JOSH GREEN, M.D. GOVERNOR KE KIA'ĀINA

OFFICE OF ENTERPRISE TECHNOLOGY SERVICES

P.O. BOX 119, HONOLULU, HAWAI'I 96810-0119 Ph: (808) 586-6000 | Fax: (808) 586-1922 ETS.HAWAII.GOV

July 24, 2024

The Honorable Ronald D. Kouchi President of the Senate and Members of the Senate Thirty-Second State Legislature State Capitol, Room 409 Honolulu, Hawai'i 96813 The Honorable Scott K. Saiki Speaker and Members of the House of Representatives Thirty-Second State Legislature State Capitol, Room 431 Honolulu, Hawai'i 96813

Aloha Senate President Kouchi, Speaker Saiki, and Members of the Legislature:

Pursuant to HRS section 27-43.6, which requires the Chief Information Officer to submit applicable independent verification and validation (IV&V) reports to the Legislature within ten days of receiving the report, please find attached the report the Office of Enterprise Technology Services received for the State of Hawai'i, Department of Health, BHA Integrated Case Management System Project.

In accordance with HRS section 93-16, this report may be viewed electronically at <u>http://ets.hawaii.gov</u> (see "Reports").

Sincerely,

Tom The

Tom Ku Acting Chief Information Officer State of Hawai'i

## Hawaii BHA Integrated Case Management System Project – Phase 4

*IV&V* Report for the period of June 1 – June 30, 2024

Final Submitted: July 15, 2024

**Solutions that Matter** 

#### Agenda

Executive Summary IV&V Findings & Recommendations

Appendices

- A Rating Scales
- B Inputs
- C Project Trends

R4.7 regression testing will be a combination of automated and manual testing and is scheduled to be executed between 7/22/24 – 7/31/24. R4.7 go-live is scheduled for 8/1/24. Per BHA's request, IV&V will validate the automated regression test scripts that have been completed to date. DDD is currently evaluating options to add an automated regression testing resource.

CAMHD Provider Invoice Batch Printing was deployed to production on 6/5/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of work items is planned before the R4.7 go-live. Based on the ongoing FHIR User Acceptance Testing (UAT) sessions, the project anticipates that FHIR will be deployed in a release after R4.7.

Microsoft executed the performance test from Tuesday, 6/4/24 – Wednesday, 6/12/24. Stakeholders are awaiting delivery of the report.

The SI vendor will demonstrate Maui Wildfire communication functionality to stakeholders on 7/9/24. The date for the FHIR demo is yet to be finalized.

A preliminary concern was opened in May regarding the current process, which does not allow BHA to track actual costs versus budgeted costs of large functionality such as FHIR or Golden Record. As of the June reporting period, BHA stakeholders are expected to evaluate process options. For Big Rock items such as FHIR, IV&V recommends the SI vendor reports the User Stories Points (USP) when the USPs exceed the budgeted USPs.

The Adverse Event Report (AER) Analytics project kicked off on 6/4/24. The Discovery phase of the AER analytics project is in progress. The SI vendor has provided a high-level timeline but has not yet provided a project schedule. There is uncertainty around receiving timely information from MedQuest, which will likely impact completion of the project schedule.

Apr	Мау	June	Category	IV&V Observations	
×	3	Y	Sprint Planning	IV&V shared Stakeholder Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working on populating the Stakeholder Register and RACI matrix. The SI vendor will demonstrate Maui Wildfire communication functionality to stakeholders on 7/9/24. The date for the FHIR demo is yet to be finalized.	
6	G	6	User Story (US) Validation		

Apr	Мау	June	Category	IV&V Observations
			Y Test Practice Validation	R4.7 regression testing will be a combination of automated and manual testing and is scheduled to be executed between $7/22/24 - 7/31/24$ . R4.7 go-live is scheduled for $8/1/24$ . Three (3) bugs (1 medium and 2 low priority) resulting from the R4.6 regression testing were added to the backlog.
Y	Y	Y		Minimal progress has been made in developing and executing automated regression test cases. Considering the five (5) post-production bugs (4 high and 1 medium priority), including one for which a hot-fix was deployed on Friday, 5/31/24, the project should evaluate the efficacy of regression testing overall. Per BHA's request, IV&V will validate the automated regression test scripts that have been completed to date. DDD is currently evaluating options to add an automated regression testing resource.
				BHA in May 2024. BHA is working to populate information in the Stakeholder Register and RACI matrix to ensure adequate stakeholder participation in the testing process.
				Of the six (6) post-production defects (5 high and 1 medium priority; 1 Microsoft defect), one (1) defect was deployment-related, and one is a Microsoft defect; the root cause analysis (RCA) for the other defects is yet to be completed.
Y	Y	Y	Release / Deployment Planning	A finding was opened in April regarding the process to update existing documents and folders on DDD's SharePoint site. The execution time for an earlier executed intensive process was unacceptable, and there is new functionality based on the same design and process. As of the June reporting period, The SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design of the proposed solutions.
				CAMHD Provider Invoice Batch Printing was deployed to production on 06/05/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of work items is planned before the R4.7 go-live. Based on the ongoing FHIR User Acceptance Testing (UAT) sessions, the project anticipates that FHIR would be deployed in a release after R4.7.

Apr	May	June	Category	IV&V Observations	
G	G	C	OJT and KT Sessions	This category remains Green (low criticality) for the June reporting period with no active findings.	
0	G	O	Targeted KT	This category remains Green (low criticality) for the June reporting period. IV&V will continue to monitor.	
0	G	G	Project Performance Metrics	There are no project performance metrics to report for this reporting period. IV&V will keep the criticality rating for this category a Green (low criticality) and will continue monitoring this category.	
0	G	G	Organizational Maturity Assessment (OMA)	This category remains Green for the June reporting period. There are no outstanding indings in this category, and IV&V will continue to monitor.	

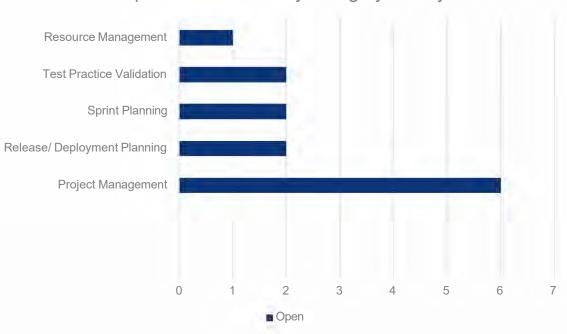

Apr	May	June	Category	IV&V Observations
				R4.6 went live on 5/30/24; a hot-fix to resolve a significant problem with the Calculator was deployed on Friday, 5/31/24. Fixes to six other (6) post-production defects (5 high and 1 medium priority; 1 Microsoft defect) are planned to be deployed with R4.7. CAMHD Provider Invoice Batch Printing was deployed to production on 06/05/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of work items is planned before the R4.7 go-live. Based on the ongoing FHIR User Acceptance Testing (UAT) sessions, the project anticipates that FHIR will be deployed in a release after R4.7. IV&V will monitor the progress and quality of R4.7.
				A finding (#43) related to the SharePoint folders bug was created in April 2024; the SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design to address the issue.
				Microsoft executed the performance test from Tuesday, 6/4/24 – Wednesday, 6/12/24. Stakeholders are awaiting delivery of the report.
Y	Y	y y	Project Management	The Adverse Event Report (AER) Analytics project kicked off on 6/4/24. The Discovery phase of the AER analytics project is in progress. The SI vendor has provided a high-level timeline but has not yet provided a project schedule. There is uncertainty around receiving timely information from MedQuest, which will likely impact completion of the project schedule.
				Improved coordination and communication with all involved parties are needed to address the delayed claims postings.
		The current process does not allo by feature/functionality. As of the evaluate process options. For Big	The current process does not allow BHA to track actual costs versus budgeted costs by feature/functionality. As of the June reporting period, BHA Stakeholders plan to evaluate process options. For Big Rock items such as FHIR, IV&V recommends the SI vendor reports the User Stories Points (USP) when the USPs exceed the budgeted USPs.	

Apr	Мау	June	Category	IV&V Observations
Y	Y	Y	Resource Management	DDD is currently evaluating options to add an automated regression testing resource. The State has approved the variance for a Business Analyst (BA) position.

As of the June 2024 reporting period thirteen (13) open findings were updated – eight (8) Medium Issues, two (2) Medium Risks, one (1) Low Issue, and two (2) Preliminary Concerns spread across the Release/Deployment Planning, Test Practice Validation, Sprint Planning, Project Management, and Resource Management assessment areas are currently open.

#### Open Risks/ Issues by Category/Priority

## **IV&V** Findings & Recommendations

#### IV&V Findings & Recommendations Assessment Categories

Throughout this project, IV&V verifies and validates activities performed in the following process areas:

- Sprint Planning
- User Story Validation
- Test Practice Validation
- Release / Deployment Planning
- On-the-Job Training (OJT) and Knowledge Transition (KT) Sessions
- Targeted Knowledge Transition (KT)
- Project Performance Metrics
- Organizational Maturity Assessment
- Project Management
- Resource Management

## IV&V Findings & Recommendations Sprint Planning

#	Key Findings	Criticality Rating
31	<ul> <li>Medium Risk: Lack of regular Sprint reviews and sprint demos will likely lead to misalignments between delivered work and stakeholder needs.</li> <li>Finding Update: The SI vendor will demonstrate Maui Wildfire communication functionality to stakeholders on 7/9/24. The date for the FHIR demo is yet to be finalized.</li> </ul>	M
Reco	mmendations	Status
(R4 me en: pro	cording to Agile Best Practices, IV&V recommends including Sprint reviews and demos in future releases 4.2 and onwards) with all relevant stakeholders to assess the completion of user stories, review important trics and outcomes, and confirm if the Sprint goal has been achieved. This approach would also help sure the backlog is prioritized and well-prepared for the next Sprint. These are some recommendations for ject alignment, stakeholder engagement, quality assurance, transparency, and the incorporation of user dback.	In Progress
cha	engthen the collaboration between development teams and stakeholders by enhancing communication annels. Regularly validate project objectives and ensure that sprint deliverables remain consistent with keholder requirements	In Progress
	ster active participation from users and stakeholders during both Sprint Reviews and Sprint Demos. The phasize the value of iterative feedback to guide development and ensure that user needs are consistently t.	In Progress

#### IV&V Findings & Recommendations Sprint Planning (cont'd)

R	ecommendations	Status
•	Establish standardized communication protocols for both Sprint Reviews and Sprint Demos. Encourage teams to deliver concise and informative progress reports, including achievements, challenges, and future plans. This will enhance stakeholder engagement and project transparency.	In Progress
•	Create a stakeholder register to identify all stakeholders. List their identification, assessment, and classification. Review the register regularly to plan appropriate stakeholder engagement.	In Progress
•	Institute a structured documentation process for both activities. Document key decisions, action items, and insights from each session to ensure accountability and to support ongoing process improvement.	In Progress

## IV&V Findings & Recommendations Sprint Planning (cont'd)

#	Key Findings	Criticality Rating
41	<ul> <li>Medium Risk: Absence of separate dedicated product backlog review meetings can pose several challenges for a project team.</li> <li>Finding Update: IV&amp;V has shared Stakeholder Register and RACI templates (based on best practices) for BHA to populate. Once the stakeholder registry and the RACI matrix are finalized, BHA plans to schedule product backlog review meetings. There are no new updates for the June reporting period.</li> </ul>	M
Recommendations		
Recor	nmendations	Status
• Sep or u	nmendations parate dedicated product backlog review meetings (during sprints) would allow clarifying any ambiguities incertainties, re-prioritization, estimation and refinement of backlog items. This would allow the project m to avoid situations where decisions about including items Mid-sprint would have to be taken.	Status Open

#### IV&V Findings & Recommendations Test Practice Validation

#	Key Findings	Criticality Rating
2	<ul> <li>Medium Issue: As a result of automated regression testing not being comprehensively performed, production releases are breaking and/or deprecating existing functionality in the production environment.</li> <li>Finding Update: R4.7 regression testing will be a combination of automated and manual testing and is scheduled to be executed between 7/22/24 – 7/31/24. R4.7 go-live is scheduled for 8/1/24. Three (3) bugs (1 medium and 2 low priority) resulting from the R4.6 regression testing were added to the backlog. Minimal progress has been made in developing and executing automated regression test cases. Considering the five (5) post-production bugs (5 high and 1 medium priority), including one for which a hot-fix was deployed on Friday, 5/31/24, the project should evaluate the efficacy of regression testing overall.</li> <li>DDD is currently evaluating options to add an automated regression testing resource for assessment of current test scripts and development of additional test scripts.</li> </ul>	M
Recor	nmendations	Status
reg	ving board(s) in Azure DevOps or a document on SharePoint that provides information about the status of ression testing automation, to facilitate visibility and transparency to BHA project personnel and keholders.	In Progress
will	nedule priorities should be reevaluated by distributing the work according to the resource bandwidth. This ensure that the schedule is not impacted and that the work is done efficiently between regression testing d GR.	In progress

#### IV&V Findings & Recommendations Test Practice Validation (cont'd)

Recommendations	
<ul> <li>Pursue and complete additional formal training in Azure DevOps and Tricentis for test automation at the earliest possible juncture and complete efforts to automate the 2 primary regression test scripts.</li> </ul>	In progress
Determine if current regression testing timeframes are adequate, and if not, add more time to the pre- production regression test efforts for all release deployments.	In Progress

#### IV&V Findings & Recommendations Test Practice Validation (cont'd)

#	Key Findings	Criticality Rating
40	<ul> <li>Medium Issue: Improvements to the testing process are needed to ensure adequate CAMHD participation and comprehensive testing of functionality prior to production deployment.</li> <li>Finding Update: IV&amp;V shared Stakeholder Register and RACI templates (based on best practices) with BHA in May 2024. BHA is working to populate information in the Stakeholder Register and RACI matrix.</li> </ul>	M
Recommendations		
• Ide	entify stakeholders (output is stakeholder register) and develop a RACI matrix for testing.	In Progress
• R	eview the overall testing process and implement any needed improvements identified.	Open

#### IV&V Findings & Recommendations Release / Deployment Planning

#	Key Findings	Criticality Rating
43	<b>Medium Issue:</b> The execution time for the process for updating DDD SharePoint folders is unacceptable. <b>Finding Update:</b> The SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design of the proposed solution.	M
Rec	ommendations	Status
• 1\	/&V recommends doing an impact analysis, e.g., downstream impact.	Open
is	/&V recommends DDD puts on hold any development utilizing Power Automate for the performance sue encountered in production (marked "TBD" in finding #14 related to "SharePoint Bulk Flows still running") nd related user stores, e.g., "Changes to DDD folders", and defects.	Open
•  \	/&V recommends evaluating other feasible options, e.g., leveraging SharePoint tools and best practices.	Open
• A	project issue should be opened to identify and manage the resolution of this issue.	Open

## IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

#	Key Findings	Criticality Rating
	<b>Low Issue:</b> Due to ongoing deployment processes and technical execution issues, the Project may continue to encounter defects and challenges, e.g., when releases are in production or in meeting projected timelines for production and non-production deployments. <b>Finding Update:</b> Of the six (6) post-production defects (5 high and 1 medium priority), one (1) defect was	
39	determined to be deployment-related, and one is a Microsoft defect. The root cause analysis (RCA) for the other defects is yet to be completed. CAMHD Provider Invoice Batch Printing was deployed to production on 06/05/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of work items is planned before the R4.7 go-live. Based on the ongoing FHIR User Acceptance Testing (UAT) sessions, the project anticipates that FHIR will be deployed in a release after R4.7.	U
Re	commendations	Status
	The Project should consider automating deployments for resource savings, increased efficiency, consistency, faster time to market, improved collaboration and reliability, scalability, version control integration, and rollback capability.	Open
	Ensure there are adequate and qualified resources to support the current deployment processes. This may require the support from RSM resources to provide assistance and knowledge transfer for some of the more complex deployment components.	Open

As appropriate, consult with RSM on best practices that BHA could employ to support deployment.
 Open

#### IV&V Findings & Recommendations Release / Deployment Planning (cont'd)

Recommendations	Status
<ul> <li>Request the assistance of the RSM Solution Architect in reviewing and correcting issues associated with the consistency of configurations across environments, ensuring that the test environment is capable of testing ALL functions of any given release without the need for using multiple test environments.</li> </ul>	Open
Request the assistance of the RSM Solution Architect in the review of deployment scripts as a double-check for accuracy and completeness prior to commencing deployment activities.	Open
The Project Team should consider evaluating potential changes to improve/enhance existing processes and communications to address current release/deployment shortfalls.	Open
<ul> <li>IV&amp;V recommends performing an RCA in collaboration with RSM for the continued concerns surrounding environment differences.</li> </ul>	Open
<ul> <li>IV&amp;V recommends updating the Project's Configuration Management Plan to address the current needs of the Project. This should include specific checklists geared at ensuring repeatable promotional processes by DOH.</li> </ul>	Open
<ul> <li>Look at implementing 'hard' code freeze dates as well as test environment deployment dates to ensure that testing and deployment activities are not rushed.</li> </ul>	Open
<ul> <li>Ensure an operational and fully functional test environment is available to effectively conduct end-to-end regression testing prior to deploying a release to production.</li> </ul>	Open
<ul> <li>Develop a plan to institutionalize the execution of "Smoke Testing" for promotions to non-production and production environments. This will help to ensure that all components needed to test have been properly deployed prior to the actual execution of test activities.</li> </ul>	Open

#	Key Findings	Criticality Rating
44	<ul> <li>Preliminary Concern: Delays in the posting of administrative claims are negatively affecting reimbursements.</li> <li>Finding Update: Improved coordination and communication with all involved parties are needed to address the delayed claims postings.</li> </ul>	N/A
Rec	ommendations	Status
• B	HA should continue research of this issue with MedQuest and PCG to identify any needed corrections.	In Progress
• B	HA to present any needed corrections to CMS.	In Progress

#	Key Findings	Criticality Rating
14	<ul> <li>Medium Issue: Due to multiple quality concerns, the Project may continue to face impactful system defects.</li> <li>Finding Update: R4.6 went live on 5/30/24. A hot-fix to resolve a significant problem with the Calculator was deployed on Friday, 5/31/24. Six other (6) post-production defects (5 high and 1 medium priority; 1 Microsoft defect) are planned to be deployed with R4.7. CAMHD Provider Invoice Batch Printing was deployed to production on 06/05/24. A Mid-Sprint-Deployment (MSD) comprised of the Maui Wildfire set of work items is planned before the R4.7 go-live. Based on the ongoing User Acceptance Testing (UAT) sessions, the project anticipates that FHIR will be deployed in a release after R4.7. IV&amp;V will monitor the progress and quality of R4.7 and the MSD.</li> <li>A finding (#43) related to the SharePoint folders bug was created in April 2024. The SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design.</li> </ul>	M
Recon	nmendations	Status
• Eva	luate existing project staff skills and experience level to ensure they meet BHA support requirements.	In Progress
	form CAMHD revenue neutrality fiscal balance testing on a quarterly basis to ensure revenues are as ected.	In Progress
• Ass	ign dedicated resources to provide oversight and monitoring of CAMHD Fiscal Processes	Open
• Mor	nitor implemented IV&V recommendations for effectiveness.	In Progress

#	Key Findings	Criticality Rating
33	<ul> <li>Medium Issue: Performance bottlenecks with the INSPIRE production environment may result in low productivity and poor user experience.</li> <li>Finding Update: Microsoft executed the performance test from Tuesday, 6/4/24 – Wednesday, 6/12/24 - stakeholders are awaiting delivery of the report.</li> </ul>	M
Reco	ommendations	Status
(L pe so	he last performance test was executed in June 2023 for phase 3 releases (R3.x). ~800+ new User Story Points JSPs) have been developed since the last performance test execution. IV&V recommends BHA execute a erformance test during the development of R4.6 (planned completion 5/20/24), identifying test cases and cenarios that include both DDD and CAMHD functionality, transactions/functionality that are performance tensive, e.g., calculator functionality.	Open
	onduct load and performance testing for each release that has significant new features/functionality, e.g., alculator-related transactions.	Open
С	reate a plan for comprehensive performance testing and address any performance bottlenecks.	Open
H	ave the benchmark assessments done annually and implementation of Azure App Insights for Power Platform.	Open
	xecute test scripts that measure the run-time for execution of long-running transactions. E.g., calculator nctionality/transactions and monitoring results over time.	Open

#	Key Findings	Criticality Rating	
	<b>Medium Issue:</b> Lack of a comprehensive project schedule could lead to missed tasks, project delays, and cost overruns.		
36	<b>Finding Update:</b> The Adverse Event Report (AER) Analytics project kicked off on 6/4/24. The Discovery phase of the AER analytics project is in progress. The SI vendor has provided a high-level timeline but has not yet provided a project schedule. There is uncertainty around receiving timely information from MedQuest, which will likely impact the completion of the project schedule.	M

#### # Key Findings

42

**Medium Issue:** Ineffective governance and communication among stakeholders can significantly impact a project in several ways, e.g., stakeholder disengagement, conflict and tension, misalignment of objectives, increased risks, unclear roles and responsibilities, and quality issues. An example on this project is the development and implementation of Golden Record/Master Data Management (MDM). The lack of effective governance and communication among stakeholders can result in project delays, budget overruns, and decreased quality. It's essential for project managers and stakeholders to prioritize clear communication and establish robust governance structures to ensure project success.

**Finding update:** The divisions continue to collaborate on the security assessment and remediation exercise.

Recommendations		Status
•	Create a Governance Structure: Implement a governance structure that defines decision-making processes, escalation procedures, and accountability mechanisms. Clarify how decisions will be made, who has authority, and how issues will be resolved.	Open
•	Develop a Stakeholder Registry, RACI chart, and Stakeholder Engagement Plan: Identify key stakeholders and develop a plan to engage them throughout the project lifecycle. Tailor communication strategies to address the needs and preferences of different stakeholders, ensuring their active involvement and support.	Open
•	Clearly define Roles and Responsibilities: clearly outlining the roles and responsibilities of each stakeholder involved in the project, would ensure that everyone understands their duties and how they contribute to the project's success.	Open

Criticality

Rating

M

Recommendations	
<ul> <li>Encourage Open Communication and Feedback: Foster a culture of open communication and feedback where stakeholders feel comfortable sharing their thoughts, concerns, and suggestions. Encourage constructive dialogue and actively seek input to improve decision-ma problem-solving. Keep stakeholders informed about project progress, milestones, and key de through regular updates and progress reports. Highlight achievements, challenges, and any c project plan or scope.</li> </ul>	velopments
<ul> <li>Resolve Conflicts Promptly: Address conflicts and disagreements among stakeholders prompt and professionally. Encourage dialogue, active listening, and compromise to find mutually acc solutions that support project goals.</li> </ul>	·
<ul> <li>Manage Expectations: Manage stakeholders' expectations by setting realistic timelines, budge and deliverables. Foster a culture of transparency about project constraints and risks and proactively communicate any changes or deviations from the plan.</li> </ul>	ets, Open
<ul> <li>Evaluate and Adapt: Continuously evaluate the effectiveness of governance and communicati processes and adjust as needed. Solicit stakeholders' feedback to identify areas for improvement continuously refine your approach.</li> </ul>	

#	# Key Findings	
45	<ul> <li>Preliminary Concern: The current process does not allow BHA to track actual costs versus budgeted costs for large functionality such as FHIR or Golden Record. By incorporating a clear process that would allow BHA to monitor costs of large functionality, BHA could maintain better financial records, and it would allow BHA to track actual versus budgeted costs.</li> <li>Finding update: BHA Stakeholders plan to evaluate process options. See new IV&amp;V recommendation below.</li> </ul>	N/A
Dec		Ctatura
Rec	commendations	Status
	For Big Rock items such as FHIR, IV&V recommends the SI vendor reports the User Stories Points (USP) when the USPs exceed the budgeted USPs.	New
	V&V recommends that BHA Stakeholders evaluate process options and agree on a process that would allow BHA to track actual costs versus budgeted costs of large functionality such as FHIR and Golden Record.	Open
t k	V&V recommends that BHA stakeholders agree on the level of granularity, e.g., by user story or functionality, hat would allow stakeholders to have reliable answers to important questions such as how much money has been spent on developing Fast Health Interoperability Resources (FHIR) functionality or Golden Record (GR) unctionality or on developing specific user stories.	Open

#### IV&V Findings & Recommendations Resource Management

#	Key Findings	Criticality Rating
34	<ul> <li>Medium Issue: A shortage of Behavioral Health Administration (BHA) project resources could lead to reduced productivity and project delays.</li> <li>Finding Update: DDD is currently evaluating options to add an automated regression testing resource. The State has approved the variance for a Business Analyst (BA) position.</li> </ul>	M
Red	commendations	Status
• 6	3HA should explore options for offloading project team members' daily responsibilities to other staff.	In Progress
• 6	3HA should work quickly to backfill vacated project team member positions.	In progress
	BHA should identify tasks and duties that they can ask the SI to assume, as permitted by the contract, which are presently being handled by BHA members.	In progress
• 6	3HA should explore the use of contractors to fill open project positions.	In progress

# **Appendix A: IV&V Rating Scales**

#### Appendix A IV&V Rating Scales

This appendix provides the details of each finding and recommendation identified by IV&V. Project stakeholders are encouraged to review the findings and recommendations log details as needed.

- See Findings and Recommendations Log (provided under separate cover)
- IV&V Assessment Category Rating Definitions

The assessment category is under control and the current scope can be delivered within the current schedule. The assessment category's risks and issues have been identified, and mitigation activities are effective. The overall impact of risk and issues is minimal.

The assessment category is proceeding according to plan (< 30 days late).

The assessment category is under control but also actively addressing resource, schedule or scope challenges that have arisen. There is a clear plan to get back on track.

The assessment category's risk and/or issues have been identified, and further mitigation is required to facilitate forward progress. The known impact of potential risks and known issues are likely to jeopardize the assessment category.

Schedule issues are emerging ( > 30 days but < 60 days late).

Project Leadership attention is required to ensure the assessment category is under control.

The assessment category is not under control as there are serious problems with resources, schedule, or scope. A plan to get back on track is needed.

The assessment category's risks and issues pose significant challenges and require immediate mitigation and/or escalation. The project's ability to complete critical tasks and/or meet the project's objectives is compromised and is preventing the project from progressing forward.

Significant schedule issues exist (> 60 days late). Milestone and task completion dates will need to be re-planned. Executive management and/or project sponsorship attention is required to bring the assessment category under control.

 $(\mathbf{Y})$ 

R

## Appendix A Finding Criticality Ratings

Criticality Rating	Definition
•	A high rating is assigned if there is a possibility of substantial impact to product quality, scope, cost, or schedule. A major disruption is likely, and the consequences would be unacceptable. A different approach is required. Mitigation strategies should be evaluated and acted upon immediately.
M	A medium rating is assigned if there is a possibility of moderate impact to product quality, scope, cost, or schedule. Some disruption is likely, and a different approach may be required. Mitigation strategies should be implemented as soon as feasible.
0	A low rating is assigned if there is a possibility of slight impact to product quality, scope, cost, or schedule. Minimal disruption is likely, and some oversight is most likely needed to ensure that the risk remains low. Mitigation strategies should be considered for implementation when possible.

# **Appendix B: Inputs**

#### Appendix B Inputs

This appendix identifies the artifacts and activities that serve as the basis for the IV&V observations.

#### Meetings attended during the June 2024 reporting period:

- 1. Daily Scrum Meetings
- 2. Daily Design Meetings
- 3. Twice Weekly RSM Issues Meeting
- 4. Weekly BHA-ITS Program Status Meeting
- 5. Bi-Weekly Check-in: CAMHD
- 6. Bi-Weekly Check-in: DDD
- 7. BHA (CAMHD & DDD) IV&V Joint Meeting
- 8. IV&V Draft IV&V Status Review Meeting with DOH
- 9. IV&V Draft IV&V Status Review Meeting with RSM and DOH
- 10. DOH BHA IT Solution Project Steering Committee
- 11. US# Testing & Request Items
- 12. AER Analytics Kick-Off Meeting
- 13. AER Analytics: Discovery Meeting
- 14. AER Bi-weekly Meeting

#### Eclipse IV&V<sup>®</sup> Base Standards and Checklists

#### Artifacts reviewed during the June 2024 reporting period:

- 1. Daily Scrum Notes
- 2. Twice Weekly Issues Meeting Notes
- 3. Weekly BHA-ITS Program Status Report

43	Execution time for the process for updating DDD SharePoint folders was unacceptable.	The existing DDD SharePoint documents and folders update process is intensive and the execution time was unacceptable - this process took 11 calendar days to execute in production with R4.4.	This process is part of several intense processes that update SharePoint documents and folders. The SI vendor recommended against doing this intensive process. However, no feasible alternative solutions were provided and this process was implemented. BHA has the flexibility to refine and alter their SharePoint directory structure. As a result, per the SI vendor, the process does not pick up continuously evolving permutations of folder structures in Production, nor can the execution time be estimated or benchmarked. Per discussions between the SI vendor and BHA over many months, this process was not going to complete 100% of the operations because of the different folder structures in Production. And this process/jobs has been updated many times to address different folder structures that were captured during testing, but there is no guarantee that it covers every possible scenario - some operations failed because the folder structure was not encountered during testing, which was an expected event. The folders in Production that were not picked up with Flow were supposed to be manually updated. The current solution utilizing Power Automate provided the necessary steps to automate this process, but it was never going to capture 100% of folders. And the process took 11 calendar days to execute in production.	IV&V recommends doing an Impact analysis, e.g., downstream impact. IV&V recommends DDD puts on hold any development utilizing Power Automate for the performance issue encountered in production (marked "TBD" in finding #14 related to "SharePoint Bulk Flows still running"), related user stores, e.g., "Changes to DDD folders", and defects. IV&V recommends evaluating other feasible options, e.g., leveraging SharePoint tools and best practices. A project issue should be opened to identify and manage the resolution of this issue.	06/30/2024 - The SI vendor and BHA are finalizing the Business Requirements Document (BRD) and the design of the proposed solution. 05/31/2024 - The SI vendor has engaged a SharePoint Subject Matter Export (SME) and is currently analyzing options. 04/30/2024 - Finding identified by IV&V.	Release/Deployment Planning	Issue	Medium	Open		4/30/2024	Gulvady	
44	Delays in the posting of administrative claims are negatively affecting relimbursements.	BHA has discovered delays in the posting of administrative claims as far back as three years.	These claims with delayed posting are eligible for a 90%/10% match from CMS. There are delayed payments identified as far back as three years, which caused claims to be filed in later years. These claims draw from the raw budget in the year they are filed. This affects reimbursements and could potentially delay the submission of IAPDU-7, which could impact funding.	BHA should continue research of this issue with MedQuest and PCG to identify any needed corrections. BHA to present any needed corrections to CMS.	06/30/2024 - Improved coordination and communication with all involved parties are needed to address the delayed claims postings. 05/31/2024 - BHA met with CMS and MedQuest to discuss an approach forward. Funds can not be added to a year once it has closed. BHA will request additional funds for FV24 to account for the claims that have posted late. 4/30/2024 - Finding identified by IV&V. 45	The current process does not allow BHA to track actual costs versus budgeted costs by feature/functionality.	The current invoices from the System Integrator (SI) vendor lack sufficient details that would allow BHA to track actual costs versus buggeted costs by, e.g., features such as FHIR, Golden Record or by user story.	The current process does not allow BHA to track actual costs versus budgeted costs of large functionality such as Fast Health Interoperability Resources (FHR) or the Golden Record (GR). The absence of a clear process doesn't give insight into, e.g., how much of the budget has gone into developing functionality such as FHIR or GR functionality. By incorporating a clear process that would allow BHA to monitor costs of large functionality, BHA can maintain better financial records and it would allow BHA to track actual versus budgeted costs and answer questions, e.g., "how much money has been spent on developing FHIR or Golden Record (GR) functionality?"	IVV recommends that BHA Stakeholders should evaluate process options and agree on a process that would allow BHA to track actual costs versus budgeted costs of large large functionality such as FHIR, Golden Record. IV&V recommends that BHA stakeholders agree on the level of granularity, e.g., by user story or functionality, that would allow stakeholders to have reliable answers to important questions such as how much money has been spent on developing Fast Health Interoperability Resources (FHIB) functionality or Golden Record (GR) functionality or on developing specific user stories.	06/30/2024 - BHA Stakeholders plan to evaluate process options. See new IV&V recommendation below. 05/31/2024 - BHA Stakeholders to evaluate process options, e.g., through Azure DevOps.	Project Management	Preliminary Concern		Open		5/25/2024	Gautam Gulvady
