Comments:

This is a vital and only access to East Maui. This study is needed.

Comments:

Aloha Chair and members of the committee,

As a life long traveler of the Hāna Highway and recent years I have commuted for work on this highway, it is with importance that we investigate the safety of these bridges for not only residents, suppliers and visitors. I have documented through the years of areas of concern of certain bridges have great concern. Recently it has been MM 21 West Wailuaiki. I ask member to support this Resolution SCR99

Comments: The Hāna Highway and its many antique bridges provide a lifeline to a remote community that is home to many multi generational households of indigenous Hawaiian peoples and also home to many others. This road and bridges are the only way in and out. The road is in very poor (actually horrendous) condition with some of these antique bridges being downright scary, especially when they have to be transversed during heavy rainfall and flooding streams that wash over them frequently. Also the overload of tourist traffic using this road for sightseeing without proper oversight or regulation of said traffic is extremely dangerous to the lives of all using this road. Please inspect these very old bridges! Also re pave the road and limit the overcrowding on it by tourists - just as has been done in other parts of the US that are National treasures in danger of being ruined and lost forever.

Comments:

I am in support of this bill requesting the US DOT to conduct an investigation regarding the safety of this important lifeline for the remote communities of East Maui.
