Comments:

My name is Milana Gasparyan and I STRONGLY SUPPORT SCR220.

I would like to urge the Hawaii construction industry to embrace and prioritize sustainable practices by increasing the recycling of construction and demolition debris and expanding the usage of recycled construction materials to the greatest extent possible.

As residents of this beautiful state, we are all stewards of its natural beauty and resources. Hawaii's unique environment demands that we take proactive steps to minimize waste and reduce our environmental impact. One crucial area where we can make significant strides is in the construction industry.

Construction and demolition activities generate a substantial amount of waste, including concrete, wood, metal, and other materials. By implementing robust recycling programs and promoting the use of recycled materials in construction projects, we can achieve multiple benefits.

I would like to strongly encourage the committees to PASS this measure. Mahalo for the opportunity to testify.
