**In consideration of  
HOUSE BILL 2263  
RELATING TO THE EAST KAUA'I IRRIGATION SYSTEM**

House Bill 2263 proposes to appropriate funds to the Agribusiness Development Corporation (ADC) to establish positions to maintain and improve the East Kaua'i Irrigation System and for maintenance of and improvements to the system. **The Department of Land and Natural Resources (Department) supports this measure.**

The East Kaua'i Irrigation System was formerly under the management of the East Kaua'i Water Users Cooperative (EKWUC) via a month to month revocable permit. On September 3, 2019, the EKWUC voted against the continuation of their revocable permit which expired on December 31, 2019. The irrigation system, including the reservoir, has since reverted to the Department's management beginning January 1, 2020. The Department's current oversight of the irrigation system is focused on addressing public health and safety and preserving the viability of the irrigation system for future use, but not for the continued delivery of water to various users. As an interim measure, the Department has used its limited operating funds to hire a contractor to operate and maintain the system on a limited basis to address public health and safety issues.

The Department's primary objective has been to identify an appropriate agency that can assume management and operation of the system as had previously been done by EKWUC. Working toward this goal, the Department has had discussions with ADC regarding transferring the system to ADC for operation and management. The Department understands that ADC would need financial and staffing support and believes this measure would satisfy that objective, thus ensuring

the ongoing operation of the irrigation system by ADC in support of local agriculture. Furthermore, the Department does not have the resources and expertise to function as a water delivery provider, which would be inconsistent with the Department's mission of natural, cultural, recreational and historical resource management and protection.

Thank you for the opportunity to testify on this measure.

**HOUSE BILL NO. 2263  
RELATING TO EAST KAUAI IRRIGATION SYSTEM**

Chairperson Ichiyama, Vice Chair Poepoe, and Members of the Committee:

Thank you for the opportunity to testify in support of House Bill No. 2263, which appropriates funds to the Agribusiness Development Corporation (ADC) to establish positions to maintain and improve the East Kauai irrigation system and for maintenance of and improvements to the system.

The East Kauai Irrigation System (EKIS) includes the Hanamaulu Ditch, a branch of the system, that provides irrigation water to ADC tenants for their operations. At its peak, EKIS consists of 51 miles of ditch, 18 diversions, and delivered 80-100 million gallons of water per day to the surrounding plantation lands. In recent years, following the departure of Lihue Plantation and the dissolution of the East Kauai Water Users' Co-op, the Hanamaulu Ditch has fallen into disrepair resulting in loss of water to affected ADC farmers and

ranchers. In many cases, ADC's tenants themselves have been doing minor repairs and maintenance to restore water access.

ADC is seeking funding and positions to preserve the EKIS, which could potentially provide thousands of acres of state and private land with access to irrigation water. Additionally, the funding will be used to ensure the associated reservoir spillways are compliant with all relevant dam safety requirements. These are critical safety issues that need to be addressed immediately.

ADC believes these investments will ensure the system can deliver a reliable source of water for another hundred years. Furthermore, ADC will be able to attract and support agribusinesses and producers to promote agriculture and preserve the region's rural character.

We support this bill provided that its passage does not replace or adversely impact priorities indicated in our Executive Budget. Thank you for your consideration of our testimony.

# OFFICE OF THE MAYOR

DEREK S.K. KAWAKAMI, MAYOR

REIKO MATSUYAMA, MANAGING DIRECTOR

## Testimony of Derek S.K. Kawakami

Mayor, County of Kaua'i

Before the

### House Committee on Water & Land

February 8, 2024; 9:00 AM

Conference Room 430 & Videoconference

In consideration of

### House Bill 2263 Relating to the East Kaua'i Irrigation System

Honorable Chair Ichiyama, Vice Chair Poepoe, and Members of the Committee:

The County of Kaua'i is in **strong support** of HB 2263 which appropriates funds to the Agribusiness Development Corporation to establish positions to maintain and improve the East Kaua'i irrigation system and for maintenance of and improvements to the system.

Historically, the East Kaua'i Water Users' Cooperative managed the twenty-two-mile ditch system and two State-owned reservoirs in the Kapa'a and Kalepa area for eighteen years; more recently, East Kaua'i Irrigation has supported the operation and maintenance of the system.

This irrigation system is not only crucial in maintaining our storm water but also in allowing our small farms and ranches to increase local food production and provide food security. Additionally, the system is a critical source of water for land held by the Department of Hawaiian Home Lands.

The County of Kaua'i strongly supports appropriating funds to the Agribusiness Development Corporation to maintain and improve this critical infrastructure. The creation and funding of three positions to support this endeavor is necessary for the success of our farmers and ranchers, and for the development of a plan to deliver water to land held by the Department of Hawaiian Home Lands.

Mahalo for the opportunity to testify in **strong support** of this important measure.

**HB-2263**

Comments:

Reservoirs serve a multitude of purposes in particular the Wailua reservoir on Kaua'i. From irrigation uses for farmers and ranchers to industrial and recreational use. The reservoirs retain storm water to preventing flooding, recharge the aquifers and provide potable drinking water. These same reservoirs also play a crucial role in fire prevention, acting as a vital water source for fire departments to combat any potential fire outbreaks. Fire departments must have full access to all the reservoirs, enabling them to airlift water to fire sites swiftly.

Reservoirs are a vital and necessary resource. Once not maintained or decommissioned they are gone forever. please pass this bill! Water is life and no water no food!

HOUSE COMMITTEE ON WATER & LAND  
Thursday, February 8, 2024 — 9:00 a.m.

**Ulupono Initiative supports HB 2263, Relating to the East Kaua'i Irrigation System.**

Dear Chair Ichiyama and Members of the Committee:

My name is Micah Munekata, and I am the Director of Government Affairs at Ulupono Initiative. We are a Hawai'i-focused impact investment firm that strives to improve the quality of life throughout the islands by helping our communities become more resilient and self-sufficient through locally produced food, renewable energy, clean transportation choices, and better management of freshwater resources.

**Ulupono supports HB 2263**, which appropriates funds to the Agribusiness Development Corporation to establish positions to maintain and improve the East Kaua'i Irrigation System and for maintenance of and improvements to the system.

Ulupono supports the affordable access to water resources for local food producers across the State. The East Kaua'i Irrigation System is critical for local farmers on the island and directly supports Hawai'i's food production goals. Without access to water, agriculture does not exist. It is important for the State to support the operation and maintenance of irrigation systems statewide in order to meet Hawai'i's food security and sustainability goals.

Thank you for the opportunity to testify.

Respectfully,

Micah Munekata  
Director of Government Affairs

*Investing in a Sustainable Hawai'i*

State Capitol, 415 South Beretania Street, Honolulu, HI 96813

**RE: Support for HB2263**

Dear Chair Ichiyama, Vice Chair Poepoe, and Distinguished Members of the Committee:

On behalf of the Kaua'i Chamber, I write to express our strong support for HB2263, which has been introduced by all three of Kauai's representatives, and seeks to appropriate funds to the Agribusiness Development Corporation for the establishment of positions to maintain and improve the East Kaua'i irrigation system, as well as for maintenance of and improvements to the system itself. This bill aligns with the Chamber's goal to enhance the island's overall economic health and quality of life for its residents, and our vision of a sustainable, thriving economy on Kaua'i.

The East Kaua'i irrigation system and the Wailua Reservoir are not merely relics of Hawai'i's plantation past; they are vital components of our island's future. These resources are essential for growing our own food, providing recreational spaces for families, and protecting our communities from both flood and fire. The preservation and enhancement of this infrastructure directly align with the Chamber's goals, which emphasize economic growth and diversification, with a particular focus on agriculture and environmental stewardship.

HB2263's provisions for funding and staffing are crucial steps towards ensuring the continued vitality of Kaua'i's agricultural sector, supporting diversified agriculture, and promoting agricultural self-sufficiency. By maintaining and improving the East Kaua'i irrigation system, we not only conserve water resources in alignment with state and federal regulations but also support the expansion of farmland, thereby enhancing our local food production capabilities and sustainability efforts.

The Kaua'i Chamber is committed to advocating for policies that support our island's businesses and residents, reduce regulatory burdens, and manage growth in a way that improves the quality of life for all. HB2263 represents an opportunity to advance these objectives, ensuring that Kaua'i remains a vibrant, resilient community for generations to come.

We urge lawmakers and the community to support this important legislation, recognizing the critical role that the East Kaua'i irrigation system and Wailua Reservoir play in our island's economic and environmental future.

Thank you for considering our support for HB2263. We look forward to working together to secure the passage of this vital piece of legislation.

Sincerely,

Mark Perriello  
President & CEO

February 8, 2024

HEARING BEFORE THE  
HOUSE COMMITTEE ON WATER AND LAND

**TESTIMONY ON HB 2263**  
RELATING TO THE EAST KAUAI IRRIGATION SYSTEM

Conference Room 430 & Videoconference  
9:00 AM

Aloha Chair Ichiyama, Vice-Chair Poepoe, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate and advance the social, economic, and educational interests of our diverse agricultural community.

**The Hawai'i Farm Bureau supports HB 2263**, which appropriates funds to the Agribusiness Development Corporation to establish positions to maintain and improve the East Kauai irrigation system and for maintenance of and improvements to the system.

Since the demise of plantation operations across the islands, we have seen the erosion of irrigation systems. Ditches that carried water fell into disrepair with major leaks in the system and in cases such as Ka'u, cracks in tunnels created enough losses that there was no longer a significant flow of water. The Legislature continues to advocate for increased self-sufficiency, sustainability, and food security. Agriculture will play a key role in the achievement of these goals and for there to be agriculture, water is critical.

The East Kauai Irrigation System previously serviced 12,500 acres of agricultural land on Kauai. The repair and maintenance of this 21-mile irrigation system are critical for Kauai's farmers who depend on the East Kauai Irrigation System for their operations. Water availability is a basic necessity needed by farmers and ranchers to maintain and expand their production, particularly in times of drought. Having access to a reliable and affordable water supply is a key factor when Hawai'i's farmers and ranchers are making decisions to start new or expand existing operations.

Thank you for this opportunity to testify on this important matter.

HB2263, Relating to The East Kauai Irrigation System  
House WAL Hearing  
Thursday, February 8, 2022  
9:00am

Testimony By: Larry Jeffs  
Position: Support

Chair Ichiyama and Vice Chair Poepoe and Members of the House WAL Committee:

I am Larry Jeffs, owner and operator of Larry Jeffs Farms, LLC. We have more than 42 years of Hawaii farm experience on Molokai and Oahu. Our family farms grow about 1 million pounds of import replacement produce weekly. I am a volunteer director, serving as Chair of the West Oahu Soil and Water Conservation District (SWCD). I have been an officer of the Hawaii Farm Bureau for many years.

Water is the lifeblood of all farmers, and without affordable and accessible water, there will be no farming. No farming, no locally grown produce and livestock.

This measure provides appropriations to the ADC for maintaining and improving the East Kauai Irrigation System. This century-old system is in needed repair, renovation, and other improvements. The alternative to no funding is decommissioning, which directly impacts 5,920 acres of agricultural land. Further, successful maintenance and improvements to the system has the potential to serve as much as 300 acres of additional farmland.

Thank you for the opportunity to present testimony.

Comments:

Members,

I submit my testimony in support of this measure. As you may know that the DLNR is slated to shutdown the Irrigation system formerly known as the East Kauai Water Company, The system includes reservoirs also slated to be shutdown. The originating system is vital to Agricultural crops grown, and an expected growth of agriculture to license holders of ADC. The original EO for these state owned lands was secured without an EO for the irrigation system, water is vital to the continued growth towards the Governor plan of food security and sustainability. Without water you cannot grow food crops of any substance and progress towards a sustainable ag state. Please consider passing the legislation before you, I am in full support of this measure along with the local constituents of the island of Kauai.

Mahalo,

Lyle Tabata

ADC Vice Chair

Committee on Water and Land  
Rep. Linda Ichiyama, Chair  
Rep. Mahina Poepoe, Vice Chair

### **Testimony on HB 2263 Relating to the East Kauai Irrigation System February 8, 2024, Conference Room 430**

Chairperson Ichiyama and Members of Committee:

We are writing today in favor of HB2263. We were a founder member of the East Kauai Water Users' Cooperative Board of Directors and understand the vital importance of these ditch systems for agriculture in each part of Kauai. The Coop closed down at the beginning of 2020, unable to afford the cost of applying for a long-term license as required by BLNR. It was clear to us at the time that only a State agency could manage the system and were greatly encouraged when ADC expressed strong interest in doing so.

The water supplied by the system is important to the Church for both its 70 acres of fee-simple land in Wailua Homesteads just below Wailua Reservoir and its 300+ acres on Kalepa lands now held by the Church under a 35-year license agreement with ADC. Lateral One ditch from Wailua Reservoir supplies water to the Church's land and is used for our veggie growing and by our cows. In addition, the water flow is a major asset to the property, for beauty, as a sanctuary for various birds and plants and as a sacred meditation garden for over 15,000 Hindu pilgrims each year.

The agriculture industry remains an essential component of Hawaii's economic landscape and is only possible with a reliable supply of water. The East Kauai system can irrigate 4,000 acres of productive farm land which has in past years produced millions of dollars worth of sugar cane. Its multiple reservoirs and 30 plus miles of ditch are an irreplaceable State-owned resource valued by experts at hundreds of millions of dollars.

We urge your committee to back the community's grass roots efforts to preserve and operate this system through the Agribusiness Development Corporation.

**RE: Testimony on HB 2263 Relating to the East Kauai Irrigation System  
February 8, 2024, Conference Room 430**

Chairperson Ichiyama and Members of Committees:

My name is Les Milnes and I support HB2263. I am the president of the Kalepa Koalition, an Hawaii agricultural cooperative of the farmers and ranchers who hold long-term licenses on 6,500 acres of State land behind Kalepa Ridge on Kauai and under the administration of ADC.

The East Kauai Irrigation System services a large portion of the Kalepa lands; most of the farmers, ranches and the huge Mahipapa LLC (formerly Green Energy Team) biomass project on a 1,000 acres utilize the system through Hanamaulu Ditch or off the Upper and Lower Ahoaka Reservoirs. A large parcel of Hawaiian Home Lands is serviced by the east side of the system. Also, the system can delivery water to some 2,000 agriculture acres north of the Kalepa lands behind Kapaa.

The system was previously managed by the East Kauai Water Users Cooperative, of which I was an integral part. However, following the Maui water use decision cancelling the ability of DLNR to issue year-to-year revocable permits for water, it simply became impossible for the Coop to finance the very high cost of obtaining a long term lease. Indeed, even well funded businesses, such as KIUC, have been unable to obtain longterm licenses, despite decades of effort. These State-owned water systems can only be managed by State agencies, in this case ADC which has come forward to take over the system. Their efforts to take over the system are in line with the State's declared intention to provide water for agriculture. ADC sees the need to protect this immense and irreplaceable resource absolutely essential for the present needs and future development of Kauai's farmers and ranchers.

I respectfully request that this bill be passed.

Comments:

I strongly support ADC managing the east Kaua'i water system as millions have been invested by the state to remediate the wailua reservoir and the conversation of decommissioning is absurde just because of a lack of leadership. If ADC, who needs the water for Kalepa, wants to manage it. Please support that request and fund them!

Comments:

Strong Support for developing and maintaining storage and distribution of Agricultural use WATER. In Koloa, the Hawaiians showed us how. Now, water resources are being neglected and destroyed, while legitimate AG lands lack the Water for usefulness. Anahola Hawaiian Homes destruction of three reservoirs is an example, while Makai properties can not count on water availability.

While Zoning has protected Agricultural use of appropriate land classes, the Water resource necessary for productive use of land has been mis-managed and unplanned.

CWRMS/DLNR is ill prepared for the forward thinking necessary to plan the efficient use of this resource; CLEAN WATER. Managing this Primal Element is the responsibility of the State of Hawaii.

Supporting the East Kauai water system is a strong step in a responsible direction.

RE: **Testimony on HB 2263 Relating to the East Kauai Irrigation System  
February 8, 2024, Conference Room 430**

Chairperson Ichiyama and Members of Committee:

My name is Jerry Ornellas and I support HB2263. I was the president of the East Kauai Water Users' Cooperative which managed the State-owned reservoir and ditch system in the Kapaa/Kalepa area from 2001 to 2020 under a year-to-year revocable permit from the Department of Land and Natural Resources.

On September 20, 2016, the Cooperative was informed by DLNR that as a consequence of the East Maui irrigation decision we would have to seek a long-term water lease. We were given three years to complete the application process which included an Environmental Impact Statement—alone is beyond our monetary resources to pay for—as well as other complex requirements. Even if we had the monetary resources to meet the requirements, we could only bid on the system at public auction with no guarantee that we would ultimately be awarded a lease for the system.

Once the three years expired at the beginning of 2020, DLNR no longer could legally renew the system's revocable permit, the Coop ceased operation. The irrigation system, including the recently renovated Wailua and Upper Kapahi Reservoirs, reverted to DLNR control (including dam safety oversight). DLNR has minimally managed the north side of the system since.

Our system includes three reservoirs and 22 miles of ditch which has historically serviced thousands of acres of State and private lands. In particular, it can supply irrigation water to more than 1,000 acres of the State Kalepa lands located between Kapaa and Lihue, and a similar amount of private former cane lands mauka of Kapaa town. When first taken out of sugar cane in 2001, the Kalepa lands had gone into pasture, but in the last few years, through the good action of the Agribusiness Development Corporation, nearly 500 acres to date has been leased to farmers who are actively developing their crops, including ginger, bananas, noni and sweet potatoes. This is only possible because the Coop provided these farms with water through Hanamaulu Ditch.

These Kalepa lands in particular are in a precarious position. Technically, the Hanamaulu Ditch remains under DLNR control, while the surrounding land has been transferred by executive order to ADC. Since the water coop shut down, there has been no formal permit or license issue to operate the ditch, and no

formal management. Grove Farm continues to supply South Fork water to the ditch, and the local farmers and ranchers maintain the water flow in the ditch. The ditch also supplies the Hawaiian Homelands mauka of Kalepa ridge from Reservoir 21. This, again, is being done on an informal, permit-less basis.

Aside from the State lands and private Kapaa parcel, the Coop system can service thousands of acres of so-called “marginal lands”—those not taken by the cane companies and now privately owned. These are located throughout Kapaa and are or could be productive agricultural lands, such as my own farm.

In 2001, ITC Water Management, hired by the State to evaluate the East Kauai system, estimated the cost to build it in 2001 to be in excess of \$200 million. We are talking about the potential loss of a substantial and irreplaceable State asset.

We are therefore in favor of HB2263 allowing the East Kauai system be taken over by the Agribusiness Development Corporation. This is in keeping with the mandate of Article XI, Section 3, of the State Constitution: “The state shall conserve and protect agricultural lands, promote diversified agriculture, increase agricultural self-sufficiency and assure the availability of agriculturally suitable lands.”

Furthermore, Hawaii Revised Statute 167-1, Irrigation Water Development, states: “Findings and declaration of necessity. It is important to the welfare of the people of Hawaii that agricultural production be developed as fully as possible. It is further found that water presently tapped for irrigation is inadequate for the fullest development of the economy of the State. It is therefore hereby declared that additional water and water facilities are necessary for the development of agriculture in the State.”

The statute recommends development of new water facilities, what to say of preserving the ones we already have.

In 2003, the Department of Agriculture released its comprehensive Agricultural Water Use and Development Plan which analyzed the development and present status of State’s plantation-developed irrigation systems and concluded that the East Kauai System was among five State systems “important and viable to Hawaii’s growing diversified agricultural industry.”

The Agribusiness Development Corporation is the natural State agency to manage this public water system, as is the pattern in most other states in the country. It is also the only long-term, permanent way to manage the system for the benefit of our citizens.

I respectfully ask that you pass this bill.

**East Kauai Water Users’ Cooperative**
