden administration the ability to oversee the healing of our contaminated lands and waters. This will all but ensure that the Navy will be able to use its political influence to defer and delay meaningful action to uphold its remediation responsibilities in the years and decades ahead. It was ultimately the community's tireless demands that has led to the progress we have made, and any agency tasked with holding the Navy accountable must be accountable to the community.

Sample testimony for SB3338 and SB3339

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

Mahalo for the opportunity to **SUPPORT WITH AMENDMENTS** SB3338 and SB3339.

I appreciate that these measures reflect a continued commitment to pursue the full remediation of our lands and waters contaminated by the Navy's Red Hill Bulk Fuel Storage Facility. **However, I strongly urge you to amend these measures by:**

1) Creating a single entity to work on the implementation of the Red Hill WAI Report's goals, including through continuous public education and engagement. Creating two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;

2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report's vision; and

3) Ensuring that this entity is adequately insulated from the military's political influence over Hawai'i's executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our 'āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek.** Accordingly, any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our 'āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Accordingly, I respectfully but strongly urge you to **PASS** these measures with the critical **AMENDMENTS** listed above.

Mahalo nui for the opportunity to testify.

Comments:

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

I stand in support **WITH AMENDMENTS** for SB3338 and SB3339.

It is critical we ensure that steps are taken for the full remediation of our lands and waters contaminated by the Navy’s Red Hill Bulk Fuel Storage Facility. SB3338 and SB3339 is a good start in this effort. **However, I strongly urge you to amend these measures with the following recommendations:**

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and engagement. Creating two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision; and
- 3) Ensuring that this entity is adequately insulated from the military’s political influence over Hawai‘i’s executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our ‘āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek.** Any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our ‘āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai‘i Water Resources Research Center, and the Sierra Club of Hawai‘i, and/or other appropriate entities, could and should be allowed to designate members of this board.

I strongly urge you to **PASS** these measures with the critical **AMENDMENTS** listed above.

Mahalo for the opportunity to testify.

Chair Lorraine Inouye
Vice Chair Brandon Elefante

Senate Committee on Water & Land

Chair Mike Gabbard
Vice Chair Herbert “Tim” Richards, III

Senate Committee on Agriculture & Environment

Monday, February 5, 2024
1:15PM

**TESTIMONY IN SUPPORT WITH AMENDMENTS OF SB3338 RELATING TO
WATER**

Aloha Chair(s) Inouye & Gabbard, Vice Chair(s) Elefante & Richards, Members of the Senate Committee(s) on Water & Land and Agriculture & Environment,

My name is Jun Shin, and I am a concerned water drinker. I am testifying as an individual in **SUPPORT WITH AMENDMENTS** of **SB3338**, Relating to Water.

I sincerely appreciate that the legislature is working to put dedicated funding and personnel to pursue the remediation of the contaminated land and our waters, poisoned by the United States Navy. However I strongly support these following amendments to these measures:

- 1) The state needs a single entity that needs to come together to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and actual engagement. Creating two separate entities (**WAI Policy Coordinator and the Red Hill Remediation Authority**) with overlapping roles only risks jurisdictional confusion and could lead to inaction, as we have seen in other instances including throughout the Red Hill crisis;
- 2) The state needs to make sure that this entity has staff with the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision.
- 3) The state must maintain the independence of this entity from the military’s political influence over Hawai‘i’s executive and legislative branch. This influence unfortunately led to the government’s inaction that contributed to the poisoning of people as well as the land and the water. It will take a long time to fully remediate the contamination from the Red Hill Bulk Fuel

Storage Facility, and we are going to need an entity willing to fight hard, long, and smart to hold the Navy accountable. Any remediation entity formed this legislative session should be governed by a board where at least a majority of its members are from independent organizations that have a track record and vested interest in protecting and fighting for our land, our water, and our people.

Please **PASS** Senate Bill 3338 out of your committee with the critical **AMENDMENTS** listed above. We need a just recovery from the Red Hill crisis.

Mahalo for the opportunity to testify,

Jun Shin,
State House District 23 | State Senate District 12
Cell: 808-255-6663
Email: junshinbusiness729@gmail.com

I urge you to amend this measure by:

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report's goals. There is no clear affiliation between the WAI policy coordinator and the Red Hill Remediation Authority. Creating two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving.
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise to meaningfully hold the Navy accountable and realize the WAI Report's vision.
- 3) Ensuring that this entity is adequately insulated from the military's political influence over Hawai'i's executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our 'āina and wai.

Comments:

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

Mahalo for the opportunity to **SUPPORT WITH AMENDMENTS** SB3338 and SB3339.

I appreciate that these measures reflect a continued commitment to pursue the full remediation of our lands and waters contaminated by the Navy’s Red Hill Bulk Fuel Storage Facility. **However, I strongly urge you to amend these measures by:**

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and engagement. Creating two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision; and
- 3) Ensuring that this entity is adequately insulated from the military’s political influence over Hawai‘i’s executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our ‘āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek.** Accordingly, any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our ‘āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai‘i Water Resources Research Center, and the Sierra Club of Hawai‘i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Accordingly, I respectfully but strongly urge you to **PASS** these measures with the critical **AMENDMENTS** listed above.

Mahalo nui for the opportunity to testify.

Comments:

Aloha Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

Mahalo for giving me the opportunity for me to provide testimony in **SUPPORT WITH AMENDMENTS** of SB3338 and SB3339.

I am grateful to see your continued commitment to pursue the full remediation of our ‘aina and wai, which was so negligently contaminated by the Navy’s Red Hill Bulk Fuel Storage Facility. **However, I strongly urge you to amend these measures by:**

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and engagement. The proposed creation of two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision; and
- 3) Ensuring that this entity is adequately insulated from the military’s political influence over Hawai‘i’s executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our ‘āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek.** So any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our ‘āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai‘i Water Resources Research Center, and the Sierra Club of Hawai‘i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Accordingly, I respectfully but strongly urge you to **PASS** these measures with the critical **AMENDMENTS** listed above.

Mahalo for your ongoing commitment to this issue, and for the opportunity to submit this written testimony.

Susan Gorman-Chang

Comments:

TO: Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

I SUPPORT WITH AMENDMENTS SB3338 and SB3339.

I strongly urge you to **PASS** these measures with the critical **AMENDMENTS** listed below, as clean water and a safe aquifer requires clean, clear, fair and protected legislation that is fully accountable to the community.

It has now been a decade since the community, along with the Board of Water Supply and the Sierra Club of Hawaii, first demanded the Navy clean up its disastrous mess. It should not have taken this long for the Navy to begin the defueling process of the Red Hill Bulk Fuel Storage Facility and the water of 93,000 residents should have never been poisoned. But, we have come this far today due to the actions of the community, which, ultimately, paved the way for the WAI to take shape. Thus, in due respect to the community, please take the following amendments seriously, as this is about protecting our water for all residents, including you and your families, for generations and generations to come.

I strongly urge you to amend these measures by:

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report’s goals, including through continuous public education and engagement. Creating two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report’s vision; and
- 3) Ensuring that this entity is adequately insulated from the military’s political influence over Hawai‘i’s executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our ‘āina and wai. **As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these**

measures seek. Accordingly, any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our 'āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Comments:

Hello Chair Inouye, Chair Gabbard, Vice Chair Elefante, and Vice Chair Richards,

I'm writing in SUPPORT WITH AMENDMENTS SB3338 and SB3339.

I appreciate that these measures reflect a continued commitment to pursue the full remediation of our lands and waters contaminated by the Navy's Red Hill Bulk Fuel Storage Facility. However, I strongly urge you to amend these measures by:

- 1) Creating a single entity to work on the implementation of the Red Hill WAI Report's goals, including through continuous public education and engagement. The proposed creation of two separate entities with overlapping roles only risks jurisdictional confusion and could lead to finger-pointing rather than problem-solving, as we have seen in other instances including throughout the Red Hill crisis;
- 2) Appropriately staffing this entity with individuals who have the requisite relevant expertise (in public relations, grant writing, remediation technology, community organizing, etc.) to meaningfully hold the Navy accountable and realize the WAI Report's vision; and
- 3) Ensuring that this entity is adequately insulated from the military's political influence over Hawai'i's executive and legislative branches, which led to the governmental inaction that contributed to the poisoning of our 'āina and wai. As it will take decades to fully remediate the contamination from the Red Hill facility, failing to do so will inevitably allow the Navy to exert its influence to excuse its inactions and ultimately evade the accountability these measures seek. Accordingly, any remediation entity should be governed by a board where the majority of its members are appointed by appropriately independent organizations with a vested interest in the integrity of our 'āina and wai. For example, the Honolulu Board of Water Supply, the Association of Hawaiian Civic Clubs, the Office of Hawaiian Affairs, the University of Hawai'i Water Resources Research Center, and the Sierra Club of Hawai'i, and/or other appropriate entities, could and should be allowed to designate members of this board.

Accordingly, I respectfully but strongly urge you to PASS these measures with the critical AMENDMENTS listed above.

me ke aloha 'āina,

Nanea Lo
