EXECUTIVE SUMMARY
REPORT ON THE ENVIRONMENTAL RESPONSE REVOLVING FUND
FOR FISCAL YEAR 2023

Chapter 128D, HRS, Environmental Response Law, and
Chapter 128E, HRS Hawaii Emergency Planning and Community Right-to-Know Act

This report, prepared by the State of Hawaii Department of Health (DOH), Environmental Health Administration (EHA), Hazard Evaluation and Emergency Response (HEER) Office, complies with the Hawaii Environmental Response Law (HERL), Chapters 128D and 128E, Hawaii Revised Statutes (HRS) requiring the DOH to report to the State Legislature on the Environmental Response Law and Hawaii Emergency Planning and Community Right to Know Act (HEPCRA).

The report presents the Fiscal Year 2023 accounting of Chapter 128D, HRS, Environmental Response Revolving Fund (ERRF) budget and expenditures for five Environmental Health Administration (EHA) programs. The report also presents an accounting of Chapter 128E, HRS, HEPCRA Tier II filing fees collected and distributed for FY2023.

The HEER Office implements the environmental site identification, assessment, and cleanup program using combined ERRF, General Fund, and federal cooperative agreement funding as the ERRF funding doesn't fully support the state's response obligation.

Revenue Sources

ERRF

Legislative changes effective July 1, 2015 focused uses of the fund on removal, remediation, and detection of oil and pollutant or contaminant releases; and removal and remediation of hazardous waste and any other solid, liquid, or gaseous substance that may harm the environment.

In accordance with HRS 128D, the ERRF may be used for the following:

(1) Removal, remediation, and detection of oil and pollutant or contaminant releases;

(2) Removal and remediation of hazardous waste and any other solid, liquid, or gaseous substance that may harm the environment; and

(3) The payment of expenditures authorized by the Director under section 128D-4, Uses of the Fund.

The ERRF receives revenue from its sources of funding in amounts that vary from year to year.

Environmental Response Tax

A primary source of funding for the ERRF is the environmental response tax (ERT). One component is a 5-cent share of a \$1.05 tax on each barrel of oil shipped into Hawaii, known as the barrel tax. Of the remaining \$1.00, the General Fund receives 60 cents and the Department of Business, Economic Development and Tourism (DBEDT), Energy Security Special Fund and the Energy Systems Development Fund, and the Hawaii Department of Agriculture (DOA), Agricultural Development and Food Security Special Fund receive 40 cents.

A second component of the ERT since 2015, is from HRS Section 243-3.5(b)(1) which levies a tax on other fossil fuels of 19-cents on each one million British thermal units (MMBtu) of fossil fuel sold by a distributor. The ERRF is allocated a 4.8 per cent share of this additional tax revenue.

ERT revenue to the ERRF in FY2023 was \$1,313,431 which includes fossil fuel collections

Investment Interest

Another source of funding for the ERRF is Interest earned by the environmental programs. The Investment Pool Account provided \$178,206.

Cost Recovery

Chapter 128D, HRS, provides legal authority to cost recover all ERRF expenses for DOH response actions. For FY 2023, the offices recovered \$1,321,618.

The HEER Office mechanisms for cost recovery require charging billable staff time and expenses to the ERRF and include following:

EXECUTIVE SUMMARY

Responsible Party Agreement: DOH recovers oversight expenses for the Honolulu Authority for Rapid Transportation, Honolulu Harbor, Hickam Community Housing, and GASCO cleanup sites in accordance with the terms of their respective Agreements for Remedial Action.

Fast Track Agreement: Parties wishing to receive expedited oversight of investigation and cleanup of low and medium priority sites have the option to enter into Fast Track Agreements, in which they pay oversight costs in return for face-to-face meetings and expedited document reviews.

Voluntary Response Program Agreement: DOH recovers oversight expenses for VRP and other cleanup sites in accordance with the terms of their respective HRS 128D Part II Voluntary Response Program Agreements for Remedial Action.

Emergency Response Action Expenditures: Money spent for responding to a chemical emergency is cost recoverable, only when expended from the ERRF. State On-Scene Coordinator's (SOSCs) personnel costs are paid from the General Fund and are not cost recoverable. Moneys expended from the ERRF for private emergency responder contractor services are cost recoverable.

Cost Recovery for the Navy Red Hill Bulk Storage Facility: Cost recovery for activities involving the Red Hill tanks is ongoing.

Fines for Violations

Another source of funding for the ERRF is fines and penalties generated by the Hazard Evaluation and Emergency Response Office (HEER), Clean Water Branch (CWB), Safe Drinking Water Branch (SDWB), Solid and Hazardous Waste Branch (SHWB), Clean Air Branch (CAB), and the Indoor and Radiological Health Branch (IRHB) deposited into the ERRF. Penalties are assessable to a Responsible Party for failure to report a release of a hazardous substance, pollutant, or contaminant, or for failure to comply with a departmental or judicial cleanup order. Fines from violations of Air Pollution Control, Water Pollution and Solid Waste regulations came to \$500,175.

Total revenue to the ERRF was \$3,518,841.

Unexpended and unencumbered funds in excess of \$1,250,000 remaining in the fund after June 30 of each

fiscal year will be transferred to the general fund. Funds expended totaled \$1,410,884.

Federal Cooperative Agreement Funding

The SRP allocation from the federal cooperative agreement funding was \$860,000 each for FFY 2022 and 2023. The smaller Preliminary Assessment/Site Investigation (PA/SI) grant which funds site discovery activities was \$275,000.

The Hawaii State Response Program (HSRP) Site Lists

This annual report presents four distinct Site Lists at the end of this document.

First, per HRS 128D, this annual report identifies Sites Eligible for Possible Remedial Action Under the Comprehensive Environmental Response Compensation and Liability Act (CERCLA).

Secondly, the *FY2023 Hawaii State Response Program (HSRP) Chemical Release Notification Log* lists 518 release notifications managed by the HEER Office State On-Scene Coordinators (SOSCs). HEER identified 310 cases directly related to petroleum releases.

Thirdly, the *Hawaii State Response Program List of Priority Sites* presents all non-military Hawaii sites identified for potential or known non-emergency response actions under HRS 128D. The list shows 1,106 active sites under direct DOH oversight in the various State programs. This includes 2 sites with known or suspected contamination that received No Further Action (NFA) determinations since the beginning of FY2023.

Finally, the *Hawaii State Response Program Defense and State Memorandum of Agreement (DSMOA) Program List of Priority Sites* presents a list of 555 military sites in Hawaii for which HEER's Site Discovery and Remediation (SDAR) section provides oversight. No sites received NFA determinations.

SDAR provides regulatory oversight of hazardous substance response actions for Department of Defense (DOD) service branches under federal CERCLA authorities and HRS 128D. Sites include numerous high priority unexploded ordnance sites (UXO), and multiple diverse military operations, including tank farms, pipelines, industrial activities and active training sites. A DOD cooperative agreement funds investigation, cleanup and DOH oversight of most military sites under EPA CERCLA authority. Investigation and cleanup of petroleum-

EXECUTIVE SUMMARY

contaminated military sites are exempt under CERCLA and are conducted under HRS 128D authority. Cleanup and DOH oversight for petroleum related activities are also covered under the cooperative funding agreements.

Where to find Additional Information

Hawaii Department of Health Website

Additional information about DOH and its environmental programs is located at: <http://health.hawaii.gov/>. Specific information on the environmental programs may be located through the 'Environmental Health' and 'Emergency Preparedness and Response' drop down menus on the front page, under Health and Safety Topics.

Information about HEER Office activities including recent events, new initiatives, public records, fact sheets and comprehensive guidance documents may also be directly accessed at: <https://health.hawaii.gov/heer/>

Modern Data Management and Hazard Tracking Tools

The HEER Office has converted many of its public records to electronic format to make them easily available to the public in accordance with Hawaii's Sunshine Law. Public access to iHEER is available at <https://eha-cloud.doh.hawaii.gov/iheer#!/home>.

Blank Page

REPORT ON CHAPTER HRS 128D, HRS, ENVIRONMENTAL RESPONSE LAW (HERL) Environmental Response Revolving Fund (ERRF) Budget Report

The Chapter 128D, HRS, Environmental Response Law (HERL) annual report to the Thirty-Second Legislature, State of Hawaii, presents an accounting of Environmental Response Revolving Fund (ERRF) revenue and monies budgeted and expended for implementing environmental protection and response plans and actions.

Budget and Expenditure

The 2023 legislature appropriated \$1,776,107 for operating expenses to the Environmental Management Division (EMD) and Hazard Evaluation and Emergency Response (HEER) Office. Four DOH environmental programs share revenue deposited to the ERRF and have access to the following appropriation amounts: The Hazard Evaluation and Emergency Response (HEER) Office receives \$1,363,895 and the Environmental Management Division, which includes the Clean Water Branch (CWB), Safe Drinking Water Branch (SDWB), and Solid and Hazardous Waste Branch (SHWB), receives \$412,212 of the total FY2023 allocation.

The state expended \$1,410,884 of the ERRF during FY23 for the four programs.

Personnel Costs

Funds expended for personnel costs totaled \$334,269.

The ERRF funds legal support from the state Department of Attorney General on a variety of regulatory oversight issues including issuing orders to noncompliant parties, negotiating agreements with Voluntary Response Program participants, providing legal guidance on program development and legislative proposals, and developing guidance for property owners on implementation of deed restrictions in accordance with Hawaii's Uniform Environmental Covenant Act.

Additional personnel expenditures include overtime for On-Scene Coordinators (OCS).

Operations

Funds expended for operational costs totaled \$1,076,615.

Operational expenses included emergency and non-emergency environmental response contractors. Funds expended for operations also include a HEER/UH MOA for Analytical Laboratory Service.

Since 1998, the HEER Office has contracted with the University of Hawaii (UH) to characterize unknown hazardous substances. The successful collaboration allows for quick identification of chemical pollutant unknowns while conducting emergency response actions. The HEER Office is currently in a five-year contract with UH, effective May 1, 2019 until April 30, 2024. In addition to analyzing unknown substances, the university laboratory staff assists in training and outreach to Fire HazMat teams throughout the State.

Also included in operational expenditures were salary and fringe benefits, travel, response training, standby and overtime pay, legal services, and some equipment.

Fees from Filing of Chemical Inventory Forms

Tier II Fees collected into the ERRF are largely distributed to the county Local Emergency Planning Committees (LEPCs) from the ERRF.

Annual de minimis Settlements

Chapter 128D, HRS, Environmental Response Law, requires that the department report annually on any de minimis settlements. During FY2023, there were no de minimis settlements.

Environmental Response Revolving Fund Revenue – FY2023

HTH 849 and HTH 840

ENVIRONMENTAL RESPONSE TAX	1,313,431
INVESTMENT POOL ACCOUNT	178,206
FEES, FILING OF CHEMICAL INVENTORY FORMS	150,353
FEES, VOLUNTARY RESPONSE ACTIONS	22,695
COST RECOVERY	1,321,618
REFUND/REIMBURSEMENT OF PRIOR PERIOD EXPENDITURES	28,162
VIOLATIONS OF AIR POLLUTION CONTROL REGULATIONS	236,530
VIOLATION OF WATER POLLUTION REGULATIONS	263,370
VIOLATION OF SOLID WASTE REGULATIONS	275
COMMUNITY NOISE CONTROL	4,200
TOTAL	<u>3,518,841</u>

Environmental Response Revolving Fund Expenditure – FY2023

HTH 849 and HTH 840

PERSONNEL	334,269
OPERATIONS	1,076,615
EQUIPMENT	-
TOTAL	<u>1,410,884</u>

THE HAZARD EVALUATION AND EMERGENCY RESPONSE OFFICE HAWAII STATE RESPONSE PROGRAM MANAGEMENT AND IMPLEMENTATION

The HEER Office Mission

The mission of the HEER Office and the Hawaii State Response Program (HSRP) is to address all aspects of releases of hazardous substances and pollutants, including oil, into the environment. HEER Office work includes preventing, planning for, and responding to hazardous substance releases, or risks of releases. HEER accomplishes this mission by responding rapidly to new spills and addressing existing contaminated sites with the highest risk to human health and the environment first, preventing contamination rather than cleaning up after the fact, and basing decisions on sound scientific principles and common sense.

The Hawaii State Response Program

ERRF funding to the Hazard Evaluation and Emergency Response (HEER) Office is used for operational costs for the office's implementing program, the HSRP. Three operating sections address important focus areas of the HSRP. They are the 1) Emergency Preparedness and Response (EP&R) Section, 2) Hazard Evaluation (HE) Section, and the 3) Site Discovery, Assessment and Remediation (SDAR) Section.

The HSRP provides for oversight of assessment and cleanup activities during hazardous substance emergencies, and on high and medium priority contaminated sites across the Hawaiian Islands. These include privately owned, municipal, and state-owned properties, and federal military sites. DOH has generally curtailed oversight of low priority sites, which pose little hazard, due to state budget constraints.

HEER staff works with property owners, the environmental community, developers, the public, and other state and federal agencies to implement solutions for eliminating risk of chemical exposure to humans and the environment. HSRP examples of work performed are as follows:

- Emergency response to releases of hazardous substances that pose an imminent danger to people or the environment.
- Non-emergency response actions on properties presumed or known to pose a risk to human health and/or the environment because of contamination with hazardous substances.
- Identification and inspection of sites storing and using hazardous chemicals on property.
- Performing ecological and human health risk assessment in the areas of toxicological assessments of chemical threats to human health.
- Establishing appropriate cleanup levels for chemical contamination.
- Assisting the public and responsible parties with access to information such as:
 - Health effects of chemicals
 - Public Record documents
 - Technical guidance and reference materials for cleaning up contaminated sites.
- Ongoing development and management of site related electronic records.
- Environmental policy, law, and rule development.

Essential Federal Funding Support to the HSRP

As a result of legislative changes made in 2015, the ERRF no longer funds core operations for the HEER Office, and the General Fund currently supports approximately 40% of the HEER Office state response program obligations. Consequently, the HEER Office relies heavily on three cooperative agreement sources of federal funding to implement the office's mission and the HSRP.

The federal funding sources are the EPA State Response Program (SRP), the EPA Preliminary Assessment/Site Inspection (PA/SI) Cooperative

Agreements, and the Department of Defense and State Memorandum of Agreement (DSMOA) Cooperative Agreement.

The Environmental Protection Agency (EPA) State Response Program (SRP) Cooperative Agreement

The HEER Office continues to receive funding from the EPA State Response Program (SRP) grant under Section 128(a) of the Small Business Liability Relief and Brownfields Revitalization Act (SBLRBRA) of 2002. This SRP grant provides crucial funds for staff salaries, capacity building, and program development activities. The SRP grant awards have been steadily declining from 2011.

Year	Cooperative Agreement	
	SRP	PA/SI
2024	\$800,000	\$245,000
2023	\$860,000	\$275,000
2022	\$860,000	\$275,000
2021	\$849,600	
2020	\$926,900	
2019	\$926,900	
2018	\$936,300	
2017	\$936,300	
2016	\$936,300	
2015	\$980,850	\$223,000
2014	\$980,850	
2013		\$275,000
2012		
2011		

EPA Preliminary Assessment/Site Inspection (PA/SI) Cooperative Agreement

The EPA Preliminary Assessment/Site Inspection Grant funds site discovery efforts combined with federal CERCLA (Superfund) evaluation of sites. HEER staff evaluates and rates sites based on PA/SI system criteria to determine their eligibility for the National Priority List. When a rated site scores too low to be eligible for the National Priority List of Sites, EPA transfers site-oversight responsibility from the EPA to the State of Hawaii.

This year, the HEER Office used the \$275,000 PA/SI grant to fund positions, conduct field-screening

activities, and fund laboratory costs to complete rapid site screenings that assess residential areas that may have been affected by historic releases of pesticides and other contaminants.

Department of Defense/State Memorandum of Agreement (DSMOA) Cooperative Agreement:

The HEER Office participates in two federal cleanup programs. The office provides oversight services to the military on sites located on federal property and managed and funded under the Department of Defense/State Memorandum of Agreement (DSMOA) Program. HEER Office also manages assessment and cleanup activities for sites delegated to the DSMOA funded Formerly Used Defense Sites (FUDS).

The federal government established the DSMOA program to cover reimbursement of costs incurred by the state in providing oversight services to the Department of Defense (DOD) installations conducting environmental cleanup activities funded under the Defense Environmental Restoration Program (DERP). DSMOA funds are given to the state based on the state’s request for advanced or reimbursement payment. The DSMOA Cooperative Agreement funds all staff positions overseeing remedial investigations and cleanups under these two DOD programs.

For FY2023, the state’s reimbursement under DSMOA was \$317,833.

Modern Data Management and Hazard Tracking Tools

Residual contamination exists at hundreds of sites in Hawaii. Identifying these sites to ensure that unhealthy exposures are not occurring is a shared responsibility of the HEER Office and the affected property owners. The HEER Office has converted many of its public records to electronic format to make them easily available to the public in accordance with Hawaii’s Sunshine Law. Public access to iHEER is available at <https://eha-cloud.doh.hawaii.gov/iheer#!/home>

REPORT ON CHAPTER 128E, HRS, HAWAII EMERGENCY PLANNING AND COMMUNITY RIGHT-TO-KNOW ACT (HEPCRA)

Environmental Response Revolving Fund (ERRF) HEP CRA Budget Report

In compliance with Chapter 128E, HRS, Hawaii Emergency Planning and Community Right-to-Know Act (HEPCRA), this annual report to the Thirty-Second Legislature, State of Hawaii, 2024 presents the accounting of Tier II fee amounts as follows:

- Amount collected during Fiscal Year 2023
- Amounts distributed during Fiscal Year 2023
- Projected collection for Fiscal Year 2024

HEPCRA Facility Reporting and Fees

HEPCRA facilities are those that store, use, or manufacture above defined thresholds, any hazardous substance, or extremely hazardous substance. An owner or operator of a HEP CRA facility must file notification of such “Tier II” activity and pay a \$200 filing fee annually. HEER Office staff assesses each submitted Tier II report,

records the HEP CRA facility data into the EPA Tier II Submit database and processes the fees for deposit to the Environmental Response Revolving Fund (ERRF).

DOH distributed the deposited Tier II filing fees to the Hawaii State Emergency Response Commission (HSERC) and the Local Emergency Planning Committees (LEPCs) for operating expenditures. The annual amounts distributed to the LEPCs are based on Tier II fees collected from two fiscal years prior and after HSERC operating expenditures have been deducted.

As of June 30, 2023, there are 886 qualifying Tier II facilities. Military facilities must submit Tier II information but are exempt from filing fees.

The HSERC, LEPCs, and HEER Office are continuing efforts to identify and contact possible non-reporting facilities through community outreach and facility inspections.

Tier II Filing Fees Collected and Distributed – FY2023

FY 2023 Amount Collected	\$149,653
FY 2023 Amount Distributed (FY 2021 Collected Fees)	\$193,311
FY 2024 Projection of Fees to be Collected	\$162,600

County	Funds Distributed to LEPCs	Number of Qualifying Facilities		Total Facilities
		Non-Military Facilities	Military Facilities	
Honolulu	68,158.42	385	28	413
Hawaii	40,895.05	225	4	229
Maui	27,263.37	152	4	156
Kauai	15,146.31	83	5	88
Total	151,463.15	845	41	886

HEER Office Emergency Preparedness and Response Key Actions

The Emergency Preparedness and Response (EP&R) Section of the HEER Office is the State’s lead on environmental emergencies, responding to releases or threats of releases of hazardous substances which include oil and/or chemicals on land or in water. The EP&R Section includes highly trained State On-Scene Coordinators (SOSCs) who provide 24/7 response capabilities and are authorized to take emergency actions to protect public health and the environment.

Deemed essential workers, the SOSCs continue to prepare for and respond to releases and recognize that responder safety is of utmost priority. The SOSCs knew that protecting themselves have a direct impact on how well they can respond to protect public and the environment. As the COVID-19 pandemic continued, the SOSCs were very cognizant how different variants of the coronavirus are evolving. Therefore, SOSCs were very diligent in donning personal protective equipment, maintaining physical distancing, and abiding by Centers for Disease Control and Prevention guidelines.

In FY2023 HEER’s SOSCs managed 518 release notifications and performed direct oversight on 384 of those cases. **Emergency Response Action Expenditures:** Money spent for responding to a chemical emergency is cost recoverable, only when expended from the ERRF. State On-Scene Coordinator’s (SOSCs) personnel costs are paid from the General Fund and are not cost recoverable. Moneys expended from the ERRF for private emergency responder contractor services are cost recoverable.

Notable cases of FY2023 include the following:

Case No. 20220902-1700

Faulty International Standard Organization (ISO) Tank containing Asphalt Release

On September 2, 2022, Young Brothers reported that an ISO tank with a faulty valve, designated as not to be used, was inadvertently used by Maui Pavement to fill asphalt to transport from Honolulu to Kauai. Hardened asphalt on the bottom of the tank melted when hot asphalt was placed in the tank, releasing approximately 3500 gallons at the baseyard of Young Brothers. Pilings were placed as barriers to protect the storm drain and pig mats, absorbent booms and pads placed on the asphalt. As the asphalt cooled and congealed, the clean-up crew were able to use bobcats to scoop it up. There was no impact to water.

Contained area using all spill response equipment to protect the trench and drain.

Case No. 20220921-0944

Compressed Gas Cylinders Abandoned on Kunia Road

On the morning of September 21, 2022, the Honolulu Fire Department (HFD) responded to a car fire along Kunia Road, a State Department of Transportation, Highway Division (DOT-Highway) owned road. After the car fire was extinguished the fire crews noticed 20 unknown compressed gas cylinders had been illegally dumped in the same area. The HEER Office and HFD Hazardous Material (HazMat) team were called to investigate. None of the cylinders were found leaking. The State DOT-Highway was notified of the situation and the DOT hired their contactors to pick up and dispose of the cylinders.

Case No. 20221027-1729
Low Sulfur Fuel Oil (LSFO) Release

On October 27, 2022, at approximately 5:00 pm, personnel at the Par Hawaii East refinery discovered low sulfur fuel oil (LSFO) pooling in the berm area at their Fuel Treatment Plant Area. An estimated total of 14,952 gallons (356 barrels) of LSFO was released from a pump. Approximately 1,298 cubic feet of LSFO and oil-impacted soil were collected in three roll-offs and 47 x 55-gallon drums for disposal offsite.

Photo Credit: Par Hawaii 2022

Case No. 20221110-1507

Used Oil Spill from Tote, 915 Mapunapuna Street

On November 10, 2022, the Honolulu Fire Department requested HEER's assistance upon receiving a call of an abandoned tote of oil that was leaking in the Mapunapuna area. HEER personnel arrived on-scene and helped with the coordination of various agencies such as the Honolulu Storm Water Quality Division, the Honolulu Police Department, and the Honolulu Motor Vehicle Control Branch, to remove the tote, oil, and trailer. The oil on the street was cleaned up with absorbents and a vacuum truck was used to remove the oil from the leaking tote.

Case No. 20221127-2335

Mauna Loa Northeast Rift Zone Eruption

Mauna Loa, the largest active volcano in the world, commenced erupting on November 27, 2022, after its last eruption nearly 40 years ago. HEER coordinated with the Department of Health’s Clean Air Branch to conduct air monitoring. Mauna Loa covers half of the island of Hawaii; eruption ended on December 10, 2022.

Photo Credit: West Hawaii Today, 2022

Case No. 20221129-1438

Navy Red Hill Aqueous Film Forming Foam (AFFF) Release

On November 29, 2022, HEER received a call from the Navy that approximately 1100 gallons of AFFF concentrate was released in the Adit 6 tunnel of the Red Hill Bulk Fuel Storage Facility and to the environment. AFFF, contain per- and polyfluoroalkyl substances (PFAS), man-made chemicals used in many industries such as firefighting. Information about the adverse health effects from PFAS is still being gathered; high exposure can cause reproductive, developmental, liver and kidney problems in laboratory animals. Excavation of asphalt, soil, and concrete were done. Further clean-up, if any, will be assessed once closure of Red Hill commences under the oversight of the Site Discovery, Assessment, and Remediation Section.

Case No. 20221207-1343
Emulsified Asphalt Spill on H1

On the evening of December 6, 2022, State Department of Transportation’s Highways Division (DOT-HWY) contractors were resurfacing H1 freeway near the Vineyard Boulevard overpass when heavy rains suddenly occurred and began washing emulsified asphalt into multiple storm drains. The HEER Office was notified of the spill the following afternoon and began coordinating with the DOT-HWY and the City and County of Honolulu’s Storm Water Quality (SWQ) Division to assess the extent of impact to each of their separate municipal storm drain system and inspect any potential outfalls. DOT-HWY contractors determined that the spilled asphalt had dried overnight and adhered to the storm water piping, while SWQ inspectors confirmed that the City and County’s storm water system was not impacted by the release.

Case No. 20230130-1520

USAF Maui Space Surveillance Complex Diesel Release

On January 30, 2023, a release from a diesel generator at the Maui Space Surveillance Complex atop was discovered. The generator had overflowed at night and released an estimated 700 gallons of diesel. Due to Haleakala’s sensitive environment and cultural significance, several experts were brought in by the US Air Force and US Space Force to develop a plan to best mitigate the diesel with minimal impact to the site. HEER made several visits to the site and participated in regular meetings with the responsible parties’ staff to make sure that progress continued to mitigate the release while keeping safety, environmental impacts, and cultural awareness in the forefront of the project. Once the time-sensitive removal actions were completed, the clean-up transitioned to long term remediation.

HEER Guidance and Training

The HEER Office routinely provides training opportunities to emergency response personnel from the counties and State and Federal agencies.

Notable HEER Office training conducted during FY2023 include the following:

Lithium-Ion Battery Emergency Preparedness and Response Training and Tabletop Chemical Safety Days

The United States Environmental Protection Agency (USEPA), State of Hawaii Department of Health (DOH) Hazard Evaluation and Emergency Response Office (HEER), United States Department of Transportation (USDOT) Pipeline and Hazardous Materials Safety Administration (PHMSA), industry, first responders, and other interested constituencies partnered to provide Lithium-Ion Battery Emergency Preparedness and Response training, as well as a tabletop exercise based on a Lithium-Ion Battery Energy Storage System (BESS) incident scenario. Held on all four counties: Kauai (June 13); Oahu (June 15); Maui (June 19); HI (Kona) June 21; HI Hilo (June 22), the training provided facilities and first responders to evaluate their emergency response practices.

Battery Energy Storage System, Kailua-Kona, Hawaii

Hazard Evaluation Actions and Studies

Health Impacts of the November 2021 Petroleum Contamination of the Joint Base Pearl Harbor Hickam Water System

Working to Understand the Human Health Impacts of JP-5 Jet Fuel Contamination on People Served by the Joint Base Pearl Harbor Hickam Water System

The November 2021 release of jet fuel from the Red Hill Bulk Fuel Storage Facility and the subsequent contamination of the drinking water system was a massive environmental catastrophe that sickened thousands of people. The event was unprecedented, with no historical or experimental models available that predict health effects from drinking water contaminated with JP-5 jet fuel. Given the lack of available information, it became necessary to further investigate possible health impacts, as well as provide health information and guidance to the public, health care providers, and the community. HEER staff worked extensively on this aspect of the emergency response to this contamination event spearheading efforts that included:

- Partnering with CDC's Agency for Toxic Substance and Disease Registry (ATSDR) to perform 2 Assessment of Chemical Exposure (ACE) Health Impact Surveys to evaluate the experiences of people exposed to the contaminated water.
 - The first ACE survey was conducted in January and February 2022 and had 2289 participants. 87% of participants reported health symptoms from the incident with 80% of those having improvement when they switched to an alternative water source. The survey demonstrated people were having significant health symptoms as well as significant life disruptions from the event and mistrust of responding agencies. A summary of the initial ACE survey results can be found [here](#).
 - The Follow-up Ace survey was conducted in September 2022 and was designed to evaluate ongoing health symptoms and people's attitudes towards their drinking water. The follow-up survey had 986 participants. Of the respondents, 80% reported on going health symptoms with 65% of those expressing high or very high confidence that their symptoms were related to the contaminated water incident. Participants also expressed significant mental health impacts from the event and concern and frustration with communication, transparency and trust. Further data analysis is ongoing, but a summary of preliminary results from the follow-up ACE survey can be found [here](#).
- Creation and dissemination of outreach materials to assist affected persons and health care providers in understanding the potential health impacts from exposure to JP-5 jet fuel in drinking water. HEER staff developed guidance for medical providers as well as public fact sheets on these topics. Information was shared via traditional media, DOH's medical advisory program, social media and by posting on DOH's website. Examples of these materials can be found on the [DOH Red Hill website](#) by clicking on the "Show Resources" button at the bottom.
- Extensive research and risk assessment work to develop an Environmental Action Level (EAL) for the release of fresh JP-5 jet fuel in drinking water. This effort, led by HEER staff, required complex risk assessment work and calculations to account for the specific chemical properties of JP-5 and the freshness of the fuel. Risk Assessments of this type generally take months to years to complete but was accomplished by the HEER Office in a few weeks due to the emergency nature of the problem. A technical memo describing the process can be found [here](#).
- Continued efforts to urge the Department of Defense, the Defense Health Agency and the US Navy to apply their extensive resources to further caring for people affected by the water contamination. With its partners at CDC/ATSDR, HEER has been instrumental in convincing the Department of Defense and Defense Health Agency to establish a Red Hill Water Clinic to centralize evaluation and treatment of on-

going health concerns. In addition, HEER and CDC/ATSDR staff continue to urge DOD and DHA to establish a third-party health registry that would follow exposed persons for years to evaluate health impacts.

Evaluating Infrastructure and Health Risks of Lead in Drinking Water at Hawaii Schools and Child Care Facilities

Hawaii Water Infrastructure Improvements for the Nation (WIIN) Section 2107 Drinking Water Project

WIIN 2107 is a federal grant for testing drinking water for lead contamination at schools and childcare centers. Working in close collaboration with DOH's Safe Drinking Water Branch (SDWB), State Laboratories Division (SLD), and Children with Special Health Needs Branch (CSHNB), plus the Hawaii Department of Education (DOE), and the Hawaii Department of Human Services (DHS), HEER completed Stage 1 of this extensive project in 2021, testing for lead in drinking water from 6,210 taps at 106 elementary schools and 117 child care facilities.

Stage 2 of the WIIN project, which included testing 4,459 samples at the remaining 72 DOE elementary schools completed in October 2022. Overall project results found elevated levels of lead in the drinking water at 3.7% of the elementary school taps and 1.6% of the child care taps. In total, 133 elementary schools and 4 child care facilities had at least one tap above the project action level for lead of 15 parts per billion (ppb). HEER created and helped distribute educational and communication materials for the staff, students, and families at the schools and childcare centers as well as a public website (<https://health.hawaii.gov/WIIN>) that displayed results in near real time and provides information on the project and resources for reducing lead exposure from drinking water. HEER continues to work with DOE and DHS to prevent exposure from lead in the drinking water at their facilities and develop long-term solutions to these infrastructure problems in an effort to maintain a safe and healthy environmental for kids to learn and grow. In October 2022, HEER staff, in partnership with DOH's SDWB and Hawaii DOE were awarded a \$2 million competitive grant from EPA to replace problematic drinking water fixtures at schools. This grant award will close the circle of this important project that investigated and identified lead hazards in drinking water at schools and will now repair the infrastructure to fix this problem.

Work on the fixture replacement and verification testing commenced in early 2023. So far, 454 fixtures have been replaced out of the 1492 that were identified as lead hazards. 440 of the replaced fixtures have undergone verification testing and 261 have been released for unrestricted use. The remaining fixtures that have yet to be replaced or undergo verification testing are in the process of being scheduled. In June 2023, HEER staff, in partnership with DOE began working with informatics and software development firm Axiom Data Science to create a fixture replacement website where the public can track the progress and status of replacements. The fixture replacement website development is in progress and will be linked from HEER's already existing WIIN website.

Ecological and Human Health Risk Key Studies

The HEER Office Hazard Evaluation (HE) Section provides ecological and human health risk assessment, conducts toxicological assessments of chemical threats to human health, establishes appropriate cleanup levels for chemical contamination, and assists the public with information concerning the health effects of chemicals.

Evaluating Perfluoroalkyl Substance (PFAS) Contamination in Hawaii and Potential Risks to Human Health and the Environment

PFASs are a large class of chemicals used in many materials for their waterproofing qualities. Traditional sources of PFAS include aqueous firefighting foam (AFFF) used frequently at airports and military bases, waterproof and stain resistant consumer goods, food packaging, and a variety of industrial processes. Because of their many uses and their persistence in the environment, PFASs are known to accumulate in treated wastewater, biosolids from wastewater treatment and at landfills. Currently, little is known about the burden of PFAS contamination in Hawaii. In FY2022, HEER worked on multiple projects to help further assess the burden of PFAS contamination in Hawaii and its potential risks to Human Health the environment. Information about PFASs and on-going HEER projects can be found on the HEER website: <https://health.hawaii.gov/heer/environmental-health/highlighted-projects/pfas/>.

Current projects include:

- Evaluating PFAS contamination in treated wastewater and biosolids, landfill leachate, and soils where treated wastewater is reused. This project was funded by the EPA in FY2020 and is designed to better understand the degrees of PFAS contamination in treated wastewater that is reused or discharged to the ocean as well as in biosolids and landfill leachate. Samples for this project have been collected from wastewater treatment plants and landfills from Kauai, Maui and Hawaii Counties with plans for the collection of samples from Honolulu County wastewater treatment plants and landfills as well as from Army and Navy locations on Oahu. Results from this project will help HEER better understand how these chemicals are moving through the environment and evaluate potential human exposures to PFASs and begin to develop ways to limit these chemicals in the environment.
- HEER staff led by Dr. Roger Brewer, utilized the latest scientific information to develop Environmental Action Levels (EALs) for 18 PFASs in soil and groundwater. The EALs have undergone extensive public review and final interim EALS were published in December 2020 with the latest update in April 2023. These EALs are the most comprehensive set of risk-based, soil and groundwater action levels for PFASs in the US and continue to be reevaluated by HEER staff.
- HEER staff has begun the early planning work for a project evaluating PFASs in compost when compostable food ware is included in the substrate for the compost. This project will also evaluate the amount of PFAS taken up into plants when this compost is used as a soil amendment.

Evaluating the Risks of Climate Change on Sites with Chemical Contamination

The HEER Office continues its work evaluating the risks of climate change on sites with known chemical contamination in Hawaii. Hawaii has around 1,000 sites with known chemical contamination that are monitored and regulated by the Department of Health's Hazard Evaluation and Emergency Response (HEER) Office. Many of the contaminated sites are in low lying areas and along shorelines and are at risk for coastal erosion, as well as submersion and impacts from flooding, groundwater inundation and sea level rise.

While hazards from contamination may be mitigated by removal, treatment or destruction of contaminated media, the most commonly used remedial option across the islands is to prevent exposure by managing contaminated materials in place. This is often done through a combination of physical containment, including protective caps or treatment, and institutional controls such as guidance or restrictions against reuse of sites for residential housing, playgrounds and schools. However, the use of these strategies has historically been viewed in the context of a static environment. The increasing impacts from climate change and sea level rise including more frequent flooding, accelerated erosion and related disruption of contaminated lands due to sea level rise, ground water inundation and an increase in storms and heavy rain events require an equal progression in the manner in which risk is evaluated and mitigated for these types of sites. Of particular concern are large, current or former industrial sites in coastal areas that are known to be heavily contaminated and are at high risk of climate change-related impacts. This includes many harbors, airports, bulk fuel terminals, and former landfills in the islands.

Specific concerns related to these contaminated areas result from the chemical changes induced by sea level rise, effects of barometric pressure changes and increased precipitation (e.g., storms), groundwater inundation and increased flooding. Risks to human health and the environment can increase significantly when these contaminants are moved from their current location to areas that did not previously contain contamination. This includes the possible release of contaminants into drinking water sources and the food chain via fish and shellfish. The HEER office published a memo outlining these hazards and specific risks in Hawaii in June 2021. The memo can be viewed on HEER's Climate and Health website at <https://health.hawaii.gov/heer/climate-and-health/>. HEER plans to expand work in this area by defining guidance for environmental clean-ups in climate change impacted areas and continuing research and modeling into the potential hazards.

Assessing the Chemistry and Toxicity of Groundwater Contaminated with Petroleum Fuels

The HEER Office is near completion of a study of the chemistry and toxicity of drinking water contaminated with petroleum fuels. The results of the study will be used to update HDOH action levels. The results of the study will be used to update Hawaii's existing guidance and better assess the health risk posed by petroleum-contaminated groundwater in Hawai'i, including impacts to groundwater beneath the Navy's Red Hill Tank Farm complex. The study, the most detailed of its kind carried out in the US, is being overseen by Dr Roger Brewer and funded through grants to the HEER Office from the USEPA.

Health Advisories for Kilauea Eruptions and Evaluating Public Health Effects from the 2018 Kilauea East Rift Zone Eruption

HEER continues to provide technical support and public outreach regarding volcanic emissions and resulting air quality hazards. HEER staff actively participates in the Inter-Agency Vog Network and collaborates with other Branches within DOH to issue health advisories on protecting oneself from hazards related to volcanic gases and vog.

The HEER Office and the Emergency Medical Services and Injury Prevention Systems Branch (EMSIPSB) have partnered with the University of Hawaii, Manoa Department of Atmospheric Sciences on a project to develop a real-time public messaging service about vog based on forecasts from the established Vog Measurement and Prediction Project (VMAP). The new public messaging service called the Vog and Laze Exposure (VALE) Critical Warning System, is designed to provide real-time alerts to residents in areas where poor air quality from volcanic emissions is predicted within a short time frame. This warning system will allow residents to make health protective choices during periods of rapidly changing conditions. The VMAP vog model has recently undergone a significant upgrade with a public facing webpage (<http://mkwc.ifa.hawaii.edu/vmap/new/>) to disseminate information.

Health Surveillance for Environmental Factors

In FY2022, staff provided risk assessment support and responded to a diversity of inquiries concerning potential health hazards. These inquiries included questions regarding heavy metals (mercury, lead, and arsenic), pesticides, indoor and outdoor air pollutants, drinking water contamination and illnesses potentially related to the environment. Inquiries come from the public, the media and the medical community. In FY2022, HEER responded to over 70 direct individual inquiries related to environmental health concerns.

The Hawaii Childhood Lead Poisoning Prevention Program (HI-CLPPP)

In October 2017, CDC funding revitalized the Hawaii Childhood Lead Poisoning Prevention Program (HI-CLPPP) as a joint program of the HEER office and the Children with Special Health Needs Branch (CSHNB). In FY2022, this funding was renewed for an additional 5 years. HEER hosts a full-time epidemiology specialist for childhood lead activities and provides medical direction and technical assistance from the HEER Toxicologist. Together, the HI-CLPPP team is working to reduce children's exposure to lead by primary prevention outreach and education, improving blood lead level surveillance, advocating for increased blood lead testing, case management, guidelines for health care professionals, lead poisoning education, and linking families to needed services.

HEER and HI-CLPPP have continued to expand their Residential Lead Investigation program which offers free residential lead inspections to families of children with elevated blood lead levels. HEER staff who are Hawaii certified lead risk assessors, have performed over 39 residential lead inspections, helping more than 53 children and their families identify and eliminate home based lead sources.

In October 2021, the CDC revised its reference value for children's blood lead level lowering it from 5 µg/dL to 3.5 µg/dL reflecting the growing understanding that even small amounts of lead are detrimental to children's health

and development. HEER and HI-CLPPP have adapted to this new reference level and are now providing public health services to all families of children with blood lead levels above 3.5 µg/dL.

For calendar year 2022, 14,999 children (≤ 6 years old) were tested for blood lead levels. 197 children had an elevated blood lead level between 3.5-9 µg/dL. Another 31 children had an elevated lead level of ≥ 10 µg/dL. Addresses of children with elevated lead levels have been provided to HUD funded programs in the City and County of Honolulu and the neighbor islands to ensure that landlords receiving state or federal rental subsidies comply with lead-based paint requirements.

It remains an on-going concern for HI-CLPPP that less than 30% of Hawaii's keiki are tested for lead. This low testing rate combined with lead poisoning's initially silent nature ensures that many children with lead poisoning are unrecognized and not receiving the services they require to minimize the devastating neurodevelopmental effects of lead poisoning. HI-CLPPP continues to work to raise awareness about childhood lead poisoning and to work with providers and families to increase blood lead testing rates.

Environmentally Related Illness and Injury Reporting and Surveillance (Pesticides and Heavy Metals)

Under the authority of Section 321-311, HRS, Environmentally Related Illness and Injury Surveillance, the HEER Office is required to collect information on Pesticide and Heavy Metal Poisoning. Maven, the electronic surveillance database, receives these results automatically using electronic laboratory reporting (ELR). Using the lab results in Maven, HEER is able to track children and adults with elevated levels of heavy metals including lead, arsenic, cadmium, mercury, and zinc, as well as abnormal markers of pesticide exposure. Tracking these cases allows HEER to analyze the data for geographic and demographic trends and provide individual case management support to doctors and families. HEER staff continues to work with Information Technology Specialists in other sections of DOH to maximize the functionality and efficiency of the Maven system.

The Hawaii State Legislature authorized a new Epidemiology position by Act 49, SLH 2017. The Epidemiologist II was just established in November 2022 and will develop, lead, and conduct epidemiological investigations to identify and investigate environmental health concerns by collecting, analyzing, interpreting, and reporting available health data to evaluate whether public health is being harmed. This epidemiology work will focus on environmental pollutants with an emphasis on assessing disproportionate impacts on vulnerable communities. The HEER Office is awaiting final approvals to recruit this position.

Collaborations on Public Health Education and Outreach

Technical and Risk Communication Assistance to the Department of Education (DOE) on environmental health issues including heavy metal contamination of soils, lead-based paint, mold exposures, drinking water contaminants and safe disinfection practices in the era of COVID-19.

Hawaii Poison Center (HPC) The HPC operates a 24/7 hotline to assist residents and health care providers. DOH receives data from the HPC on the number and types of acute pesticide poisonings. The HPC is mandated by legislation and is under the auspices of the Hawaii State Emergency Medical Services and Injury Prevention System Branch. Annually, the center receives over 9,000 information and poisoning exposure calls from residents and health care providers throughout the state. Services are provided free of charge every day of the year, 24 hours a day by registered nurse specialists, pharmacists, and physicians specially trained in medical toxicology. The center is operated by the Rocky Mountain Poison Center, Denver, Colorado, an accredited regional poison center by the American Association of Poison Control Centers (AAPCC). The HPC provides 24/7 medical advice for management of suspected pesticide exposures and informs DOH on behalf of the providers. This system provides an enhanced and streamlined communication option for the providers. HEER Toxicologist, Dr. Diana Felton continues to work with the HPC on industrial, occupational, and environmental poisonings providing local technical support and collaboration.

EPA's Children's Health Protection Advisory Committee (CHPAC) HEER Toxicologist, Dr. Diana Felton continues to serve on EPA's Children's Health Protection Advisory Committee (CHPAC). The CHPAC is made up of 25 members including researchers, academicians, health care providers, environmentalists, state and tribal government employees, and members of the public who advise EPA on regulations, research, and communications related to children's health. Recent CHPAC topics have included environmental health and safety at schools, take home pesticides exposure, and EPA's America's Children and the Environment data resource. Dr. Felton's participation in the CHPAC ensures that Hawaii's children's environmental health priorities are represented to the EPA on a national level.

HEER Guidance and Training

Technical Guidance Manual (TGM) The HEER office updated the primary guidance used to assess health and environmental risk posed by contamination of soil, air and water. The document includes "Environmental Action Levels" (EALs) for over 200 chemicals commonly found at contaminated industrial, residential and agricultural properties. Additional investigation is normally required when concentration of a chemical in soil, water or air exceeds the EAL. Areas of the TGM updated in 2021 include the sections on Decision Unit characterization for sampling and methods for sampling groundwater and surface water. In addition, the entire TGM was moved from an external server managed by a consultant to HEER's internal server, allowing for greater control and more frequent updating of the guidance. Chapters 3, 4 and 5 were updated and consolidated into two titled SECTION 3 SITE INVESTIGATION DESIGN AND IMPLEMENTATION: OVERVIEW and SECTION 4 SITE INVESTIGATION DESIGN AND IMPLEMENTATION: APPENDICES.

Chinese Academy of Sciences Dr. Roger Brewer, a toxicologist and environmental scientist with the HEER Office continues his collaboration with the Chinese Academy of Sciences. Dr. Brewer has provided expertise and training related to Hawaii's Technical Guidance for the investigation of environmental contamination, including the translation of Hawaii's Technical Guidance into Chinese and expansion of the guidance to assist in the cleanup of heavily contaminated, industrial sites in China. Lessons learned from this collaborative work with environmental experts in China will be used to update and expand HEER Office guidance documents. The English translation of the Hawaii-China guidance has been proposed for publication as an international standard and is expected to be completed in 2022.

Site Discovery, Assessment, and Remediation Cleanup Highlights

Continued Redevelopment of Contaminated Properties

For FY2023, the HEER Office performed its primary mission of discovery and oversight of assessment and cleanup activities on sites across the state, including privately owned, municipal, and state-owned properties and, federal military sites. New project managers have been trained and mentored to address the various site work required.

Sites Evaluated for Removal and Remedial Actions

Property owners, responsible parties, and prospective purchasers contact the HEER Office to report releases of hazardous substances, pollutants or contaminants as required by HRS 128D and to assess and manage hazardous substances, pollutants or contamination affecting properties in which they have an interest.

Our general state and federally funded remedial project managers (RPMs) evaluate information provided, review determinations of the nature and extent of contamination and, if necessary, require removal or remedial actions to be taken to protect human health and the environment.

To date, 1924 state sites have been identified and investigated by the section plus 92 consultations, 46 admin sites to track multiple interests, 25 RCRA lead sites. 783 sites received No Further Action (NFA) determinations. 410 sites received an NFA with Institutional Controls (NFAIC) with long term management with restrictions in place to protect human health and the environment. 373 sites received NFAs having been addressed with no ongoing oversight requirements.

During FY2023, 57 new state sites were added with 8 active site discovery. Two sites were given a no further action letter, including one site which requires ongoing institutional controls to manage residual risks. At the end of FY 2023, 1106 state sites remain open under active oversight and are being remediated or assessed for future action.

SDAR provides regulatory oversight of hazardous substance response actions for Department of Defense (DOD) service branches under federal CERCLA authorities and HRS 128D. Sites include numerous high priority unexploded ordnance sites (UXO), and multiple diverse military operations, including tank farms, pipelines, industrial activities and active training sites. A DOD cooperative agreement funds DOH oversight of most military sites under EPA CERCLA authority. Investigation and cleanup of petroleum contaminated military sites are exempt under CERCLA and are conducted under HRS 128D authority. Cleanup and DOH oversight for petroleum related activities are also covered under the cooperative funding agreements.

To date, 1102 military sites have been identified and investigated by the SDAR section under the Hawaii State Response Program Defense and State Memorandum of Agreement (DSMOA) Program. 547 sites received NFA determinations. Of these, 395 have Institutional Controls in place to protect human health and the environment. 152 sites have been addressed and have no ongoing oversight requirements.

During Fiscal Year 2023, 7 new sites were added to the DSMOA program. 555 military sites remain open at the end of FY 2023 under active oversight and are being remediated or assessed for future action.

Responsible Party Cooperation

The Hawaii Environmental Response Law, HRS 128D, requires responsible parties and property owners to investigate and clean up contamination under the regulatory oversight of the HEER Office. The HEER Office has the authority to issue orders to require investigation and cleanup of properties that pose an imminent threat to human health or the environment. In instances where there is no responsible party, or the responsible party fails to take action, ERRF funds may be expended to complete cleanup activities to protect human health.

The HEER Office aims to collaborate with responsible parties and property owners in identifying potential hazards and directing potential investigations and

cleanup activities. This partnership approach results in more successful and timely cleanups, while conserving fund monies.

A limited number of cleanup actions were conducted under one of three types of regulatory agreements with the HEER Office, described below.

Voluntary Response Program Key Oversight

The Voluntary Response Program (VRP) encourages voluntary cleanup of contaminated properties and includes a cost recovery mechanism to offset HEER oversight costs. Under Chapter 128D, HRS, DOH has the authority to grant prospective purchasers or developers an exemption from future liability if cleanup is performed to DOH specifications under the program.

Past, current or future property owners can participate in this program, but exemptions from liability can only be given to future purchasers or tenants. Completion of the voluntary cleanup action is accompanied by a Letter of Completion (LOC) issued by the Department of Health and noted on the property deed. The most recent LOC was issued for the Waialua Sugar Mill site on the North Shore of Oahu in December 2018. The Iwilei Center site, which entered the VRP program in 2019 has an approved Response Action Memorandum posted in iHEER. To date, 36 contaminated properties have been enrolled in the VRP program

Responsible parties with sites participating in the VRP pay the state for DOH oversight of their remedial activities. Over the past year, sites that have received LOCs but where residual contamination is left in place required on-going management. Redevelopment of these sites requires additional coordination and oversight by the HEER Office to ensure compliance with LOC restrictions.

Fast Track Program

The HEER Office Fast Track Cleanup process provides a streamlined approach for property owners to conduct protective, independent cleanups of low and medium priority sites, and improve Hawaii's ability to focus on more serious and complex releases. The program provides expedited oversight initiated with a standardized application for sites

with low environmental risks. Forms and information on Fast Track Cleanups (FTC) designed to enable landowners or other private parties to conduct a voluntary investigation or cleanup under a simple agreement with the HEER Office are located at:

<https://health.hawaii.gov/heer/about-heer/organization/sdar-programs/fast-track-cleanups/>

The most notable Fast Track site to date has been the International Market Place where the remedial action required was completed and site has been fully re-developed. The No Further Action Letter with Institutional Controls was issued in FY17.

During the pandemic, interest in FTC dropped as redevelopment activities slowed dramatically.

Site Discovery Program

Discovery of historically contaminated sites that may pose a threat to current or future users is an important focus area for the HEER Office. HEER Office uses federal funding to locate and sample properties that may have invisible contamination that could cause harm, especially when sites are redeveloped to residential use, or if contaminated soils are excavated and re-used where children could be inadvertently exposed. The Site Discovery program was awarded a grant of \$275,000 for 2023 by the EPA.

Since 2007, the HEER Office Site Discovery program has investigated 145 sites statewide of which 8 sites were added in FY2023 and focused on parks near sugar plantations that may have been maintained by them. Eight were investigated this year.

Site Name	iHEER ID
Whittington Beach Park	3293
Naalehu Park	3292
Waiohinu Park	3291
Pahala Community Center	3290
Mountain View Park	3289
Kurtistown Park	3288
Herbert C Shipman Park	3287
Ahualani Park	3286

Site Discovery Scope and Data Collection Approaches

Sites are identified by searching historical digital collections that include the Hawaii State Archives, the Hawaii State Public Library System's Hawaii and Pacific Collection, the University of Hawaii at Manoa Library Maps, Aerial Photographs and GIS website and national resources including the Library of Congress Sanborn Map Collection and the Chronicling America digital collection of Hawaii newspapers. These resources, plus locally administered plantation museums in each county provide maps, aerial photos, and oral histories to assist in locating areas formerly used to store, mix and load pesticides for distribution on sugarcane, pineapple and other agricultural industries.

Hawaii's Unique Challenges

As a small, isolated state in the middle of the Pacific, Hawaii faces unique challenges cleaning up contaminated properties. On the mainland, common cleanup solution is often removal and disposal of contaminated materials to a nearby waste facility, or onsite treatment of contamination to reduce or remove hazards.

Unfortunately, limited available land for dedicated disposal facilities and the economics of transporting remedial equipment and waste across the Pacific constrain feasibility of both disposal and treatment options. As a result, Hawaii has relied on risk-based closures and on-site management of contamination for many sites as these are frequently much more feasible alternatives to implement. However, especially in the face of rapid land use changed redevelopment, Hawaii is facing the challenge of how to effectively control and how to keep the

engineering and institutional controls in place over long periods and changing uses, and control soil export from those sites. Additionally, in our low-lying coastal regions, future sea level rise has the potential to reduce the effectiveness of engineering and institutional controls and mobilize previously contained environmental hazards.

Refining the Proactive Approach to Contamination State-wide

The biggest challenge we face in the HEER Office is that the majority of recently reported releases are the result of historic industrial and fuel handling activities, and tend to occur most frequently in industrial centers, harbors, airports, pipeline corridors and historic chemical use and storage facilities. Managing sites individually as releases are reported means that HEER often finds out after a problem or release issue has occurred.

In response to these issues, the HEER Office has begun to adopt a broad, proactive strategy to address the discovery, interim management and remediation of sites statewide. The strategy consists of four components:

1. Programmatic/Areawide Environmental Hazard Management Plans (EHMPs)
2. Extensive Public Outreach, Material Development
3. Site and Document tracking by the public via iHEER and
4. Notification System Use
Automated DigClean Alerts to County permittees receiving approvals for ground disturbing activities in areas where known or presumed contamination is present. The system directs the permittee to site-specific hazard information at their proposed work site and telephone or email assistance on protective measures needed to safely manage potentially contaminated soils or groundwater.

The combination of these four components allows the HEER Office to address potential sites before they become issues by providing the public at-large with as much information and guidance as possible about potential hazards before contamination or

potential contamination is encountered. Our priority is to provide, publicly available information about local and areawide contamination concerns that property owners, tenants, developers and prospective purchasers can use to keep their tenants, contractors and the public safe from contamination exposures on their properties.

Notification and tracking allow the HEER Office to flag sites with known historic contamination entering the redevelopment process before construction starts. This enables early intervention by the HEER Office during the planning process of development rather than having to stop construction that can lead to costly delays. It also prevents unintended exposure of construction workers and the general public.

Lastly, the development of a Construction EHMP (CEHMP) template streamlined information gathering about the proposed project and distills contaminant management to essentials, while prescribing expected minimum hazard management procedures. HEER first published a C-EHMP template and a C-EHMP Addendum in FY2020. The template reduces time and costs in preparation of the document and will more effectively protect human health and the environment by adding minimum handling standards and tracking of companies involved in the project.

This enables HEER to maintain its services to the public. Here is a brief description of the three components:

Programmatic/Areawide Environmental Hazard Management Plans (EHMP)

There are several areas throughout the State that we know have significant contamination being left in place after remedies have been selected and implemented. As the residual contamination may still pose a potential risk to utility and construction workers performing sub-surface maintenance and development activities, guidance has been developed and provided to these entities to protect their workers as they do work in these contaminated areas. This is the primary role of areawide EHMPs and they address areas where 1) the type of contamination is known through several site-specific

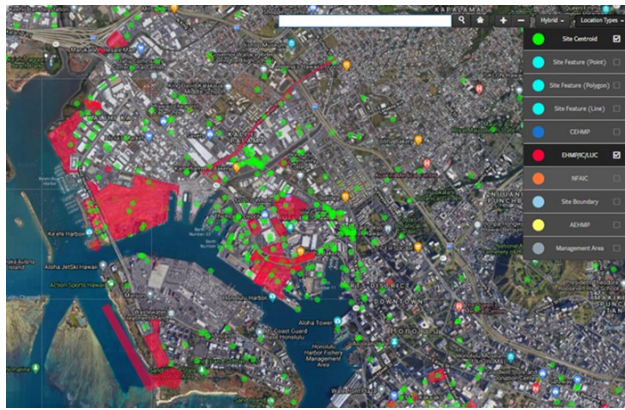

investigations in the area and 2) the contingency plans for handling the type of contamination in question is well defined. By providing information regarding management of the various media (soil, groundwater, soil gas) up front, all entities performing intrusive work in the area will be prepared and equipped to manage any hazard they may encounter. This also provides better worker safety and reduces the number of incidents that our emergency responders must address.

Public Outreach & Material Development

Environmental Hazard Management Plans and other types of institutional controls are only as effective as the amount of awareness affected parties have. Public outreach and continuing education to all relevant parties (utilities, lenders, contractors, State departments, etc.) is required to reinforce what needs to be done and maintain site safety. Meeting with the various stakeholders annually allows the HEER Office to get its safety message out consistently and frequently. HEER Office outreach materials for the various types of contamination (UXO, arsenic, petroleum) on sites are developed and regularly updated keep these important messages fresh in the minds of the public.

Site and Document tracking by the public via iHEER & Notification System Use

iHEER is the HEER Office's site management and document repository system. SDAR sites can be located on a map-based viewer by the public, site information viewed, and many documents directly downloaded. Some restrictions on site viewability and document download apply due to site security or ongoing investigations. iHEER can be accessed via the following link: <https://eha-cloud.doh.hawaii.gov/iheer#!/home>

iHEER viewer with site centroids (green dots) and EHMP/IC Boundaries (red fields)

After Public Record document migration from the previous system, iHEER development focused on the site viewer, grouping, and labeling sites for specific categories. For better site identification site centroids and site boundaries were separated into different layers. Additional layers were added to be able to track site controls such as site-specific EHMPs, Areawide EHMPs, and temporary Construction EHMPs. For internal management, a layer was added to include site-specific features. Site with controls and sites without controls can also be separately viewed.

1,027 Brownfield sites have been tagged and are searchable via a query. Sites affected by an anticipated 3.2 feet of sea-level rises (SLR) and anticipated acute flooding (3.2 feet of SLR plus 1 percent annual chance of flooding) have been tagged and can be queried.

This fiscal year, SDAR staff continued to update site data for individual sites with the addition of site centroids and property boundaries, EHMP boundaries, and site features. All new incoming documents are processed in iHEER now and are directly accessible thereafter. The immediate access to all documents by staff is especially advantageous during allowed teleworking.

Honolulu Rail Transit Project

As drivers along H-1 see every day on their morning commutes, the rail project is becoming a reality. The

Honolulu Rail Transit Project (H RTP) guideways are springing up across the landscape and pre-construction activities are occurring all along the route. The HEER Office maintains close regulatory oversight of the H RTP to ensure any contamination encountered during construction is managed safely, efficiently and in accordance with state law.

The H RTP includes construction of 21 rail stations, installation of hundreds of columns to support 20 miles of elevated guideways, extensive utility relocations, a large rail car maintenance and storage facility, and several park and rides.

During FY2023, guideway construction accelerated in the industrialized area near the airport, and preconstruction activities associated with utility relocation continued throughout the City Center part of the project. Both the Airport and City Center Guideway Areas are located within densely populated regions of Oahu in areas with much higher potential for contamination than the western segments. HDOH is particularly concerned with an area along Dillingham where Honolulu Authority for Rapid Transportation (HART) contractors encountered very high volatile concentrations during geotechnical boring several years ago. The Dillingham section rail alignment has been shifted to the mauka side of the Dillingham, due to the hazards and density of utilities buried under the roadway.

To address environmental concerns in accordance with the Programmatic EHE-EHMP, oversight of the H RTP continues to require close coordination between the HEER Office SDAR Section and multiple other regulatory authorities. During FY2023, the SDAR Section worked closely with the Solid and Hazardous Waste Branch (SHWB), the Clean Water Branch (CAB), and the HEER Office's EP&R Section on the H RTP.

Unexploded Ordnance (UXO) Issues Throughout the State

UXO continues to be one of the main contaminants of concern throughout the State. Over the past two decades, dozens of UXO investigations have taken place throughout the State at both active military installations and Formerly Used Defense Sites (FUDS), highlighting the number and severity of the

UXO problem. Many of the areas that have been and are currently being investigated are in or near residential areas (Waimea/Kamuela, Waikoloa Village, Maku'u/Popoki) and/or in areas heavily trafficked by the public (Maunawili Trail, Hapuna Beach, Bellows Air Force Base, Molokini, 'Ahihi Kina'u, etc.). Since there is no way to ensure 100% clearance of a UXO site, these sites present a potential danger to the public at-large. The HEER Office has continued to work with Department of Defense counterparts to address UXO concerns and inform the public of hazards.

The HEER Office is participating in outreach with the United States Army Corps of Engineers (USACE) to discuss UXO safety with the public.

The HEER Office continues utilizing the services of Terradex, Inc. to monitor excavation notifications in the Waikoloa Maneuver Area.

Brownfields Re-development of Various Properties Across the State and Counties

Land re-use and re-development is critical when living on an island and to facilitate that, the HEER Office has dedicated its time and resources to assist private parties in their endeavors. In addition to these projects, the HEER Office has assisted the City and County of Honolulu in researching potential parcels for use as transitional housing.

The HEER Office has had a longstanding relationship with DBEDT and continues to assist DHHL, DOT, DOE, and other State departments in providing guidance and oversight for their projects. The HEER Office assisted County of Kauai with their successful application for the EPA Brownfields Community-Wide Assessment Grant. The County of Kauai was granted \$300,000 to be used to revitalize and help underserved populations in the County of Kauai. The Brownfields grant funding will support efforts to assess and clean-up contaminated and abandoned industrial and commercial properties.

High Priority State Sites

A key role of the HEER Office is to identify sites where current or projected exposures to hazardous chemicals could pose a threat to public health or the environment. These sites receive high priority

designations. Examples of progress on high priority sites are described below:

Kapalama Container Yard Development

The Kapalama Container Yard project is a massive re-development project on both land and sea. The area was utilized by multiple and various tenants after it was transferred to the State from the Army in 1983 when it was known as the Kapalama Military Reservation. Historic information regarding the former military reservation indicated petroleum, heavy metal, and PCB contamination on-site. An investigation was performed prior to construction and an EHMP was implemented on the site. Given the vast amount of soil and concrete that needs to be moved or disposed of, the HEER Office has worked closely with DOT's contractor Kiewit and the Solid Waste Section to ensure that the material being generated is being handled in accordance with state regulations.

During this fiscal year, a Soil Stockpile Characterization and Reuse Request was submitted and weekly monitoring continues.

Iwilei Areawide Contamination

Because of extensive historic petroleum contamination in subsurface soils dating back to territorial days, Honolulu Harbor remains one of HEER's top priorities. The HEER office is interested in the effects of rising water levels which may be exacerbated in the future with sea-level rise. Increase and severity of flooding, sea-level rise, and storm events is expected to rise in the future as a result of climate change. The HEER would like to understand the magnitude and distribution of this problem at identified problematic areas including active petroleum fuel terminals, areas of previous pipelines, and historic petroleum handling and storage facilities

BHP GASCO Benzene Site/Dole Cannery Building Site, Oahu

The BHP Gasco Site was the most hazardous site in the State with high benzene concentrations in soil and groundwater as a result of releases from former gas manufacturing activities. The site is situated next to the Dole Cannery Building and is being remediated under a consent agreement signed in

March 2004. The BHP Gasco Site has completed active remediation and source reduction and has been re-developed into a warehouse. Engineering and institutional controls have been implemented and the site together with the neighboring Dole Cannery Building is currently under a combined long-term monitoring program for groundwater, soil vapor, and indoor air monitoring following the construction of a warehouse underlain by an impermeable vapor barrier and a sub-slab ventilation system. Semi-annual monitoring is being

conducted but the Environmental Hazard Management Plan is undergoing revision.

Given changing ocean and atmospheric conditions due to climate change and sea level rise, long-term monitoring measurements to understand temporal changes are needed.

HEER works to stay up to date on changing environmental hazards, and adjusts remedies when data show new risks to human health and the environment are present.

Sites Eligible for Possible Listing Under CERCLA

Three Hawaii sites are listed on the EPA National Priority List (NPL). Costs for site investigation and cleanup are being borne by the responsible parties. The state is not obligated to contribute to cleanup or future operation and maintenance costs.

<u>List of EPA NPL Sites - FY2023</u>					
	<u>Island</u>	<u>Locality</u>	<u>Facility/Site Name</u>	<u>iHEER ID</u>	<u>Comment</u>
1	Oahu	Kunia	Del Monte Corp (Oahu Plantation)	1166	Groundwater reports were received throughout FY2023.
2	Oahu	Navy, Naval Computer and Telecommunications Area Master Station-Pacific	NCTAMSPAC Center Street	1278	An updated Site Management Plan Update Naval Computer and Telecommunications Area Master Station Pacific (NCTAMS PAC) dated June of 2022 was received in November of 2022.
3	Oahu	Navy, Pearl Harbor Naval Complex	Pearl Harbor Naval Complex	241 DRMO Manana Storage Area 1294 Navy Waipio Peninsula, Herbicide/Fertilizer Mixing Area 1325 Pearl Harbor Sediment Study DU E-2 1338 PHNC, Aiea Laundry Building 436 1375 PHNSY, Building 8 2680 PHNC, Sandblast Grit Disposal	The Pearl Harbor Naval Complex Site Management Plan Update dated October 1, 2022 was received at the end of October 2022.

Sites Eligible for Possible Listing Under CERCLA FY2023

The EPA’s Superfund Website lists 247 sites in Hawaii.

Of these, 82 are listed as Active.

Twenty are on the National Priority List (NPL) as Final NPL (the 3 listed above), Part of NPL Site (14), Deleted NPL (1) or removed from NPL (2).

The 62 remaining non-NPL fall into 12 categories:

Twenty-two are Federal Lead in four categories: cleanup (10), inspection review start needed (4), removal only (1), or PA review ongoing (7).

Forty non-Federal fall into eight categories: Addressed as Part of Another non-NPL Site (1), NFRAP (5), Reassessment Needed (1), Referred to Removal, Needs Assessment (1), Removal Only (15) and Status not Specified (1), Assessment Complete - Decision Needed (3), thirteen noted specifically to be State-Lead Cleanup (13).

The following tables indicate the ID of the iHEER record(s) corresponding to the federal record.

Twenty NPL Sites in Hawaii

HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023					
Island	Unit Name	Case Number	Substances	Media	
79	Hawaii	HELCO Transformer #51524 Oil Spill Pole 6 Walua Rd. Kailua Kona	20220902-1805	Mineral Oil/Transformer Oil	Soil
80	Oahu	Oil Sheen Row 400 Ala Wai Boat Harbor Honolulu	20220903-1212	Other	Ocean
81	Maui	Potential Release Capsized Vessel Maui	20220904-1447	Gasoline	Ocean
82	Maui	Caustic Spill Maui Linen Supply	20220905-1214	Hydrogen peroxide (Conc. 52%), Sodium hydroxide	Asphalt
83	Maui	MECO Transformer 12151, Papakea Condominium, Lahaina	20220907-0818	Mineral Oil/Transformer Oil	Concrete
84	Oahu	HECO Transformer No. V21104 Oil Spill Tripler	20220907-1017	Mineral Oil/Transformer Oil	Soil
85	Oahu	HECO Transformer #71386 Oil Spill Mililani	20220907-1022	Mineral Oil/Transformer Oil	Soil
86	Oahu	Ala Wai Unknown Sheen	20220909-0639	Oil	Ocean
87	Maui	Kahului International Airport Holdroom and Gate Improvement	20220909-1315	1,2,3-Trichloropropane (TCP), Oil	Soil
88	Oahu	Unknown Sheen at Keehi Lagoon	20220909-1818	Oil	Ocean
89	Maui	Potential to Release with Capsized Vessel	20220910-0923	Oil	Ocean
90	Oahu	American Challenger Hydraulic Release	20220911-1223	Hydraulic Oil	Ocean
91	Oahu	Abandoned Drums located at Al Phillips Kailua	20220912-0040	Unlisted hazardous wastes characteristic of corrosivity	Within Facility
92	Oahu	USCG Cutter Juniper Hydraulic release	20220912-1122	Hydraulic Oil	Ocean

HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023					
Island	Unit Name	Case Number	Substances	Media	
93	Hawaii	HELCO Pad Mount Transformer 33800	20220913-0801	Mineral Oil/Transformer Oil	Soil
94	Oahu	Possible Misuse of Pesticides	20220913-1818	Gas	Air
95	Kauai	Waste Oil Mishandling at Harley Davidson Kauai	20220914-1130	Used Oil	Soil
96	Oahu	Signature Flight Support/HFFC Tank 18 jet fuel spill, Sand Island facility	20220914-1548	Jet Fuel/Kerosene	Soil
97	Oahu	HECO Pad-mount Transformer #70882 Release	20220915-1518	Mineral Oil/Transformer Oil	Soil
98	Hawaii	HELCO Pole-mount Transformer #33749 Release	20220916-1241	Mineral Oil/Transformer Oil	Soil
99	Hawaii	HELCO Pad-mount Transformer #34830 Release	20220916-1250	Mineral Oil/Transformer Oil	Soil
100	Hawaii	Potential Release from a Vessel Aground in Pawai Bay	20220916-2126	Container, Gasoline	Ocean
101	Oahu	Sheen at the Ala Wai Small Boat Harbor	20220917-0947	Unknown	Ocean
102	Oahu	Unknown Sheen Reported in Water by Makaha	20220918-1210	Unknown	Ocean
103	Oahu	Front Loader Release on Ala Moana	20220919-0730	Hydraulic Oil	Asphalt
104	Oahu	HECO Release Transformer #63794	20220919-1200	Mineral Oil/Transformer Oil	Soil
105	Oahu	Valve Failure at Line at Honolulu Airport	20220920-1137	Jet Fuel/Kerosene	Concrete
106	Oahu	Fuel from a Vessel Created a Sheen Off Makaha Beach	20220920-1424	Diesel Oil/Marine Gas Oil	Ocean
107	Hawaii	Acid Cleaner Spilled at an Elementary School	20220920-2348	Liquid	Within Facility

HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023					
Island	Unit Name	Case Number	Substances	Media	
108	Oahu	Several Compressed Gas Cylinders Abandoned on Kunia Road	20220921-0944	Compressed Gas Cylinder	Other
109	Oahu	WEEKS Marine hydraulic fluid spill Pearl Harbor	20220921-1852	Hydraulic Oil	Ocean
110	Maui	Possible Diesel Release from A Backhoe	20220922-0821	Diesel Oil/Marine Gas Oil	Stream
111	Oahu	Gas Line Ruptured by STG Work	20220922-0947	Gas	Air
112	Hawaii	Unknown Drums Dumped on State Ag Land	20220922-1319	Oil, Waste	Soil
113	Oahu	Formaldehyde Spill Stevenson Intermediate School	20220922-1357	Formaldehyde	Within Facility
114	Oahu	Hydraulic Oil Release at Pearl Harbor, Pier A5	20220923-1232	Hydraulic Oil	Ocean
115	Hawaii	Kona Boat Rentals' boat capsized, Honokohau Bay	20220924-1910	Gasoline, Lube Oil/Motor Oil, Transmission Fluid	Ocean
116	Maui	Potential Release Sinking vessel, Maalaea Harbor slip 73	20220925-0713	Oil	Ocean
117	Oahu	Oil Staining on Roadway	20220926-1015	Oil	Asphalt
118	Oahu	Honolulu Harbor Pier 9 Concrete Adhesive Spill	20220926-1404	Liquid	Ocean
119	Hawaii	Diesel Odor from Excavation at Hilo Airport	20220927-1417	Diesel Oil/Marine Gas Oil	Soil
120	Oahu	Paint Spraying at Koko Marina	20220929-0840	Paint	Air
121	Oahu	Abandoned Metal Drums on Prospect Street	20220929-1402	Container	Drum/Container
122	Oahu	USCG Motor Oil Release from Small Boat	20220929-1527	Lube Oil/Motor Oil	Ocean

HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023					
<u>Island</u>	<u>Unit Name</u>	<u>Case Number</u>	<u>Substances</u>	<u>Media</u>	
123	Oahu	Oil Spill Pearl Harbor Shipyard Drydock 3 USS Tucson	20220929-1900	Hydraulic Oil	Storm Drain
124	Maui	Oil Spill Pier 3B Vessel Kahului	20220930-1647	Diesel Oil/Marine Gas Oil	Ocean
125	Oahu	HART Contractors Drilled Gas Line	20221003-0836	Gas	Air
126	Oahu	Oil Spill Pacific Air Cargo South Ramp Honolulu	20221003-1356	Hydraulic Oil	Concrete
127	Oahu	Lead in Soil Puuloa Range Training Facility Ewa Beach	20221003-1547	Lead	Sand
128	Oahu	Oil Spills Bravo 14 Pier Dredging Pearl Harbor	20221004-0820	Fuel Oil, Oil	Ocean
129	Oahu	Ham Produce & Seafood fish cleaning wastewater flowing into street	20221004-1225	Wastewater	Asphalt
130	Oahu	Oil Sheen Pleasure Craft Ala Wai Harbor	20221004-1530	Oil	Ocean
131	Oahu	Hydraulic Oil Release on Ewa Beach Road	20221005-0813	Hydraulic Oil	Storm Drain
132	Oahu	Cooking Oil Release into a Storm Drain	20221005-0922	Cooking Oil	Storm Drain
133	Maui	Kahului Harbor Industrial District Site 1204	20221005-1507	Oil	Ocean
134	Oahu	HECO Transformer Spill 7200X12470 Bldg. 886 Schofield	20221006-1042	Mineral Oil/Transformer Oil	Soil
135	Oahu	Oil Contamination Kapolei Harborside Sewer Line Project	20221006-1610	Oil	Groundwater
136	Oahu	USS Jackson hydraulic leak, Pearl Harbor H2 pier	20221007-1106	Hydraulic Oil	Ocean

HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023					
Island	Unit Name	Case Number	Substances	Media	
137	Oahu	Household Had a Leaking Flammable Liquid	20221010-1519	Liquid	Within Facility
138	Oahu	5 Gallon Container of Fuel at Kahuku Fire Station	20221012-1022	Container	Other
139	Kauai	Target Vessel Leaking Fuel Near PMRF	20221012-1756	Gasoline	Ocean
140	Oahu	Sheen in Ala Wai Canal by Yacht Club	20221012-1758	Unknown	Ocean
141	Kauai	Vessel Created a Sheen in Nawiliwili Harbor	20221013-1204	Oily Water Mixture	Ocean
142	Oahu	Cooking Oil Leaking in Basement of Honolulu Airport	20221013-1855	Cooking Oil	Within Facility
143	Oahu	Pearl Harbor Wastewater Treatment Plant Wastewater Release	20221013-2000	Wastewater	Ocean
144	Hawaii	Kalamapi`i Play School Lead in Soil Hilo	20221014-1428	Lead	Soil
145	Oahu	Compressed Gas Cylinders Dumped in Waianae	20221014-1457	Compressed Gas Cylinder	Other
146	Maui	Motor Oil Released from a Vessel Before Returning to Harbor	20221014-1744	Lube Oil/Motor Oil	Ocean
147	Oahu	Port O Potty Tipped Over in a Park	20221015-1110	Liquid	Soil
148	Oahu	Unknown Sheen in Honolulu Harbor by Pier 27	20221016-0809	Unknown	Ocean
149	Hawaii	Sheen from a Tender Boat from a Cruise Ship	20221016-1129	Diesel Oil/Marine Gas Oil	Ocean
150	Kauai	Potential Release from a Sunken Vessel	20221016-1413	Gasoline	Ocean
151	Oahu	55-Gallon Drum of Diesel Left on Sidewalk in Neighborhood	20221016-1735	Diesel Oil/Marine Gas Oil	Concrete

<u>HAWAII STATE RESPONSE PROGRAM CHEMICAL RELEASE NOTIFICATION LOG FY2023</u>

The Hawaii Response Program (HSRP) – List of Priority Sites

Chapter 128D, HRS, Environmental Response Law, Section 7, HRS mandates that a State List of Sites be published annually listing the sites with potential or known hazardous substances or pollutants or contaminants. Overall, in FY2023, HEER had oversight responsibilities for 1,661 active sites and reached No Further Action determinations at 2 sites.

We present the list in two sections.

The Hawaii State Response Program List of Priority Sites presents all non-military Hawaii sites identified for potential or known non-emergency response actions under HRS 128D. Current ERRF funding supports only part of the HEER Office response obligation for these sites. 1,662 active sites under direct DOH oversight in the various State programs are listed. Two state sites with known or suspected contamination received No Further Action Determinations, one of which will require ongoing management of residual contamination through Environmental Hazard Management Plans.

The Hawaii State Response Program DSMOA Program List of Priority Sites presents military sites in Hawaii for which SDAR provides oversight. Hazardous substance response actions are managed by various DOD branches under CERCLA authorities, with regulatory oversight from SDAR. Cleanup sites within the Pearl Harbor Naval Complex are co-regulated by US EPA, due to the National Priorities List (“Superfund”) designation. The DOD sites include numerous high priority unexploded ordnance sites (UXO). Investigations and cleanups of military sites with petroleum-contaminated sites are conducted under 128D authorities, as petroleum is not covered under CERCLA. ERRF funds are not currently used for oversight of non-emergency military cleanups in Hawaii. Staff positions providing oversight for this work are currently funded by federal DSMOA grants. The list includes 555 sites that are co-managed by DOH and DOD under CERCLA and HRS 128D authorities.

Because the Air Force and Navy work systematically to address high priority sites first, the majority of the remaining sites are medium and low priority. In 2023, no clean up decisions were reached at DSMOA sites. Some sites will require ongoing management of

residual contamination through Environmental Hazard Management Plans. The lists are sorted in the order of Island, Locality or Installation, and Site Name. The site Priority and Status are identified for each Facility/Site.

The Status of Site Discovery indicates that limited sampling targeting a specific type of hazard is being done or has been done.

A Status of Assessment indicates sites that have sampling planned or underway and the hazard has not yet been determined.

A Status of Remedy Needed, Remedy Selected, Remedy in Place, or NFAIC indicates that a site has been categorized as a potential hazard as sampling data indicate that contaminant concentrations exceed Hawaii Environmental Action Levels and use restrictions need to be imposed to limit access to the contamination (Institutional Controls) that may include physical barriers that limit exposure to the contaminants (Engineering Controls).

A Status of NFA indicates that hazards have been managed by removal or destruction of the contaminants.

Generally, the Hawaii Environmental Action Levels (EALs) are conservative levels set to be protective of long term, daily exposures.

FY2023 Response Program Activity

Response Program Activity Summary data presented in this section for the Hawaii State Response Program (SRP) includes all Hawaii sites identified for non-emergency response actions during FY2023 and sites requiring evaluation if an assessment or response action is required under HEER Office authority. The HEER Office manages sites within five program areas depending upon eligibility, funding, and level of responsible party participation as:

- State Sites
 - Hawaii Brownfields Revitalization Sites (Brownfields)
 - Hawaii Voluntary Response Program (VRP) Sites
 - Site Discovery (SDAR) and Preliminary Assessment/Site Inspection (PA/SI) Sites
 - DSMOA Department of Defense Sites

Over time, a site may be managed within the HEER Office under one or more program areas, starting with the site assessment phase and if required by the State, through to cleanup completion. Counts are sites that are open or recently closed.

Program Category	Count
State	893
Brownfields	63
VRP	4
Site Discovery & PA/SI	141
Fast Track	2
NPL	4
DSMOA	555

Site specific information on our state and federal sites are publicly available on iHEER. Please read the instructions and limitations before using iHEER.
