Testimony COMMENTING on HB1389 HD1 RELATING TO FERAL ANIMALS

REPRESENTATIVE KYLE T. YAMASHITA, CHAIR HOUSE COMMITTEE ON FINANCE

Hearing Date, Time: 02/21/2025, 02:00 P.M. Room Number: 308

- 1 Fiscal Implications: This measure will not impact the priorities identified in the Governor's
- 2 Executive Budget Request for the Department of Health's (Department) appropriations and
- 3 personnel priorities.
- 4 **Department Position:** The Department offers **support** for HB1389.
- 5 **Department Testimony:** The Environmental Health Services Division (EHSD), Vector Control
- 6 Branch (VCB), provides the following comments on behalf of the Department.
- 7 The Department of Health (Department) supports HB1389, which appropriates funds to expand
- 8 the City and County of Honolulu (CCH) and the Department for feral chicken control and a
- 9 feeding feral animal education campaign, respectively. The Department strongly supports the
- 10 efforts of the state, city, and counties to control the increases in the populations of feral
- 11 chickens and, more broadly, feral animals.
- 12 The House Committee on Health requested a cost estimate for developing a public outreach
- 13 campaign. The Department envisions retaining a contractor to assist in the development of
- 14 outreach materials. Time and materials for the effort is estimated at \$75,000.00.

Feral animals threaten local ecosystems and can transmit diseases affecting both humans and
native species. Feeding feral animals, including chickens, cats, or other species, leads to
increased feral populations, which is detrimental to the welfare of the animals, the
environment, and sometimes even human health. It is crucial to provide financial support to
expand county feral animal control programs to mitigate the negative impacts associated with
feral animals.

Educating residents and visitors about the harmful effects of feeding feral animals is vital to the
success of any feral animal reduction program in Hawaii. If the Department receives funding for
a campaign to inform the public about the risks of feeding feral animals, the Department will
collaborate with other government and private agencies or organizations that share similar
interests and priorities.

- 12 Thank you for the opportunity to testify.
- 13

14 Offered Amendments: None

Testimony of DAWN N. S. CHANG Chairperson

Before the House Committee on FINANCE

Friday, February 21, 2025 2:00 PM State Capitol, Conference Room 308 and Via Videoconference

In consideration of HOUSE BILL 1389, HOUSE DRAFT 1 RELATING TO FERAL ANIMALS

House Bill 1389, House Draft 1 proposes appropriating funding to the City and County of Honolulu to expand the feral chicken program and establish a statewide education campaign to provide the public with information on feeding feral animals. The Department of Land and Natural Resources (Department) supports this measure.

Feral animals threaten public health, safety, and conservation and have reached population levels that are a public nuisance. They displace native flora and fauna across the state and disrupt ecosystems through their foraging and predation activities. They create sanitary hazards due to waste in public areas that spread pathogens and bacteria. In addition, they spread diseases and destroy property. Controlling feral animals is essential, and educating residents about the impact these animals have is a helpful tool. The Department strongly supports this effort.

Mahalo for the opportunity to provide testimony in support of this measure.

HOUSE BILL NO. 1389, HD1

RELATING TO FERAL ANIMALS

Chair Yamashita, Vice Chair Takenouchi, and Members of the Committee:

Thank you for the opportunity to testify on House Bill 1389 HD1. HB1389 HD1 appropriates funds to the City and County of Honolulu for the expansion of the feral chicken program and the Vector Control Branch of the Department of Health for a statewide education campaign for the feeding of feral animals. The Hawaii Department of Agriculture (Department) supports this measure and provides comments.

Appropriating funds for the City and County of Honolulu to assist in expanding the County feral chicken control program is needed. The City and County of Honolulu have the experience and a program in place for control of the feral animals. In addition, the Department believes assisting other county feral chicken control programs in addition to Honolulu, is beneficial if funds are allowed. The Department also feels that funds could be used by the counties for targeted education campaigns in each county but will defer to the Department of Health regarding this provision.

Thank you for the opportunity to testify on this measure.

Dear Chair Yamashita, Vice Chair Takenouchi, and Members of the House Committee on Finance.

> SUBJECT: H.B. No. 1389, H.D. 1 - Relating To Feral Animals HEARING: Friday, February 21, 2025, 2:00 p.m.

The City and County of Honolulu, Department of Customer Services (CSD), appreciates the opportunity to testify in support of H.B. No. 1389, H.D. 1, which would appropriate funds for the expansion of the City and County of Honolulu's feral chicken program and establish a statewide education campaign to provide the public with information on the feeding of feral animals.

Feral animals, particularly chickens, have increasingly become a public nuisance, impacting residential communities, businesses, and agricultural operations across the state. The rapid growth of feral animal populations presents concerns related to noise, sanitation, public health, and environmental sustainability. As noted in prior legislative findings, a collaborative and well-funded approach is necessary to effectively address these challenges.

H.B. No. 1389, H.D. 1 provides a practical solution by expanding existing programs that have demonstrated success in mitigating feral chicken populations through structured management efforts. Additionally, a statewide education campaign will help inform residents about the impact of feeding feral animals and promote responsible practices to prevent further population surges.

Testimony for H.B. No. 1389, H.D. 1 February 20, 2025 Page 2

With sufficient and consistent funding and coordination, this initiative will contribute to a cleaner, safer, and more livable environment for all communities in Hawai'i. We respectfully urge the Legislature to support H.B. No. 1389, H.D. 1 and appropriate the necessary resources to ensure the continued effectiveness of these efforts.

Thank you for this opportunity to provide testimony on H.B. No. 1389, H.D. 1.

Sincerely,

Kimberly M. Hashiro Director Designate

February 21, 2025

HEARING BEFORE THE HOUSE COMMITTEE ON FINANCE

TESTIMONY ON HB 1389, HD1 RELATING TO FERAL ANIMALS

Conference Room 308 & Videoconference 2:00 PM

Aloha Chair Yamashita, Vice-Chair Takenouchi, and Members of the Committee:

I am Brian Miyamoto, Executive Director of the Hawai'i Farm Bureau (HFB). Organized since 1948, the HFB is comprised of 1,800 farm family members statewide and serves as Hawai'i's voice of agriculture to protect, advocate and advance the social, economic, and educational interests of our diverse agricultural community.

The Hawai'i Farm Bureau supports HB 1389, HD1, which appropriates funds to the City and County of Honolulu for the expansion of the feral chicken program and the Vector Control Branch of the Department of Health for a statewide education campaign for the feeding of feral animals.

Across the State, various feral species are creating havoc on agriculture and the ecosystems in which they exist. They continue to destroy crops and pasture lands by devouring living vegetation as they spread.

The feral chicken and rooster populations in Hawai'i have skyrocketed and have become an ever-increasing problem. Aside from roosters crowing in the hours before dawn, the feral chickens damage crops, spread weeds, threaten native plants, and are a road hazard. The noise, health issues, and environmental damage from feral chickens have become major concerns and need to be controlled.

These feral populations can pose a danger, especially as populations grow and their health is put into jeopardy due to inadequate food. Diseases they normally tolerate will become serious debilitating illnesses that could jeopardize our domestic livestock and poultry industries. Such fears are not unreasonable, as incidences such as bovine tuberculosis spread from feral pigs have been documented in Molokai.

Hawai'i's farmers and ranchers are working to provide Hawai'i with an increased level of self-sufficiency but will not be able to do so if their products are consumed or damaged by feral animals. Feral chickens and roosters can cause major damage to property, agriculture (crops and livestock), Hawai'i's native species and ecosystems, and Hawai'i's

cultural and historic resources. They can also threaten the health of people, wildlife, pets, and other domestic animals. As Hawai'i's feral animal populations continue to expand, these damages, costs, and risks will only keep rising. The State and Counties need to develop a long-term management plan that includes a feeding of feral animal education program to address this ever-growing problem.

Thank you for this opportunity to testify on this important subject.

Comments:

I support this bill to expand feral animal programs and control the growing population of nonnative feral animals in the state, as well as to educate residents and visitors on the harmful effects of feeding feral animals on the health of our native animals, ecosystem, and people of Hawaii.
