Statement of
DEAN MINAKAMI
Hawaii Housing Finance and Development Corporation
Before the

HOUSE COMMITTEE ON AGRICULTURE & FOOD SYSTEMS

February 12, 2025 at 9:30 a.m.
State Capitol, Room 325

In consideration of
H.B. 1294 HD1
RELATING TO AGRICULTURAL WORKFORCE HOUSING.

Chair Kahaloa, Vice Chair Kusch, and members of the Committee.

HHFDC **supports** HB 1294 HD1, which establishes an Agricultural Workforce Housing Working Group within the Department of Agriculture to address the shortage and challenges of agricultural workforce housing in the State. It also requires reports to the Legislature and appropriates funds. HHFDC supports the measure so long as it does not adversely impact priorities identified in the Executive Budget Request for FY 2026.

HHFDC is named as a member of the working group and agrees that collaboration would be a valuable way to address the shortage and challenges of agricultural workforce housing in the State.

Thank you for the opportunity to testify on this bill.

Statement of
MARY ALICE EVANS, Director

before the
HOUSE COMMITTEE ON AGRICULTURE AND FOOD SYSTEMS

Wednesday, February 12, 2025

9:30 AM

State Capitol, Conference Room 325

in consideration of
HB 1294, HD1
RELATING TO AGRICULTURAL WORKFORCE HOUSING.

Chair Kahaloa, Vice Chair Kusch, and Members of the House Committee on Agriculture and Food Systems.

The Office of Planning and Sustainable Development (OPSD) **supports** HB 1294, HD1, which would establish a multi-sector agricultural workforce housing working group to examine a range of tools and strategies to address the need for agricultural workforce housing in the State.

OPSD recognizes farmworker housing has been a long-standing concern for the agricultural sector in Hawai'i, and that overcoming the shortage of farmworker housing is vital to the long-term viability of agricultural producers. To this end, the Administration submitted HB 1013, which allows for farmer and farm worker cluster housing on lands designated as important agricultural lands that, if enacted, would provide a measure for addressing this issue.

OPSD stands ready to participate in the working group. Such a working group would be useful in determining how we, as a State, could collectively meet the industry's need for farmworker housing while protecting agricultural lands from non-agricultural residential uses.

Thank you for the opportunity to testify on this measure.

9:30 AM
CONFERENCE ROOM 325

HOUSE BILL NO. 1294, HOUSE DRAFT 1
RELATING TO AGRICULTURAL WORKFORCE HOUSING.

Chair Kahaloa, Vice Chair Kusch and Members of the Committee:

Thank you for the opportunity to provide testimony on House Bill No. 1294, House Draft 1 that requires the Department of Agriculture (Department) to establish and provide administrative support to a 29-member Agricultural Workforce Housing Working Group to address the "shortage and challenges of agricultural workforce housing in the State". The bill requires an interim report to the Legislature prior to the 2027 session and the final report by the 2028 session. There are two separate appropriations of \$800,000 each for FYs 25-26 and 26-27 to gather the necessary data and prepare the required report, including any consultation fees and related expenses. The Department appreciates this measure's intent and offers comments.

The Department recommends that an early task of the Task Force, once established, is to gather data and information and survey farm operators to assess the realistic demand for farm workers. This information would inform a targeted rather than broad assessment of agricultural workforce housing needs. For instance, in 2022, 59 percent of Hawaii's 6,569 farms (federal definition) made less than \$10,000 a year in revenue from agricultural product sales. We do not know if these lower-income farm operations are able to hire farm workers, much less afford building and operating on-farm worker housing or be able to participate in alternative worker housing. A possible solution may be congregate living facilities located in the vicinity of where these small farm operations are aggregated.

Thank you for the opportunity to present our testimony.

HOUSE BILL NO. 1294
RELATING TO AGRICULTURAL WORKFORCE HOUSING

Chairperson Kahaloa, Vice Chair Kusch, and Members of the Committee:

The Agribusiness Development Corporation (ADC) **supports** House Bill No. 1294 HD1, which seeks to address the critical shortage of workforce housing for agricultural employees in Hawaii. This bill is an essential step toward supporting the agricultural sector, ensuring the stability of Hawaii's farming workforce, and promoting food security by enabling farmworkers to live closer to the lands they cultivate and care for. We also acknowledge and support the inclusion of ADC as a member of the proposed working group tasked with implementing this initiative, ensuring that workforce housing solutions align with the unique needs of farmers and agricultural employees across the state.

The Need for Workforce Housing in Agriculture

Hawaii's agricultural industry is a cornerstone of the state's economy, cultural heritage, and food security goals. However, the high cost of living, limited affordable housing options, and lack of workforce housing near agricultural lands create significant barriers for farmworkers and their families.

Without adequate housing, many agricultural employees are forced to commute long distances or live in substandard conditions, contributing to worker shortages, increased operating costs for farmers, and decreased productivity. Workforce housing is critical for maintaining a reliable, skilled workforce that supports Hawaii's agriculture and food security initiatives.

How House Bill No. 1294 HD1 Supports Agricultural Employees and Employers

House Bill No. 1294 HD1, provides a framework to develop, incentivize, and facilitate the creation of workforce housing on or near agricultural lands, which will:

1. **Stabilize the Agricultural Workforce:** Providing affordable and accessible housing will help retain skilled workers, attract new talent to the agricultural sector, and reduce turnover rates that disrupt farm operations.
2. **Enhance Productivity:** By reducing commute times and ensuring workers have safe and stable living conditions, House Bill No. 1294 HD1, supports a more reliable and productive workforce, benefiting farmers and the agricultural economy.

3. **Support Food Security Goals:** A stable agricultural workforce is essential to achieving Hawaii's goal of doubling local food production by 2030, as outlined in the Hawai'i 2050 Sustainability Plan.
4. **Reduce Barriers for Farmworkers:** Many farmworkers face financial challenges due to Hawaii's high cost of living. Workforce housing alleviates this burden, allowing workers to focus on their contributions to local food production.
5. **Create Opportunities for Rural Communities:** Workforce housing projects will stimulate economic development in rural areas, support local businesses, and strengthen community ties.

ADC's Role in the Working Group

The inclusion of ADC on the proposed working group is a critical component of the success of this initiative. As the state's lead agency for agricultural land management and development, ADC is uniquely positioned to bring its expertise and resources to the table.

In its role on the working group, ADC will:

- **Identify Suitable Sites:** Work to identify lands under its management that are appropriate for workforce housing projects, ensuring proximity to active agricultural operations.
- **Collaborate with Stakeholders:** Partner with farmers, housing developers, local governments, and community organizations to design and implement

housing solutions that are affordable, sustainable, and compatible with agricultural land use.

- **Promote Sustainability:** Advocate for the integration of renewable energy, water-efficient systems, and environmentally responsible practices in workforce housing developments.
- **Ensure Agricultural Compatibility:** Ensure that housing developments on agricultural lands do not interfere with or reduce agricultural productivity.
- **Support Funding Efforts:** Collaborate on securing federal, state, and private funding to support the development and maintenance of workforce housing projects.

Alignment with Statewide Goals

House Bill No. 1294 HD1 aligns with several critical state priorities, including:

- **Hawai'i 2050 Sustainability Plan:** Workforce housing supports the agricultural workforce needed to increase local food production and reduce reliance on imported goods.
- **Economic Development:** Stable housing for farmworkers fosters economic growth in rural communities and helps sustain local farming operations.
- **Social Equity:** Providing affordable housing ensures that farmworkers and their families can live with dignity, stability, and access to basic services.

Conclusion

The passage of House Bill No. 1294 HD1 is essential for addressing the housing needs of Hawaii's agricultural workforce and supporting the broader goals of food security, economic resilience, and sustainability. By investing in workforce housing and establishing a collaborative working group with ADC's involvement, Hawaii will strengthen its agricultural sector, support local farmers, and create opportunities for farmworkers to thrive.

Mahalo for the opportunity to submit testimony in strong support of this measure.

TESTIMONY OF KALI WATSON, CHAIR
HAWAIIAN HOMES COMMISSION
BEFORE THE HOUSE COMMITTEE ON AGRICULTURE AND FOOD SYSTEMS
HEARING ON FEBRUARY 12, 2025 AT 9:30AM IN CR 325

HB 1294, HD 1, RELATING TO AGRICULTURAL WORKFORCE HOUSING

February 11, 2025

Aloha Chair Kahaloe, Vice Chair Kusch, and Members of the Committee:

The Department of Hawaiian Home Lands (DHHL) **supports** this bill which 1) establishes an Agricultural Workforce Housing Working Group within the Department of Agriculture to address the shortage and challenges of agricultural workforce housing in the State, 2) requires reports to the Legislature, and 3) appropriates funds.

The Hawaiian Homes Commission Act, 1920, as amended, authorizes DHHL to lease agricultural lands or lands used for aquaculture purposes. DHHL has awarded 1,105 agricultural leases as of December 31, 2024 – 60 on Oahu, 64 on Maui, 406 in East Hawaii, 111 in West Hawaii, 46 on Kauai, and 418 on Molokai. DHHL also has 19,939 applications for an agricultural lease as of January 1, 2025 – 4,220 on Oahu, 4,840 on Maui, 7,410 on Hawaii Island, 2,327 on Kauai, and 1,142 on Molokai.

DHHL's General Plan Update dated November 2022 notes the following: "The connection to 'āina and ability to cultivate it and bring forth life is central to Prince Kūhiō's vision for the rehabilitation of Hawaiians. The first homestead pilot program focused on agriculture production as evidence that the Hawaiian Homesteads work. Today, agricultural homestead lots have the longest waitlists on all islands except for O'ahu." The Plan also provides that "the majority of agricultural applicants who responded (80%) indicated that they intend to farm and live (i.e., build a home) on their agricultural lot when awarded. The agricultural activities that applicants anticipated for their lots, once awarded, were mostly subsistence and gardening activities, while 11% of waitlist respondents anticipated using their agriculture lot for commercial farming." The Plan further explains that "DHHL is developing an Agriculture Program Plan to increase beneficiary capacity in farming. Programs will range from training in beginning farming to more advanced programs for commercial agriculture."

Thank you for your consideration of our testimony.

February 12, 2025

HEARING BEFORE THE
HOUSE COMMITTEE ON AGRICULTURE & FOOD SYSTEMS

TESTIMONY ON HB 1294, HD1
RELATING TO AGRICULTURAL WORKFORCE HOUSING

Conference Room 325 & Videoconference
9:30 AM

Aloha Chair Kahaloa, Vice-Chair Kusch, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate, and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports HB 1294, HD1, which requires the Department of Agriculture to establish an Agricultural Workforce Housing Working Group to address the shortage and challenges of agricultural workforce housing in the State.

HFB recognizes the need for agricultural workforce housing and believes that affordable housing is necessary to attract farm workers. This has been a major shortfall as we try to address the labor needs for agriculture and is a limiting factor for the growth of agriculture in Hawai'i.

The shortage of willing and able workers, the need for affordable housing for farm workers, and competition from alternative employment are several of the pressing farm-labor-related issues that need to be addressed.

The lack of affordable housing for farmers and farm labor impedes increasing food and non-food agricultural production in Hawai'i. There is a need to develop housing for farmers and farm employees while ensuring that the housing is used in conjunction with an active farm and occupied by bona fide farmers and farm employees.

An Agricultural Workforce Housing Working Group can help identify the agricultural workforce housing needs in each County and help identify the barriers to meeting the housing needs for farm and ranch businesses in Hawai'i.

Thank you for this opportunity to testify in support of this measure.

Comments:

Aloha Chair and Committee Members:

As a long-time small-scale farmer in Honaunau, it is important to me that this piece of legislation is supported.

Since much of the housing in place is used for vacation rental, the need at hand for working housing is quite significant.

Please support this effort at this time.

Yours,

Colehour Bondera

Aloha Chair Kahaloe, Vice Chair Kusch, and Members of the House Agriculture & Food Systems Committee,

The Hawai'i Farmers Union is a 501(c)(5) agricultural advocacy nonprofit representing a network of over 2,500 family farmers and their supporters across the Hawaiian Islands. **HFU supports HB1294.**

The establishment of an Agricultural Workforce Housing Working Group by the Department of Agriculture, as outlined in HB1294, is a timely and necessary initiative for addressing the persistent shortage and challenges of agricultural workforce housing in Hawaii. The agricultural sector is an essential pillar of our local economy, and the ability to provide adequate housing for farmworkers is crucial for sustaining and enhancing this industry. Safe, affordable, and accessible housing solutions directly improve the quality of life for agricultural workers, increase workforce stability, and support productivity on our farms.

Furthermore, the requirement for the Working Group to submit reports to the Legislature ensures that there will be ongoing assessment, accountability, and progress tracking of this initiative. By doing so, it creates an opportunity for continuous feedback and improvement, helping to make informed decisions that best serve our agricultural communities. Additionally, the appropriation of funds to support this endeavor signals a committed investment in addressing these longstanding issues, ultimately fostering a more resilient agricultural workforce and strengthening our local food systems.

Mahalo for the opportunity to testify.

Hunter Heavilin
Advocacy Director
Hawai'i Farmers Union

February 11, 2025

To: Chair Kirstin Kahaloa, Vice Chair Matthias Kusch, and House Members of the
Committee Agriculture & Food Systems,

Subject: **HB 1294**, Relating to Agricultural Workforce Housing

Aloha,

I am writing to express my **support** for HB 1294 HD 1, which seeks to establish more affordable housing opportunities for our state's agricultural workers. As someone who has spent a lot of time working on agricultural land in Waiāhole Valley, I have firsthand seen the importance of access to housing for farmers, and how imposition to housing opportunities for agricultural workers can be detrimental to the broader community that depends on their labor.

Access to farmer housing in Hawai'i must be addressed as a means to provide support and suitable living opportunities for many of Hawai'i's agricultural workers. The passing of this bill is important due to the role that our state's agricultural workforce places in the stability and access to food security for many local families. Ensuring that farmers have stable living conditions is critical to ensuring that our food security is being protected and maintained as Hawai'i's food security continues to grow.

Mahalo nui for your consideration and review.

Mahalo,

Lea iaea & the Food+ Policy Team
#fixourfoodsystem

The Food+ Policy internship develops student advocates who learn work skills while increasing civic engagement to become emerging leaders. We focus on good food systems policy because we see the importance and potential of the food system in combating climate change and increasing the health, equity, and resiliency of Hawai'i communities.

In 2025, the cohort of interns are undergraduate and graduate students and young professionals working in the food system. They are a mix of traditional and nontraditional students, including parents and veterans, who have backgrounds in education, farming, public health, nutrition, and Hawaiian culture.
